

1. Record Nr.	UNINA9910832987003321
Autore	Woodson Herbert H
Titolo	Electromechanical Dynamics : : Part One, Discrete Systems // Herbert H. Woodson, James R. Melcher
Pubbl/distr/stampa	New York : , : John Wiley and Sons Incorporate, , 1968
Descrizione fisica	1 online resource (1085 p.)
Soggetti	Science
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Sommario/riassunto	First published in 1968 by John Wiley and Sons, Inc., Electromechanical Dynamics discusses the interaction of electromagnetic fields with media in motion. The subject combines classical mechanics and electromagnetic theory and provides opportunities to develop physical intuition. The book uses examples that emphasize the connections between physical reality and analytical models. Types of electromechanical interactions covered include rotating machinery, plasma dynamics, the electromechanics of biological systems and magnetoelasticity.
