

1. Record Nr.	UNINA9910841852703321
Autore	Aransiola Sesan Abiodun
Titolo	Prospects for Soil Regeneration and Its Impact on Environmental Protection
Pubbl/distr/stampa	Cham : , : Springer, , 2024 ©2024
ISBN	3-031-53270-8
Edizione	[1st ed.]
Descrizione fisica	1 online resource (396 pages)
Collana	Earth and Environmental Sciences Library
Altri autori (Persone)	BabaniyiBabafemi Raphael AransiolaAdejoke Blessing MaddelaNaga Raju
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Nota di contenuto	Intro -- Foreword -- Preface -- Acknowledgements -- Contents -- Editors and Contributors -- Environmental Conservation Policies -- Legislation and Programs Supporting Environmental Protection -- 1 Introduction -- 1.1 Environmental Protection and Management Act -- 1.2 Program for the Prevention of Environmental Risks -- 1.3 Environmental Risks -- 2 Environmental Legislation -- 2.1 Regulatory Bodies -- 2.2 Contamination of Land -- 3 Environmental Protection Support Program -- 3.1 Laws, Benchmarks, Controls, and Organizations Relating to the Environment in Nigeria -- 4 Conclusion -- References -- Environmental Conservation for Sustainable Agriculture -- 1 Sustainability -- 1.1 Agriculture as a Sustainable Industry -- 1.2 International Agriculture Research Centres and Their Focus of Research for Sustainable Agriculture -- 2 Sustainable Development Goals -- 2.1 Environmental Conservation and Sustainable Agriculture -- 3 Sustainable Agriculture Strategies -- 3.1 Soil Nutrient Management -- 3.2 Crop Rotation -- 3.3 Crop Breeding -- 3.4 Pest and Weed Management -- 3.5 Microbiome Management -- 4 Environmental Conservation Strategies -- 4.1 Climate-Smart Irrigation -- 4.2 Soil Conservation -- 4.3 Waste Management -- 4.4 Carbon Sequestration -- 5 Challenges -- 5.1 Population Dynamics -- 5.2 Climate Change -- 5.3 Deforestation -- 6

Outlook for the Future -- 6.1 Wireless Telephones, the IoE [Internet of Everything] Leads to Transmission -- 6.2 Intertwining IoTs and Wireless Sensors -- 6.3 Drones and Robots -- 6.4 Machine Learning (ML) -- 6.5 Nutriculture and Multilevel Farming -- References -- Environmental Conservation for Rural and Urban Development -- 1 Introduction -- 2 Rural-Urban Connectivity Theories -- 3 The Three-Magnet Hypothesis -- 4 Connections Between Rural and Urban Areas -- 4.1 Services for Provisioning. 4.2 Regulating the Provision of Services -- 4.3 Cultural Offerings -- 4.4 Supporting Services -- 5 Conclusions -- References -- Impact of Emerging Contaminant on Farmland Soil -- 1 Introduction -- 2 Major Emerging Contaminants and Their Sources -- 3 Contamination of Farmland Soil with Ecs: From Sink to Source -- 4 Impact of Emerging Contaminants on Farmland Soil -- 5 Removal and Remediation Strategies of Emerging Contaminants -- 6 Conclusions -- References -- Soil and Soil Issues -- Soil Formation, Soil Health and Soil Biodiversity -- 1 Basic Concepts of the Soil -- 2 Components of the Soil -- 2.1 Soil Minerals -- 2.2 Soil Organic Matter -- 2.3 Soil Water -- 2.4 Soil Air -- 3 The Soil Profile -- 4 Process of Formation of Soil -- 4.1 Specific Processes of Soil Formation -- 4.2 Factors Affecting Soil Formation -- 5 Conceptual Knowledge of Soil Health -- 5.1 Diseases Associated with Soil -- 5.2 Maintaining a Healthy Soil -- 5.3 Relevance of Good Soil Formation to Soil Health -- 6 Soil Biodiversity -- 6.1 Effects of Soil Biodiversity -- 6.2 Effects of Unhealthy and Poorly Formed Soils on Soil Biodiversity -- 6.3 Importance of Healthy and Adequately Formed Soils on Soil Biodiversity -- References -- Topsoil Regeneration and Bio-sequestration -- 1 Introduction -- 1.1 Structure of Top Soil -- 1.2 Characteristics of Top Soil -- 1.3 Soil Fertility -- 1.4 Role of Microorganisms in Topsoil Regeneration -- 1.5 Importance of Minerals in Top Soil Regeneration -- 1.6 Genetically Modified Microbes Used in Topsoil Regeneration -- 2 Interrelation of Bio-sequestration with Topsoil Regeneration -- 2.1 How Carbon Sequestration Works? -- 2.2 Artificial Bio Sequestration -- 2.3 Biologic Carbon Sequestration on Land -- 2.4 Sources of Carbon Emissions -- 2.5 Most Important Carbon Sinks -- 2.6 Soil Organic Carbon -- 3 Quality Methods to Identify Soil Quality. 3.1 Rothamsted Carbon Model -- 3.2 Uses of Soil Regeneration -- 3.3 Virtuous Consequences -- 3.4 Other Following Methods -- 3.5 Improving Capacity of Topsoil Regeneration -- 4 Principle Risks of Topsoil Regeneration and Bio Sequestration -- 4.1 Risks -- 4.2 Methodology to Overcome Risks -- 5 Educating/Giving Awareness Regarding Soil Restoration -- 6 Conclusion -- 7 Future Challenges -- References -- Soil Erosion, Mineral Depletion and Regeneration -- 1 Introduction -- 2 Causes and Consequences of Soil Erosion -- 3 The Impact of Soil Erosion on Mineral Depletion -- 4 Understanding Soil Regeneration Processes -- 5 Techniques for Soil Conservation and Soil Control -- 6 Sustainable Agriculture Practices to Combat Soil Erosion -- 7 The Role of Organic Framing in Soil Regeneration -- 8 Nutrient Management Strategies for Replenishing Minerals -- 9 Harnessing Technology for Soil Health Restoration -- 10 Conclusion -- References -- Recycling Resources of Soil and Agroecosystem -- 1 Introduction -- 2 Lignocellulose -- 2.1 Cellulose -- 2.2 Hemicellulose and Lignin -- 3 Lignocellulose Pretreatment -- 3.1 Getting Ready Physically -- 3.2 Pretreatment with Chemicals -- 3.3 Pretreatment with Biological Agents -- 3.4 Integrated Pretreatment -- 4 Factors Affecting the Regulation of Decomposing the Organic Agricultural Waste -- 4.1 Rate of Aeration -- 4.2 Amount of Moisture and Temperature -- 4.3 Electrical Conductivity and pH -- 4.4 C/N -- 4.5 Stacking Exogenous Ingredients

