1. Record Nr. UNINA9910845492703321

Titolo	Frontiers of Performability Engineering [[electronic resource]] : In Honor of Prof. K.B. Misra / / edited by Durga Rao Karanki
Pubbl/distr/stampa	Singapore : , : Springer Nature Singapore : , : Imprint : Springer, , 2024
ISBN	981-9982-58-8
Edizione	[1st ed. 2024.]
Descrizione fisica	1 online resource (XVII, 687 p. 242 illus., 148 illus. in color.)
Collana	Risk, Reliability and Safety Engineering, , 2731-782X
Disciplina	670
Soggetti	Industrial engineering Production engineering Electronic digital computers - Evaluation Computers Financial risk management Industrial and Production Engineering System Performance and Evaluation Hardware Performance and Reliability Process Engineering Risk Management
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Nota di contenuto	Intro -- Foreword -- Preface -- Prologue -- Acknowledgements -- Contents -- About the Editor -- Part I Reliability, Availability, Maintainability, Quality -- 1 Reliability Evaluation of Standby Systems -- 1.1 Introduction -- 1.2 Motivation and Related Works -- 1.3 Cold Standby Systems -- 1.3.1 1-out-of-nn Cold Standby Systems -- 1.3.2 kk-out-of-nn Cold Standby Systems -- 1.4 Shared Standby Components -- 1.5 Warm Standby Systems -- 1.5.1 Basics of Warm Standby Models -- 1.5.2 Reliability Analysis of kk-out-of-nn Warm Standby Systems -- 1.6 Switch Failures -- 1.6.1 Switch Failure on Request -- 1.6.2 Age-Dependent Switch Failure -- 1.7 Conclusions -- References -- 2 A Minimal Path-Based Approach for Reliability Evaluation of WSNs with Multistate Nodes -- 2.1 Introduction -- 2.2 Background -- 2.3 Assumptions -- 2.4 The WSN Model -- 2.5 Multi-

State Node Reliability Model -- 2.6 Reliability Measure for WSN -- 2.7 Proposed Methodology -- 2.7.1 Enumeration of Valid Node-Sets -- 2.7.2 Enumeration of Minimal Paths -- 2.7.3 Enumeration of Disjoint Sets -- 2.8 Algorithms -- 2.9 Illustrative Example -- 2.10 Results, Comparison, and Discussion -- 2.11 Conclusion -- References -- 3 Decision Diagrams for Complex System Reliability Analysis -- 3.1 Introduction -- 3.2 Fundamentals of MDDs -- 3.2.1 Shannon's Decomposition Theorem -- 3.2.2 Basic Concepts -- 3.2.3 MDD Generation -- 3.2.4 MDD Evaluation -- 3.3 MDD Analysis of a Diode Network -- 3.4 MDD Analysis of a Bridge Capacity Network -- 3.5 MDD Analysis of a Body Sensor Network -- 3.5.1 BSN Component Parameters and State Probabilities -- 3.5.2 BSN Component MDD Modeling -- 3.5.3 BSN MDD Generation and Evaluation -- 3.6 Conclusion -- References -- 4 Reliability Evaluation and Reliability Prediction for Internet of Things (IOT) Appliance -- 4.1 Internet of Things -- 4.2 Reliability Issues in IOT.
4.3 IOT Reliability Evaluation -- 4.3.1 Physical Hierarchical Structure -- 4.4 IOT Component Level Reliability -- 4.4.1 Microcontroller Reliability -- 4.4.2 Reliability of Other Semiconductor Devices -- 4.4.3 Wireless Reliability -- 4.4.4 PCB Reliability -- 4.4.5 Battery Reliability -- 4.5 IOT System Level Reliability -- 4.5.1 Non-series-Parallel RBD -- 4.5.2 Reliability Level for Constituent Units -- 4.6 Reliability Prediction -- 4.6.1 Bound of System Reliability -- 4.6.2 Case Study -- References -- 5 Masked Data Analyses of Reliability Systems Under Accelerated Life Testing -- 5.1 Introduction -- 5.2 Masked Data Analysis -- 5.2.1 Modelling Masked Data -- 5.3 Masked Probability -- 5.4 Dependent Masking -- 5.5 Independent Masking -- 5.5.1 Likelihood Function Formulation Under Masking for Series and Parallel Systems -- 5.6 Masked Data Analyses of Systems Under Normal Operating Conditions-A Review -- 5.7 Accelerated Life Testing -- 5.7.1 Accelerated Life Test Data Analysis -- 5.8 Constant-Stress ALT in the Presence of Masking -- 5.9 Step-Stress ALT in the Presence of Masking -- 5.10 Life Distribution Under Step-Stress ALT -- 5.11 Ramp-Stress (RS) ALT in the Presence of Masking -- 5.12 Gumbel- Hougaard (G-H) Copula -- 5.13 Constant-Stress Partially Accelerated Life Test (CSPALT) in the Presence of Masking -- 5.14 Test Procedure -- 5.15 Likelihood Function Formulation -- 5.16 Step-Stress Partially Accelerated Life Test (SSPALT) in the Presence of Masking -- 5.17 Test Procedure -- 5.18 Likelihood Function -- 5.18.1 Algorithms for Simulating Masked Data -- 5.18.2 A Numerical Illustration -- 5.19 Summary -- Appendix -- References -- 6 Modified MIP: A Versatile Search Procedure for Optimal Redundancy Allocation -- 6.1 Introduction -- 6.2 Notation, Assumptions, and the Problem -- 6.2.1 The Problem -- 6.2.2 Assumptions -- 6.3 Preliminaries.
6.4 Summary of MIPv0: Working, Strengths, and Limitations -- 6.5 Proposed Algorithm (MIPv1) -- 6.6 Problems Solved -- 6.7 Discussions -- 6.7.1 Advantages of the MIPv1 Algorithm -- 6.8 Conclusion -- References -- 7 My Interesting Experiences in STQC: Certification, Accreditation, and Training -- 7.1 Background -- 7.1.1 Acronyms -- 7.2 Case Study 1: Training Programs at IIQM, Jaipur (2004-08) -- 7.2.1 Course Approval from IRCA(UK) -- 7.2.2 Course Development of Lead Auditor/Auditor Course (ISO 9000, QMS) -- 7.3 Case Study 2: Experiences During Audit Witness by BSI(QA), UK (1994-98) -- 7.4 Case Study 3: First Laboratory Audit of NABL (1995-96) -- 7.5 Case Study 4: Approval of ERTLE, Kolkata as ITL, Under IECQ System (1987-88) -- References -- 8 Management of Aging Assets: Overview, Challenges, and Opportunities -- 8.1 Introduction -- 8.2 Asset Aging: What Is It and Why Does It Happen? -- 8.2.1 What Is Asset Aging? -- 8.2.2 What

