

1. Record Nr.	UNINA9910831870703321
Titolo	Oceanography and marine biology : an annual review. Volume 55 // editors, S.J. Hawkins, Ocean and Earth Science, University of Southampton, National Oceanography Centre, UK and The Marine Biological Association of the UK, The Laboratory, Plymouth
Pubbl/distr/stampa	Boca Raton, FL : , : CRC Press, , [2017] ©2017
ISBN	9781351987585 1351987585 9781315272276 131527227X 9781351987592 1351987593
Edizione	[1st ed.]
Descrizione fisica	1 online resource (487 pages) : illustrations
Collana	Oceanography and Marine Biology : An Annual Review ; 55 , 0078-3218
Disciplina	551.460072
Soggetti	Oceanography - Research
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Nota di bibliografia	Includes bibliographical references and indexes.
Nota di contenuto	chapter Filling in the Grazing Puzzle: A Synthesis of Herbivory in Starfish / Aline S. Martinez, Maria Byrne and Ross A. Coleman -- chapter Intertidal Boulder-Fields: A Much Neglected, but Ecologically Important, Intertidal Habitat / M.G. Chapman -- chapter Ecological Dominance along Rocky Shores, with a Focus on Intertidal Ascidiaceans / Marc Rius, Peter R. Teske, Patricio H. Manriquez, Rocio Suarez-Jimenez, Christopher D. McQuaid and Juan Carlos Castilla -- chapter Giant Clams (Bivalvia: Cardiidae: Tridacninae): A Comprehensive Update of Species and Their Distribution, Current Threats and Conservation Status / Mei Lin Neo, Colette C.C. Wabnitz, Richard D. Braley, Gerald A. Heslinga, Cecile Fauvelot, Simon Van Wynsberge, Serge Andrefouet, Charles Waters, Aileen Shau-Hwai Tan, Edgardo D. Gomez, Mark J. Costello and Peter A. Todd -- chapter How Anthropogenic Activities Affect the Establishment and Spread of Non-Indigenous Species Post-Arrival / Emma L. Johnston, Katherine A. Dafforn, Graeme F. Clark, Marc

Rius and Oliver Floerl -- chapter A Review of Herbivore Effects on Seaweed Invasions / Swantje Enge, Josefin Sagerman, Sofia A. Wikstrom and Henrik Pavia.

Sommario/riassunto

"Ever-increasing interest in oceanography and marine biology and their relevance to global environmental issues create a demand for authoritative reviews summarizing the results of recent research. Oceanography and Marine Biology: An Annual Review has catered to this demand since its founding by the late Harold Barnes more than 50 years ago. Its objectives are to consider, annually, the basic areas of marine research, returning to them when appropriate in future volumes; to deal with subjects of special and topical importance; and to add new subjects as they arise. The favourable reception and complimentary reviews accorded to all the volumes shows that the series is fulfilling a very real need. Volume 55 follows closely the objectives and style of the earlier volumes, continuing to regard the marine sciences--with all their various aspects--as a unity. Physical, chemical, and biological aspects of marine science are dealt with by experts actively engaged in these fields. The series is an essential reference text for researchers and students in all fields of marine science and related subjects, and it finds a place in libraries of universities, marine laboratories, research institutes and government departments. It is consistently among the highest ranking series in terms of impact factor in the marine biology category of the citation indices compiled by the Institute for Scientific Information/Web of Science."--Provided by publisher.
