

1. Record Nr.	UNINA9910847077303321
Autore	Zhu Hu
Titolo	Infrared Small Target Detection : Theory, Methods, and Algorithms
Pubbl/distr/stampa	Singapore : , : Springer Singapore Pte. Limited, , 2024 ©2024
ISBN	981-9997-99-2
Edizione	[1st ed.]
Descrizione fisica	1 online resource (178 pages)
Altri autori (Persone)	PanYushan DengLizhen XuGuoxia
Disciplina	621.3672
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Nota di contenuto	Intro -- Preface -- Acknowledgements -- Contents -- Acronyms -- 1 Introduction -- 1.1 Overview -- 1.1.1 Infrared Information -- 1.1.2 Tasks -- 1.2 Infrared Target Prediction -- 1.2.1 Prediction Filtering -- 1.2.2 Prediction Methods -- 1.3 Methods of Infrared Target Prediction -- 1.3.1 Morphological Transformation -- 1.3.2 Tensor Decomposition -- 1.3.3 Low-Rank Presentation -- 1.3.4 Deep Learning -- 1.4 Book Structure -- 2 Preliminaries -- 2.1 Morphological Operation -- 2.2 Principal Component Analysis -- 2.3 Alternating Direction Method of Multipliers -- 2.4 Evaluation Metrics -- 2.5 Conclusion -- 3 Morphological Transformation for Infrared Small Object Detection -- 3.1 Morphological Operation -- 3.2 Notations -- 3.2.1 Mathematical Morphology and Top-Hat Transformation -- 3.2.2 Guided Filter -- 3.2.3 Weight Local Entropy -- 3.3 Entropy-Driven Top-Hat Transformation -- 3.3.1 The Proposed Entropy-Driven Top-Hat Transformation with Local Mean Entropy -- 3.3.2 Adaptive Structural Elements Based on Guided Filter Kernel -- 3.3.3 Target Detection Based on Overall Model -- 3.3.4 Analysis of the Adaptive Structural Elements -- 3.3.5 Analysis of Our Proposed Local Mean Entropy -- 3.4 Balanced Ring Top-Hat Transformation -- 3.4.1 The Target Detection Based on Our Overall Model -- 3.4.2 Adaptive Structuring Element Based on Guided Filter Kernel -- 3.4.3 A Balanced Ring Shape for Structuring

Elements -- 3.5 Adaptive M-estimator Ring Top-Hat Transformation -- 3.5.1 The Adaptive Structural Element Based on M-estimator -- 3.5.2 Ring Top-Hat Transformation Based on the Proposed Novel Local Entropy -- 3.5.3 Our Proposed Small Target Detection Method -- 3.6 Conclusion -- 4 Low-Rank Tensor Decomposition -- 4.1 Introduction -- 4.2 Notations -- 4.2.1 Classic Low-Rank Matrix Method -- 4.2.2 Detection Based on Entropy Method -- 4.3 Generalized Low-Rank Double-Tensor. 4.3.1 The Ring Structural Element for Top-Hat Regularization Transformation -- 4.3.2 Infrared Small Target Detection Model Based on Low-Rank Double-Tensor Nuclear Norm -- 4.3.3 The Noise GN -- 4.3.4 Model Formulation -- 4.3.5 Optimization -- (1) Update Noise -- (2) Update Target -- (3) Update Background -- (4) Update Others -- 4.4 Tensor Ring Decomposition -- 4.4.1 The Improved Target Detection Task -- 4.4.2 Motivations on Multiscale Morphological Transformation -- 4.4.3 Tensor Decomposition Based on Tensor Ring Low-Rank Kernel -- 4.4.4 Proposed Model for Small Target Detection -- 4.4.5 The Optimization of the Proposed Method with ADMM -- (1) Update of  $G(n)$  -- (2) Update of  $M(n,i)$  -- (3) Update of  $P(n,i)$  -- (4) Update of  $IN$  -- (5) Update of  $IT$  -- (6) Update of  $IB$  -- (7) Update of  $Y$  -- 4.4.6 Complexity and Convergence Analysis -- 4.5 Top-Hat Regularization -- 4.5.1 The Ring Structural Element for Top-Hat Transformation -- 4.5.2 The Low-Rank Tensor Model in Infrared Background -- 4.5.3 Noise Estimate -- 4.5.4 The Proposed Model for Small Target Detection -- (1) Under the No Noise Assumption -- (2) Under the Random Noise Assumption -- 4.5.5 The Solution of Our Proposed Model -- (1) The Solution of Noise ( $IN$ ) -- (2) The Solution of Target ( $IT$ ) -- (3) The Solution of Background ( $IB$ ) -- (4) The Solution of  $Y_i$  -- 4.6 Saliency Filtering -- 4.6.1 The Non-local Low-Rank Matrix Recovery -- 4.6.2 Saliency Filtering Based on Image Entropy -- 4.6.3 The Formulation of Small Target Detection -- 4.6.4 The Solution of Low-Rank Matrix  $L_i$  -- 4.6.5 The Solution of Background Image  $f_B$  -- 4.6.6 The Solution of Target Image  $f_T$  -- 5 Deep Learning Methods for Infrared Small Object Detection -- 5.1 Introduction -- 5.2 Notations -- 5.3 Variational U-Net Network Structure Model -- 5.3.1 Network Structure -- 5.3.2 Loss Function Based on Variation. 5.4 Convolutional Neural Network Algorithm -- 5.4.1 Gabor Filter -- 5.4.2 Gabor Network Model -- 5.5 Co-occurrence Neural Network for Image Segmentation -- 5.5.1 Co-occurrence Filter Convolutional Layer -- 5.5.2 Co-occurrence Residual Block -- 5.5.3 Reverse Attention Mechanism -- 5.5.4 Model Structure -- 5.6 Conclusion -- 6 Performance of Different Methods -- 6.1 Experimental Setting -- 6.2 Baseline Methods -- 6.3 Performance Comparison of Different Methods -- 6.4 Conclusions -- 7 Summary and Outlook of Research on Infrared Small Target Detection -- 7.1 Summary -- 7.2 Future Outlook -- Bibliography.
