Sommario/riassunto	<p>Building on decades of experience working in Europe's neighbourhood, in Africa and around the world, under EU mandates and in support of EU policy priorities, EIB Global brings together all the financial, engineering and scientific expertise of the European Investment Bank to maximise impact. The new structure fosters strong, focused partnerships within Team Europe, with multilateral development banks and bilateral development agencies. With a stronger presence on the ground, it increases our cooperation with partner countries, clients, EU Member States and other development finance institutions. This publication reports on the first year of EIB Global. The first section reviews the development context, looking at global macroeconomic development and the different regions where EIB Global operates: EU neighbourhood countries sub-Saharan Africa the Western Balkans and Türkiye Asia and the Pacific, and Latin America and the Caribbean The report then turns to the overarching priorities of EIB Global and the European Fund for Sustainable Development Plus, examining investment needs and describing the response by EIB Global: Climate change Jobs and inclusive growth The Global Gateway The final part brings together all the information on the results and impact of EIB Global operations and the financial and non-financial contribution we make. It covers: How we measure</p>

Sommario/riassunto	"It has been estimated that 70% to 90% of individuals diagnosed with autism spectrum disorder (ASD) experience mealtime challenges (Volkert & Vaz, 2010). Most approaches to the treatment of mealtime challenges have focused on decreasing interfering mealtime behaviors through escape extinction (i.e., requiring consumption of food prior to

meal termination) and other approaches that may be perceived as punitive by parents, individuals diagnosed with ASD, and other stakeholders. In recent years, there has been an increase in research on promoting enjoyable mealtimes for individuals diagnosed with ASD and their families. The purpose of this edited book is to provide a comprehensive review of these approaches for improving mealtime behaviors for individuals diagnosed with ASD, provide clinical recommendations for improving mealtime behaviors, and identify areas for future research."--
