

1. Record Nr.	UNINA9910841655803321
Autore	Bahadur Singh Virendra
Titolo	Weathering and Erosion Processes in the Natural Environment
Pubbl/distr/stampa	Newark : , : John Wiley & Sons, Incorporated, , 2024 ©2024
ISBN	1-394-15736-3 1-394-15734-7
Edizione	[1st ed.]
Descrizione fisica	1 online resource (410 pages)
Altri autori (Persone)	MadhavSughosh Chandra PantNaresh ShekharRavi
Disciplina	551.302
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Nota di contenuto	Cover -- Title Page -- Copyright Page -- Dedication Page -- Contents -- List of Contributors -- Preface -- Chapter 1 Heavy Metals in the Sediment of River Ganga: A Review -- 1.1 Introduction -- 1.2 Source of Heavy Metals -- 1.2.1 Natural Sources -- 1.2.2 Anthropogenic Sources -- 1.3 Effects on Human Health -- 1.4 Status of Heavy Metal in the Sediment of River Ganga -- 1.4.1 Heavy Metals in the Sediment of River Ganga Before 2010 -- 1.4.2 Heavy Metals in the Sediment of River Ganga After 2010 -- 1.5 Comparative Assessment of Heavy Metal Pollution in Sediment -- 1.6 Mitigation Strategies -- 1.7 Conclusion -- References -- Chapter 2 Synergistic Process of Weathering and Erosion: Techniques of Measurement and Their Significance -- 2.1 Introduction -- 2.1.1 Weathering and Erosion: Synergistic Approach -- 2.2 Method of Measuring Rock Surface Change -- 2.2.1 Measurement with Quartz Resistant Mineral Vein as Natural Reference -- 2.2.2 Measurement with Anthropogenic Features as Reference -- 2.3 Contact Methods -- 2.4 Noncontact Methods -- 2.4.1 Measurement of Surface Recession Rate Using Micro-catchement -- 2.4.2 Measurement of Surface Recession Rate by Using Rock Exposure Trial -- 2.4.3 Measurement Using Principle of Photogrammetry -- 2.4.4 Light Source-Based Techniques

for Measuring Rate of Weathering -- 2.4.5 Measurement Using
Cosmogenic Dating -- 2.5 Techniques of Measuring Subsurface
Changes in Rock -- 2.5.1 Perpendicular Cut Technique of Rock
to Surface -- 2.5.2 Technique of Strength Testing -- 2.5.3
Measurement for the Test of Porosity -- 2.5.4 Measurement for the
Test of Internal Stress/Strain -- 2.5.5 Measurement Based on Moisture
Content or Its Distribution -- 2.6 Techniques Based on Microscope
for Measuring Rate of Weathering -- 2.6.1 Technique Based
on Stereo/Dissecting Microscope.
2.6.2 Measurement Based on Petrographic Microscopy of Thin Sections
or Acetate Peels -- 2.6.3 Measurement Based on Confocal Scanning
Microscopic Technique (CSML) -- 2.6.4 Technique Based on Structured
Light Illumination Microscopy (SLIM) -- 2.7 Techniques Based
on Infrared Microscopic Techniques -- 2.7.1 Technique Based on
Fourier Transform Infrared Microscopy (FTIR) -- 2.8 Techniques Based
on Electron Microscopic Techniques -- 2.8.1 Technique of SEM -- 2.8.2
Technique Based on Backscattered Electron Detection (BSE) or SEM with
X-Ray Energy-Dispersive Spectroscopy (EDS) -- 2.8.3 Technique Based
on Cryo-SEM (Low-Temperature SEM) -- 2.8.4 Technique Based on
Environmental SEM/Variable Pressure SEM -- 2.8.5 Technique Based on
TEM/High-Resolution TEM/FTIR Microscopy -- 2.8.6 Scanning
Transmission Electron Microscopy (STEM) -- 2.9 Techniques Based
on Force Microscopy -- 2.9.1 Method Based on Scanning Force
Microscopy (SFM)/Atomic Force Microscopy (AFM) -- 2.10 Technique
Based on 3D X-Ray Microscopy Computed Tomography (CT) -- 2.10.1
Measurement Based on X-Ray CT/Micro-CT/Nano-CT -- 2.11
Conclusion -- References -- Chapter 3 Comparison of Major
Hydrogeochemical Processes in Coastal Sedimentary and Hard Rock
Aquifers of South India -- 3.1 Introduction -- 3.2 Study Area -- 3.2.1
Sedimentary Aquifer, Cuddalore District -- 3.2.2 Hard Aquifer,
Tuticorin District -- 3.3 Material and Methods -- 3.4 Results
and Discussion -- 3.4.1 Water Chemistry -- 3.4.2 Geochemical
Classification -- 3.4.3 Gibbs Method -- 3.4.4 Statistics -- 3.5
Conclusion -- References -- Chapter 4 Textural and Mineralogical
Signatures of Fluvial Sediments in Mountain Streams of Contrasting
Climates in the Southern Western Ghats (India) -- 4.1 Introduction --
4.2 Study Area -- 4.3 Methodological Framework -- 4.4 Results
and Discussion.