Causes Aging? -- 8.3 Management of Aging Assets in Industries -- 8.3.1 Management of Aging Assets in Nuclear Power Plants -- 8.3.2 Management of Aging Assets in Offshore Structures -- 8.4 Correlations Between the Management of Aging Assets, RAMS, and PHM -- 8.4.1 Various Stages Over the Asset Lifecycle -- 8.4.2 Relationships Between RAMS, PHM, and Management of Aging Over the Asset's Lifecycle -- 8.5 Current Research Problems and Some Suggestions -- 8.5.1 Research Scope -- 8.5.2 Research Applications -- 8.5.3 Research Questions -- 8.5.4 Research Models/Approaches -- 8.6 General Framework for Management of Aging Assets -- 8.6.1 Study -- 8.6.2 Plan -- 8.6.3 Check -- 8.6.4 Act -- 8.7 Summary -- References -- 9 A KPI Framework for Maintenance Management: Development and Implementation -- 9.1 Introduction -- 9.2 KPI Framework -- 9.3 Asset Operation Management -- 9.4 Maintenance Process Management.
9.5 Maintenance Resources Management -- 9.6 Implementation of Proposed KPIs in a Company -- 9.7 Summary -- References -- 10 Approximate Calculations of Maintenance Policies for Weibull Distribution Using Exponential Distribution -- 10.1 Introduction -- 10.2 Failure Times -- 10.3 Age Replacement -- 10.3.1 Deviation Time -- 10.3.2 Variance Time -- 10.4 Parallel System -- 10.4.1 MTTF -- 10.4.2 Number of Units -- 10.4.3 Age Replacement -- 10.4.4 Random Number of Units -- 10.5 Inspection Policy -- 10.6 Estimation of Replacement Times with Exponential Distribution -- 10.7 Conclusions -- References -- Part II Safety, Risk, Uncertainty -- 11 Fukushima Case Studies on Risk-Taking Behavior in Accident Management -- 11.1 Introduction -- 11.2 Risk-Taking Behavior Analysis -- 11.2.1 Overview and Concept -- 11.2.2 Core Cooling Versus Containment Cooling (Unit 1 Case) -- 11.2.3 Containment Venting Versus Reactor Depressurization (Unit 2 Case) -- 11.2.4 Containment Isolation Versus Reactor Depressurization (Unit 3 Case) -- 11.3 Conclusions -- Appendix 1: RTB Cases in AM Identified from an Analysis of the 2011 Fukushima Daiichi Accident -- Appendix 2: RTB Prediction Support and Illustration -- References -- 12 Issues of Risk Taking Behaviour in SAMG Performance -- 12.1 Introduction -- 12.2 Characteristic Uncertainties in SAMG -- 12.2.1 Physics -- 12.2.2 Instrumentation -- 12.2.3 Ambiguous Consequences of Proposed Actions -- 12.2.4 Harsh Environmental Conditions in Rooms Where Manual Actions May Need to Be Performed -- 12.2.5 Operation Beyond the Design Envelope of Mitigating Equipment -- 12.2.6 Operation with Unqualified Water, Power Sources -- 12.2.7 Operation Beyond Available Resources (Running Out of Water, Diesel, Pneumatic, Remaining AC, ReMaining DC) -- 12.2.8 Restoration of Vital Equipment to Service -- 12.2.9 Adequate Help from Off-Site Sources.
12.2.10 The Accident Evolution is Different from Training in SAMG Exercises -- 12.2.11 TSC Character: Some Tscs Are 'Courageous', Others Are 'Cautious' -- Human Reliability Aspects -- 12.2.12 Beyond the 'Technical Matters' There Are Uncertainties with Respect to Human Behaviour -- 12.3 How to Diminish SAMG Uncertainties -- 12.4 Conclusions -- References -- 13 Damage Evolution and Countermeasure Performance in the Fukushima Daiichi Accident -- 13.1 Introduction -- 13.2 Timeline -- 13.3 Damage Evolution -- 13.3.1 Overview -- 13.3.2 Containment Performance -- 13.3.3 Release Mitigation -- 13.3.4 Hydrogen Management -- 13.4 Countermeasure Performance -- 13.4.1 Overview and Boundary Conditions -- 13.4.2 Diagnosis of Failure of Core Cooling -- 13.4.3 Core Damage Prevention -- 13.4.4 Containment Protection -- 13.5 Conclusions -- Appendix 1: Timeline of Damage Evolution and Countermeasure Performance --

