

1. Record Nr.	UNINA9910842288203321
Autore	Chiang Pen-Chi
Titolo	Environment and Renewable Energy : Proceedings of the 2023 9th International Conference on Environment and Renewable Energy
Pubbl/distr/stampa	Singapore : , : Springer, , 2024 ©2024
ISBN	981-9700-56-6
Edizione	[1st ed.]
Descrizione fisica	1 online resource (156 pages)
Collana	Springer Proceedings in Earth and Environmental Sciences Series
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Nota di contenuto	Intro -- Conference Committees -- Preface -- Contents -- Heat Transfer, Heat Recovery, and Energy Conservation -- Study on Soil Temperature Recovery Prediction Model of Ground Source Heat Pump -- 1 Introduction -- 2 Prediction Model Establishment -- 3 Experimental System -- 4 Model Verification -- 5 Conclusion -- References -- A Comparative Study of the Transcritical CO2 Cycle and the Organic Rankine Cycles Using R245fa and Low GWP Refrigerants in Low Temperature Geothermal Utilization -- 1 Introduction -- 2 Method -- 2.1 Cycle Descriptions -- 2.2 Energy Analysis -- 2.3 Simulation Process -- 3 Results -- 4 Conclusions -- References -- Numerical Simulation of the Influence of Air Space Thickness in Heat Transfer of a High-Performance Glazing System -- 1 Introduction -- 2 Model Definition -- 2.1 Definition of the High-Performance Glazing System -- 2.2 Governing Equations -- 2.3 Model Solution -- 3 Results and Discussion -- 3.1 The Thermal Conductance Values of Entire Selection (L2D) -- 3.2 The Influence of the Air Space Thickness in the Internal Heat Flux -- 3.3 The Total Heat Losses of the Glazing System in Wintertime -- 4 Conclusion -- References -- Renewable Energy and Clean Energy Technology -- Impact of Location on Hybrid Renewable Energy System Design Optimization: A Case Study for Two Cities of USA -- 1 Introduction -- 2 Modeling of the System -- 2.1 Modeling of Photovoltaic Module -- 2.2 Modeling of Wind Turbine Generators -- 2.3 Modeling of the Battery -- 2.4 Modeling of Diesel

Generator -- 3 Formulation of the Optimization Problem -- 4
 Methodology -- 4.1 Algorithm Formulation -- 5 Data and Resource --
 6 Result Analysis -- 7 Conclusion and Future Work -- References --
 Stability of a Hydroxyapatite-Supported Nickel Catalyst in Dry
 Reforming of Methane -- 1 Introduction -- 2 Materials and Methods --
 3 Results -- 3.1 Catalyst Stability.
 3.2 Catalyst Regeneration -- 4 Conclusion -- References --
 Renewable-Based Energy Mix Optimization for Weak Interconnected
 Communities -- 1 Introduction -- 2 Materials and Methods -- 3 Case
 Study and Results -- 4 Conclusion -- References -- Pyrolysis Kinetics
 of Microalgae Residues-A Comparative Study on DAEM Using Different
 Distribution Functions -- 1 Introduction -- 2 Theoretical Background
 -- 2.1 Distributed Activation Energy Model -- 2.2 Continuous
 Distributed Activation Energy Function $F(E)$ -- 3 Methodology -- 4
 Results and Discussion -- 4.1 Kinetic Modelling with Gaussian
 Distributed Activation Energy Model -- 4.2 Kinetic Modelling
 with Logistic Distributed Activation Energy Model -- 4.3 Kinetic
 Modelling with Weibull Distributed Activation Energy Model -- 4.4
 Comparison Between Three Distributed Activation Energy Models -- 5
 Conclusion -- References -- Low-Cost Anodic Material Made of Rice
 Husk Charcoal and Acrylic Paint for Soil-Based Microbial Fuel Cells -- 1
 Introduction -- 2 Method and Experiment -- 2.1 Electrode Fabrication
 Method -- 2.2 SMFC Setup and Measurement -- 2.3 Observation
 of Electrode Surface -- 3 Result and Discussion -- 3.1 SEM Image
 of the Anode -- 3.2 Anode Performance -- 4 Conclusion -- References
 -- Water Pollution Control, Water Resource Management and Air Quality
 Assessment -- Analysis of the Effectiveness of *Lepidium Meyenii*,
Solanum Tuberosum, and *Musa Paradisiaca* Species as Natural
 Coagulants in the Treatment of the Cunas River-Peru -- 1 Introduction
 -- 2 Material and Methods -- 2.1 Water Sampling -- 2.2 Obtaining
 Natural Coagulants -- 2.3 Stock Solution -- 2.4 Dosages of Natural
 Coagulants -- 2.5 Jar-Test -- 2.6 Parameter Analysis -- 3 Result --
 3.1 Pre-test Results -- 3.2 Post-test Results -- 3.3 Effectiveness
 of Natural Coagulants -- 3.4 Optimal Doses -- 4 Discussion -- 5
 Conclusion -- References.
 Geological Factors Influencing River Morphological Changes:
 Implications in the Agricultural Sector -- 1 Introduction -- 2
 Methodology -- 3 Results and Discussion -- 3.1 Geological Factors
 Influencing River Morphological Changes -- 3.2 The Implications
 of the River Morphological Changes to the Agricultural Sector -- 4
 Conclusion -- References -- Assessment of Particle Filter Technique
 for Data Assimilation in the Forecasting of Streamflows
 for the Tocantins River Basin in Brazil -- 1 Introduction -- 2
 Methodology -- 2.1 Semi-Distributed MGB Hydrological Model -- 2.2
 Particle Filter (PF) -- 2.3 Uncertainty in Rainfall Forcing -- 3
 Experimental Model -- 3.1 Area of Study and Available Data -- 3.2
 Integration of Particle Filter with the MGB Hydrological Model -- 3.3
 Parameters of the PF Scheme -- 4 Discussion of Results -- 4.1
 Sensitivity Test -- 4.2 Streamflow Forecasting -- 5 Conclusion --
 References -- Development of a Biodegradable Detergent Based
 on Quinoa as an Alternative to Minimize Eutrophication -- 1
 Introduction -- 2 Materials and Methods -- 2.1 Biodegradable
 Detergent Formulations -- 2.2 Composition of the Biodegradable
 Detergent -- 2.3 Inputs and Quantities for Making the Biodegradable
 Detergent -- 2.4 Procedures to Elaborate the Biodegradable Detergent
 -- 2.5 Conventional Detergent Formulations -- 2.6 Efficacy
 of the Biodegradable Detergent -- 2.7 Sample Collection -- 3 Results
 and Discussions -- 3.1 Assay Methodology -- 3.2 Analysis of Analyzed