4.4.1 Spatial Variability in the Grain-Size Distribution of Fluvial
Sediments -- 4.4.2 Mineral Assemblage of the Fluvial Sediments --
4.4.3 Effect of Topography and Climate on Sediment Characteristics --
4.5 Summary and Conclusion -- Acknowledgments -- References --
Chapter 5 Crucial Interplay of Microbial Communities in Controlling the
Geogenic Processes -- 5.1 Introduction -- 5.2 Mechanical/Physical
Weathering -- 5.3 Chemical Weathering -- 5.4 Biological Weathering --
5.5 Weathering by Plants -- 5.6 Weathering by Animals -- 5.7 Microbial
Weathering -- 5.8 Mechanisms of Microbial Weathering -- 5.8.1
Microbial Diversity Involved in Biological Weathering -- 5.8.2
Applications of Omics Technologies to Understand the Mechanism of
Weathering -- 5.9 Conclusion -- References -- Chapter 6 Evolution of
Soil Erosion and Sedimentation Vulnerability of Western Himalayan Lake
Sukhna, India -- 6.1 Introduction -- 6.2 Study Area -- 6.3 Data Used
and Methodology -- 6.3.1 Data Used -- 6.3.2 Determination of Bulk
Density, Dry Density, Moisture Contents -- 6.3.3 Measurement of Cs-
137 Activity -- 6.4 Results and Discussion -- 6.4.1 Bulk Density, Dry
Density, and Moisture Contents -- 6.4.2 Caesium-137 Activity -- 6.4.3
Sediment Deposition Profiles -- 6.4.4 Computation of Sedimentation
Rate -- 6.4.5 Comparison with Garde and Kothyari (1987) Model --

