Descrizione fisica	1 online resource (216 p.)
Collana	Humanities Open Books
Soggetti	History / Africa / East History
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Sommario/riassunto	In Southern Nilotic History, Christopher Ehret reconstructs the history of the Southern Nilotic speaking peoples of East Africa, from their earliest origins to the beginning of the colonial period. As a history, the book is a remarkable tour de force. Using mainly linguistic evidence, the author locates populations, moves them around, determines their relative influence vis-vis their neighbors, and reconstructs aspects of their culture, from basic economy to the practice of extracting incisors. - American Anthropologist
