

1. Record Nr.	UNINA9910838375803321
Autore	Malhotra D
Titolo	C++ Programming Fundamentals
Pubbl/distr/stampa	New York : , : Mercury Learning & Information, , 2022 ©2022
ISBN	1-68392-974-8 1-68392-975-6
Edizione	[1st ed.]
Descrizione fisica	1 online resource (289 pages)
Altri autori (Persone)	MalhotraN
Disciplina	005.133
Soggetti	COMPUTERS / Programming Languages / C++
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Nota di contenuto	Cover -- Title -- Copyright -- Contents -- Preface -- Acknowledgments -- Chapter 1 C++ and Beyond -- Introduction -- 1.1 The Origin of C++ -- 1.2 Why Use C++? -- 1.3 Various Programming Paradigms -- 1.3.1 Structural Programming -- 1.3.2 Procedural Programming -- 1.3.3 Object Oriented Programming -- 1.4 C++ Basics -- 1.4.1 Variables -- 1.4.2 Data Types -- 1.4.3 Data Modifiers -- 1.4.4 Execution Flow -- Summary -- Exercises -- Theory Questions -- MCQ-Based -- Practical Application -- References -- Books -- Websites -- Chapter 2 Basic Play in C++ -- 2.1 Literals, Constants, and Qualifiers -- 2.2 Stream-Based IO -- 2.3 Comments -- 2.4 Operators and Types -- 2.4.1 Types of Operators in C++ -- 2.5 Type Conversion -- 2.6 Keywords -- 2.7 Loops in C++ -- 2.9 Control Statements -- 2.9 Defining Functions -- 2.9.1 Why Use Functions? -- 2.10 C vs. C++ -- Summary -- Exercises -- Theory Questions -- MCQ-Based -- Practical Questions -- References -- Books -- Websites -- Chapter 3 Arrays and Strings -- 3.1 What is an Array? -- 3.1.1 Ways to Declare Arrays -- 3.1.2 Ways to Access Array Members -- 3.1.3 Traversing a 1D Array -- 3.2 Operations on an Array -- 3.2.1 Passing an Array to Functions -- 3.2.2 Finding the Length -- 3.2.3 Enum in C++ -- 3.2.4 Searching -- 3.3 Multi-Dimensional Array -- 3.4 Strings -- 3.5 String Functions -- Summary -- Exercises -- Theory Questions -- MCQ-Based -- Practical Questions -- References -- Books --

Websites -- Chapter 4 Pointers in C++ -- 4.1 Introduction -- 4.2 Pointers: Declaration and Initialization -- 4.3 Casting and Passing Pointers -- 4.3.1 Typecasting -- 4.3.2 Passing -- 4.4 Using Pointers with Arrays -- 4.5 Pointer Use -- Summary -- Exercises -- Theory Questions -- Practical Questions -- MCQ-Based -- References -- Books -- Websites -- Chapter 5 Classes in C++ -- 5.1 Class Making. 5.2 Constructors and Destructors -- 5.3 The This Pointer -- 5.4 Class Methods -- 5.5 The static Keyword -- 5.6 Memory Management and Garbage Collection in C++ -- Summary -- Exercises -- Theory Questions -- Practical Questions -- MCQ-Based -- References -- Books -- Websites -- Chapter 6 Inheritance -- 6.1 Introduction -- 6.2 Inheritance -- 6.2.1 Access Specifiers -- 6.2.2 Inheritance Modes -- 6.3 Types of Inheritance -- 6.4 Constructor Calling -- 6.5 Implementing Inheritance -- Summary -- Exercises -- Theory Questions -- Practical Questions -- MCQ-Based -- References -- Books -- Websites -- Chapter 7 Polymorphism -- 7.1 Introduction -- 7.2 Dynamic vs. Static Binding -- 7.3 Interface and Implementation -- 7.4 Function Overriding and Overloading -- 7.5 Friend and Generic Functions -- 7.5.1 Friend Functions -- 7.5.2 Generic Functions -- 7.6 Namespaces -- Summary -- Exercises -- Theory Questions -- Practical Questions -- MCQ-Based -- References -- Books -- Websites -- Chapter 8 Operator Overloading -- 8.1 Basics -- 8.2 How to Overload an Operator? -- 8.3 Overloading Unary Operators -- 8.4 Overloading Binary Operators -- 8.5 Overloading by Friend Function -- Summary -- Exercises -- Theory Questions -- Practical Questions -- MCQ-Based -- References -- Books -- Websites -- Chapter 9 Structure and Union -- 9.1 Structure: Declaration and Definition -- 9.2 Accessing a Structure -- 9.3 Union -- 9.4 Differences Between Structure and Union -- 9.5 Enum in C++ -- Summary -- Exercises -- Theory Questions -- Practical Questions -- MCQ-Based -- References -- Books -- Websites -- Chapter 10 Exception Handling -- 10.1 Errors and Exceptions -- 10.2 Exception Handling -- 10.3 Various Exceptions -- 10.4 Custom Exceptions in C++ -- Summary -- Exercises -- Theory Questions -- Practical Questions -- MCQ-Based -- References -- Books -- Websites -- Chapter 11 File Handling. 11.1 Files and Streams -- 11.2 File Operations -- 11.3 Random Access and Object Serialization -- Summary -- Exercises -- Theory Questions -- Practical Questions -- MCQ-Based -- References -- Books -- Websites -- Index.

## Sommario/riassunto

This book is designed to cover the basics of C++, the powerful programming language used by developers all over the world. Its readily understandable concepts and easy syntax are used in video games, embedded systems, IoT devices, and resource-heavy AI applications. Using a “self-teaching” method with numerous examples and figures, the book covers all of the major C++ concepts, including pointers, classes, strings, arrays, polymorphism, inheritance, file handling, and more. Various types of the end of chapter exercises include theoretical, practical, and multiple choice (with answers) to enhance comprehension of the topics covered. FEATURES: Uses a self-teaching method with numerous examples, figures, and a variety of exercisesCovers all of the basic C++ concepts including strings, arrays, classes, file handling and more
