   Livello bibliografico Monografia

   Sommario/riassunto This text comprises a three-text series on Calculus. The first part
                       covers material taught in many "Calc 1" courses: limits, derivatives and
                       the basics of integration, found in Chapters 1 through 6.1. The second
                       text covers material often taught in "Calc 2:" integration and its
                       applications, along with an introduction to sequences, series and Taylor
                       Polynomials, found in Chapters 5 through 8. The third text covers
                       topics common in "Calc 3" or "multivariable calc:" parametric equations,
                       polar coordinates, vector-valued functions, and functions of more than
                       one variable, found in Chapters 9 through 13.
