Sommario/riassunto	The 2023 Congress on Research, Development, and Innovation in Renewable Energies (CIDiER 2022) promotes international collaboration

fostering ideas and dialogue around solutions to climate change through research and development that leads to clean energy innovation via renewable energies. These selected papers cover theoretical and applied research that will strengthen the implementation of renewable energy projects between universities, research centers, and private companies in Latin America. Covers biomass, hydraulic, hydrogen, tidal, solar, and wind energy; Presents research on advancing renewable energy; Promotes international collaboration between universities and private companies.
