

1. Record Nr.	UNINA9910845090903321
Autore	Gao Qiqi
Titolo	Artificial Intelligence Governance and the Blockchain Revolution / / by Qiqi Gao, Jiteng Zhang
Pubbl/distr/stampa	Singapore : , : Springer Nature Singapore : , : Imprint : Springer, , 2024
ISBN	9789819992119 9819992117
Edizione	[1st ed. 2024.]
Descrizione fisica	1 online resource (190 pages)
Collana	Artificial Intelligence and the Rule of Law, , 2731-6246
Altri autori (Persone)	ZhangJiteng
Disciplina	303.483
Soggetti	Technology - Sociological aspects Technology - Moral and ethical aspects Artificial intelligence Science, Technology and Society Ethics of Technology Artificial Intelligence
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Nota di contenuto	The Intelligent Revolution and The Global Game Change -- Intelligent Risk Government and Intelligent Society Building -- The Future of Global Governance of Artificial Intelligence -- Blockchain and the Transformation of Global Economic Governance -- Blockchain, Global Governance, and Urban Governance -- Intelligent Civilization and Intelligent Social Science -- Postscript.
Sommario/riassunto	This is the first professional academic work in China to discuss artificial intelligence and blockchain together. Artificial intelligence is a productivity revolution, and its development has a significant and profound impact on global changes. However, at the same time, its development also brings a series of challenges to human society, such as privacy, security, and fairness issues. Therefore, the significance of blockchain is even more prominent. Blockchain is a revolution in production relations, which will propose important solutions to the challenges of privacy, security, and fairness that arise after the development of artificial intelligence. The book not only discusses the problems currently faced by the development of artificial intelligence,

as well as the new opportunities and challenges that artificial intelligence brings to future global governance, but also explains the further development direction of the intelligent revolution from the perspective of blockchain.
