and Sara J. Tai -- Sprirituality and the fallacy of the medical model /
Isabel Clarke -- Cultural incompetency / David Walker -- Does
capitalism makes us crazy? / Susan Rosenthal -- In defense of anti-
psychiatry / Phil Hickey.

Sommario/riassunto

This book, edited by Eric Maisel and Chuck Ruby, offers a critical examination of the psychiatric model, questioning its ethics, efficacy, and legitimacy within the field of mental health. It includes contributions from various experts who challenge the traditional practices of psychiatry and psychology, including the use of diagnostic labels, psychiatric medication, and the medicalization of mental health issues. The volume aims to provide alternative perspectives and encourages a dialogue about the ethical implications of current mental health practices. It is intended for professionals, scholars, and anyone interested in understanding the criticisms and potential reforms in the field of psychiatry.
