1.

Record Nr.	UNINA9910835054303321	
Autore	Liu Dongxiao	
Titolo	Blockchain-Based Data Security in Heterogeneous Communications Networks / / by Dongxiao Liu, Xuemin (Sherman) Shen	
Pubbl/distr/stampa	Cham : , : Springer Nature Switzerland : , : Imprint : Springer, , 2024	
ISBN	3-031-52477-2	
Edizione	[1st ed. 2024.]	
Descrizione fisica	1 online resource (200 pages)	
Collana	Wireless Networks, , 2366-1445	
Altri autori (Persone)	ShenXuemin (Sherman)	
Disciplina	621.382	
Soggetti	Telecommunication Cooperating objects (Computer systems) Blockchains (Databases) Communications Engineering, Networks Cyber-Physical Systems Blockchain	
Lingua di pubblicazione	Inglese	
Formato	Materiale a stampa	
Livello bibliografico	Monografia	
Nota di contenuto	Introduction -- Heterogeneous Communications Networks (HCN) -- Fundamental Data Security Technologies -- Reliable Data Provenance in HCN -- Transparent Data Query in HCN -- Fair Data Marketing in HCN -- Future Works -- Conclusion.	
Sommario/riassunto	This book investigates data security approaches in Heterogeneous Communications Networks (HCN). First, the book discusses the urgent need for a decentralized data management architecture in HCN. The book investigates preliminaries and related research to help readers obtain a comprehensive picture of the research topic. Second, the book presents three blockchain-based approaches for data management in HCN: data provenance, data query, and data marketing. Finally, based on the insights and experiences from the presented approaches, the book discusses future research directions. Discusses the need for decentralized data security approaches in heterogeneous communications networks (HCN); Presents solutions applicable and practical for real-world applications; Investigates HCN data security approaches such as reliable data provenance, transparent data query, and fair data marketing.