-- 5 Potential to Influence the Growth of Plants -- 5.1 Compost Microorganisms' Impact on Plant Growth -- 5.2 Composting Enhances the Environment for Plant Growth -- 6 Conclusion and Suggestions for Future Development -- References -- Natural Occurrences of Soil Dilapidation -- 1 Introduction -- 2 Soil Dilapidation -- 3 Historical Context of Soil Dilapidation.

4 Guidelines for Assessing Soil Dilapidation Process -- 5 Factors Contributing to Soil Dilapidation -- 5.1 Erosion -- 5.2 Weathering -- 5.3 Geological Processes -- 5.4 Biological Factors -- 6 Impacts of Soil Dilapidation -- 6.1 Environmental Consequences -- 6.2 Agricultural and Economic Impacts -- 6.3 Societal Effects -- 7 Mitigation, Management and Remediation Strategies -- 7.1 Agronomic and Biological Measures -- 7.2 Technological Strategies -- 7.3 Policy and Regulatory Approaches -- 8 Future Prospect -- 9 Conclusion -- References -- Soil Regeneration and Influencing Factors -- Regenerative Agriculture for Food Security -- 1 Introduction -- 2 Food Security -- 3 Regenerative Agriculture -- 3.1 Disruptive Potential -- 3.2 Technology Changing the Landscape -- 4 Roles of Regenerative Agriculture -- 5 Differences Between Regenerative and Sustainable Agriculture -- 5.1 Regenerative Agriculture and Food Security -- 5.2 Effects of Regenerative Agriculture Biophysically -- 6 Conclusion -- References -- Soil Regeneration and Microbial Community on Terrestrial Food Chain -- 1 Introduction -- 1.1 Background and Significance of the Chapter -- 1.2 Background of Soil Regeneration -- 1.3 Significance of Soil Regeneration -- 1.4 Background of Microbial Community -- 1.5 Significance of Microbial Community -- 1.6 Objectives of the Chapter -- 2 Soil Regeneration -- 2.1 Definition and Importance of Soil Regeneration -- 2.2 Factors Influencing Soil Regeneration -- 3 Microbial Community in Soils -- 3.1 Introduction to Soil Microbial Community -- 3.2 Types of Soil Microorganisms -- 4 Interactions Between Soil Regeneration and Microbial Community -- 4.1 Effects of Soil Regeneration on Microbial Communities -- 5 Effects of Microbial Communities on Soil Regeneration -- 5.1 Nutrient Cycling -- 5.2 Soil Structure Formation -- 5.3 Disease Suppression.

6 Influence of Soil Regeneration Practices on Microbial Community Composition and Diversity -- 6.1 Changes in Soil Physicochemical Properties -- 6.2 Addition of Organic Amendments -- 6.3 Modification of Soil Biota -- 6.4 Shifts in Vegetation Cover -- 7 Impact of Microbial Community on Soil Fertility and Nutrient Availability -- 7.1 Nutrient Cycling -- 7.2 Organic Matter Decomposition -- 7.3 Plant-microbe Interactions -- 8 Influence of Microbial Communities on Nutrient Availability of Soils -- 8.1 Nutrient Transformation -- 8.2 Microbial Competition -- 8.3 Soil Reaction (pH) and Redox Potential -- 9 Role of Microbial Community in Promoting Plant Growth and Health -- 10 Feedback Mechanisms Between Soil Regeneration and Microbial Community Dynamics -- 11 Summary of Major Points -- 12 A Clarion Call for Action and Future Research Directions -- 13 Conclusion -- References -- Impact of Regenerative Agriculture on Soil Erosion -- 1 Introduction to Regenerative Agriculture -- 1.1 Regenerative Agriculture and Its Overview -- 1.2 Major Concern in the Agricultural Sector- Soil Erosion -- 2 Soil Erosion: Factors and Impacts -- 2.1 Types of Soil Erosion -- 2.2 Factors Affecting the Soil Erosion -- 2.3 Effects of Climate Change on Soil Erosion -- 2.4 Effects of Soil Erosion on Environment and It's Surroundings -- 3 Practices for Controlling Soil Erosion -- 3.1 Key Practices for Controlling Soil Erosion -- 3.2 How Regenerative Agriculture Address Soil Erosion -- 4 Regenerative Agriculture: A Solution to the Problems of Soil Erosion and Its Impact on Soils Health in the Present Era -- 4.1 Regenerative Agricultural

Practices: A Regenerative Approach to Increasing Soil Quality -- 4.2
Impact of Regenerative Agriculture Framing Practice on Soils Health --
5 Effects and Benefits of Regenerative Agriculture on Soil Erosion.
5.1 Role of Microorganisms in Regenerative Agriculture.
