

1. Record Nr.	UNINA9910832958503321
Autore	Southard John, Professor
Titolo	The Environment of the Earth's Surface / John Southard
Pubbl/distr/stampa	[s.l.] : , : [s.n.], , 2007
Descrizione fisica	1 online resource (463 p.)
Soggetti	Science / Earth Sciences Education Science
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Sommario/riassunto	A great variety of processes affect the surface of the Earth. Topics to be covered are production and movement of surficial materials; soils and soil erosion; precipitation; streams and lakes; groundwater flow; glaciers and their deposits. The course combines aspects of geology, climatology, hydrology and soil science to present a coherent introduction to the surface of the Earth, with emphasis on both fundamental concepts and practical applications, as a basis for understanding and intelligent management of the Earth's physical and chemical environment.