6.4.6 Analysis of Impact of Conservation Measures on Soil Erosion --
6.5 Summary and Conclusions -- Acknowledgments -- Author
Contribution -- References -- Chapter 7 Geochemical Characterization
and Baseline Determination of Trace Elements in Stream Waters from a
Part of the Carajás Mineral Province, Brazil -- 7.1 Introduction -- 7.2
Materials and Methods -- 7.2.1 Study Area -- 7.2.2 Hydrographic
Characteristics, Land Use, and Climate Conditions of the Region --
7.2.3 Geological Setting of the Region.
7.2.4 Sampling and Analytical Methods -- 7.2.5 Data Preparation
and Quality Control -- 7.2.6 Statistical Treatment of Data -- 7.2.7
Spatial Distribution Maps -- 7.2.8 Estimation of Geochemical Baseline
Threshold Values -- 7.3 Results -- 7.3.1 Basic Statistics of the Water
Quality Data -- 7.3.2 Seasonal Variation of Water Quality Variables --
7.3.3 Spatial Distribution of Water Quality Variables -- 7.3.4
Multivariate Statistics -- 7.3.5 Estimated Geochemical Baseline Values
-- 7.4 Discussion -- 7.4.1 Physicochemical Characteristics
and Seasonal Variation of the Chemical Composition -- 7.4.2 Geogenic
and/or Anthropogenic Influence on the Chemistry of Subbasin Surface Water
-- 7.4.3 Comparison Between the Geochemical Signature in the Waters
of MISB and Other Subbasins of IRW -- 7.4.4 Geochemical Baseline
Levels in the Surface Waters of the Subbasin -- 7.5 Conclusions --
Acknowledgments -- References -- Chapter 8 Identifying the
Footprints of Meteorological, Tectonic, and Anthropogenic Parameters
on Sediment Transport in the Indus River System: A Review -- 8.1
Introduction -- 8.2 Study Area -- 8.3 Geological and Tectonic Settings
-- 8.4 Hydrologic Regime of the IRB -- 8.5 Climate Settings of the IRB
-- 8.6 Precipitation in the IRB -- 8.7 Evaluation of Projections of
Hydrometeorological Trends of the IRB -- 8.7.1 Evaluation of
Temperature Trends and Projections in the IRB -- 8.7.2 Evaluation of
Precipitation Trends and Projections in the IRB -- 8.7.3 Sediment Yield
and Related Factors in IRB -- 8.8 Conclusion -- References -- Chapter
9 An Implication of Enhanced Rock Weathering on the Groundwater
Quality: A Case Study from Wardha Valley Coalfields, Central India --
9.1 Introduction -- 9.2 Study Area -- 9.3 Geology -- 9.4 Methodology
-- 9.5 Characterization of the Groundwater -- 9.5.1 Hydro-
Geochemistry -- 9.5.2 Metal Chemistry.
9.6 Spatial Source Approximation -- 9.6.1 PCA -- 9.6.2 Interpolations
of the Factor Scores -- 9.7 Temporal Approximation -- 9.7.1 Gray
Sandstone (P1) -- 9.7.2 Carbonaceous-Micaceous Siltstone (P2) --
9.7.3 Carbonaceous Shale (P3) -- 9.7.4 Pink-Colored Ferruginous
Sandstone (P4) -- 9.7.5 Yellow-Colored Ferruginous Sandstone (P5) --
9.8 Conclusion -- References -- Chapter 10 Soil Loss Rates in Trans-
Himalayan Region: Case Study of Shyok Suture Zone, Ladakh, India --
10.1 Introduction -- 10.2 Study Area -- 10.3 Data and Methodology --
10.3.1 Rainfall Erosivity (R Factor) -- 10.3.2 Soil Erodibility (Factor K) --
10.3.3 Crop Management (C Factor) and Support Practice (P Factor) --
10.3.4 Topographic Factor (LS Factor) -- 10.4 Result and Discussion --
10.4.1 Rate of Soil Loss and Spatial Distribution -- 10.4.2 Rate of Soil
Loss in Rainfall, LULC, and Soil Texture -- 10.4.3 Rate of Erosion in the
Himalayas -- 10.4.4 Comparison of Long-Term and Short-Term Rate
of Soil Erosion -- 10.5 Conclusion -- Acknowledgments -- References
-- Chapter 11 Microbial Weathering of Rocks in Natural Habitat:
Genetic Basis and Omics-Based Exploration -- 11.1 Introduction --
11.2 Microbial Diversity of Extreme Habitats -- 11.2.1 Low-
Temperature Regions -- 11.2.2 High-Temperature Regions -- 11.2.3
Mines -- 11.3 Factors Affecting Bio-Weathering -- 11.3.1 Physical
Factors -- 11.3.2 Chemical Factors -- 11.4 Genes and Microbial
Pathways -- 11.5 Microbial Interactions in Bio-Weathering -- 11.5.1

Biofilms in Microbial Weathering -- 11.5.2 Symbiotic Interactions
in Microbial Weathering -- 11.6 Importance of Bio-Weathering --
11.6.1 Soil Fertility and Plant Growth Promotion -- 11.6.2
Bioremediation -- 11.6.3 Bioremediation -- 11.7 Omics to Explore
Microbial Weathering of Rocks -- 11.8 Conclusion and Future
Directions -- References.
Chapter 12 Occurrence of Arsenic (As) in the Aquatic Environment Due
to Weathering and Erosion.
