anonymous cyberbullying among school students -- Chapter 16: Predicting individual cognitive status based on EEG data fit to power law distribution -- Chapter 17: Internet addiction and personal maturity of adolescents -- Chapter 18: Predicting performance and functional reserves of athletes based on their pulse indicators in different trainings -- Chapter 19: Algorithm for analyzing the text of news reports on society digitalization in Russia -- Chapter 20: Transformation of Belarusian protest management in social media (2020-2021) -- Chapter 21: Digital readiness of young people to interact with the state.

Sommario/riassunto	This proceedings book presents select papers from the International Conference on Internet and Modern Society (IMS 2022). It discusses topical issues of digital geography and the geography of the information society, especially in urban settings. Participants from all over the world consider the controversies and challenges posed by globalization, focusing on Digital Urbanism, Smart Cities, Digital Sustainability, Social Media Movements, Digital Divide, and Cyber Psychology. The book will be of interest to academics, researchers, and students in digital humanities, as well as governmental and non-governmental cybersecurity organizations.