Appendix 2: Prepared AM Measures in the Fukushima Daiichi Site -- References -- 14 Integrated Fuzzy MCDM Frameworks in Risk Prioritization of Failure Modes -- 14.1 Introduction -- 14.2 Background and Existing Literature -- 14.3 Fuzzy Number and Arithmetic Operations -- 14.4 Procedural Steps: IT2F-DEMATEL, Modified Fuzzy MAIRCA and MARCOS Methods -- 14.4.1 Interval Type-2 Fuzzy DEMATEL Approach -- 14.4.2 Modified Fuzzy MAIRCA -- 14.4.3 Modified Fuzzy MARCOS -- 14.5 Integrated Frameworks -- 14.5.1 Framework-I: Integrated MCDM Framework by Using IT2F-DEMATEL and Modified Fuzzy MAIRCA -- 14.5.2 Framework-II: Integrated MCDM Framework by Using IT2F-DEMATEL and Modified Fuzzy MARCOS -- 14.6 FMECA Case Study of a Process Plant Gearbox -- 14.6.1 Structural Correlation Analyses and Weights of the Risk Factors -- 14.6.2 Risk Ranking of the Failure Modes -- 14.7 Ranking Results and Conclusion -- 14.7.1 Comparisons of the Risk Ranking Results with Other Fuzzy MCDM Methods.
14.7.2 Sensitivity Analyses by Changing the Weight Values of the Risk Factors.

Sommario/riassunto

This book presents recent advances in performability analysis methods and their applications in different fields. It covers various aspects of performability such as quality, reliability, maintainability, availability, safety, security, and sustainability that are essential in complex engineering systems such as electrical grids, chemical plants, naval defense systems, structures, nuclear reactors, railways, etc. This book is a collection of research works contributed by the former students of Professor KB Mishra who is a renowned researcher in reliability engineering. This book is useful for the researchers and professionals working in the area of performability engineering.
