Sommario/riassunto	Sakaue Toshie was born on August 14, 1925, into a family of tenant farmers and day laborers in the hamlet of Kosugi. The world she entered was one of hard labor, poverty, dirt, disease, and frequent early death. By the 1970's, that rural world had changed almost beyond recognition.

Sommario/riassunto

This book focuses on cultural variations and perspectives in infant and early childhood mental health and describes parenting / caregiver-young child relationships across the globe, including countries in Europe, Asia, South America, South Africa, the Middle East, and the United States. It examines infant and early childhood assessment issues, such as infant-parent/caregiver observations that comprise an important component of assessment during the earliest years. In addition, the book presents different clinical interpretations, practices, and treatment approaches in infant mental health (e.g., evidence-based treatments and promising practices). It explores ways to help support and provide clinical interventions and treatment for infants, toddlers, and their families within the home, clinic, and community-based environments. Key areas of coverage include: Systemic assessment of adverse childhood experiences (ACEs). Infant and early childhood mental health assessment in indigenous contexts. Psychodynamic approaches in infant mental health. Evidence-based therapeutic interventions for very young children. Community-based interventions in infant mental health. The WAIMH Handbook of Infant and Early Childhood Mental Health, Volume Two, is a must-have reference for researchers, professors, and graduate students as well as clinicians and all related therapists and professionals in infancy and early child development, developmental psychology, pediatrics, child and adolescent psychiatry, clinical social work, public health and all related disciplines.

Sommario/riassunto	Based on seventeen months of ethnographic research among Indonesian eldercare workers in Japan and Indonesia, this book is the first ethnography to research Indonesian care workers' relationships with the cared-for elderly, their Japanese colleagues, and their employers. Through the notion of intimacy, the book brings together sociological and anthropological scholarship on the body, migration, demographic change, and eldercare in a vivid account of societal transformation. Placed against the background of mass media representations, the Indonesian workers' experiences serve as a basis for discussion of the role of bodily experience in shaping the image of a national "other" in Japan.
