| Sommario/riassunto | This book aims to provide first-hand information for readers concerned with green finance and sustainable development by summarizing the unique features, policies and practical innovations of green finance development in China and hoping to provide China's experience in the development of green finance for more regions. The global economy is currently facing historic opportunities that brings by a new round of technology, energy and industrial revolution. The new growth path of "green and low-carbon" development has become the main direction of the transformation of global economic development. What's China's green finance strategy? How does China deliver on the goal? This book builds an overview of China's green finance and sheds light on sustainable development topics from finance perspective. . |
