Sommario/riassunto

“This is a groundbreaking re-evaluation, review and extension of Elias and Scotson’s model of established–outsider relations. A rich array of examples — from the ‘rainbow nationalism’ of minoritised sexual and gender groups, to the plight of Ukrainian Roma refugees — are explored as part and parcel of processes of post-community transformation and established–outsider reconfiguration in Poland... This is a major contribution to scholarship across a range of fields, its significant far-reaching and its conceptual implications manifold.” — Professor Jason Hughes, Professor of Sociology, CSSAH RIKE Lead, School of Media, Communication and Sociology, University of Leicester, UK This book uses Norbert Elias and John L. Scotson’s *The Established and The Outsiders* to map selected established-outsiders figurations in Poland after 1989. Looking at gender and sexual orientation, nationalism and patriotism, race and class, antifeminism and homophobia, elitist and populist imaginaries, religious and political ideals and ideologies, hate speech, and the crisis of the rule of law, this book tracks how inequalities are transformed into figurations of the have and the have-nots by way of spatial, symbolic and institutional exclusion. This edited collection is rooted in a socio-historical understanding of the trajectory of Polish society before and since the fall of Communism over thirty years ago, and a critical assessment of the dramatic turn that Polish society has taken since the beginning of the democratic backsliding in 2015. Professor Marta Bucholc is Director of the Centre of Figurational Research, Faculty of Sociology, University of Warsaw. She leads the Polish National Science Centre project on national habitus formation in Poland, as well as the ERC Consolidator project ABORTION FIGURATIONS and the Polish team of the Volkswagen Foundation project “Towards Illiberal Constitutionalism”. She is a Fellow of Norbert Elias Foundation, Amsterdam, and a Distinguished Fellow of the Universalism and Particularism KFG at the University of Munich. .

Sommario/riassunto	All of the critical technical aspects of gear materials technology are addressed in this reference work. Gear Materials, Properties, and Manufacture is intended for gear metallurgists and materials specialists, manufacturing engineers, lubrication technologists, and analysts concerned with gear failures who seek a better understanding of gear performance and gear life. This volume complements other gear texts that emphasize the design, geometry, and theory of gears. The coverage begins with an overview of the various types of gears used, important gear terminology, applied stresses and strength requirements associated with gears, and lubrication and wear. This is followed by in-depth treatment of metallic (ferrous and nonferrous alloys) and plastic gear materials. Emphasis is on the properties of carburized steels, the material of choice for high-performance power transmission gearing. The increasing use of plastics for both motion-carrying and power transmission applications is also addressed.

Sommario/riassunto	"The leading figure in qualitative health research (QHR), Janice M. Morse, asserts that QHR is its own separate discipline--distinct from both traditional health research and other kinds of qualitative research--and examines the implications of this position for theory, research, and practice. She contends that the health care environments transform many of the traditional norms of qualitative research and shape a new and different kind of research tradition. Similarly, the humanizing ethos of qualitative health research has much to teach traditional researchers and practitioners in health disciplines. She explores how the discipline of QHR can play out in practice, both in the clinic and in the classroom, in North America and around the world. A

challenging, thought-provoking call to rethink how to conduct qualitative research in health settings"--Provided by publisher.

Sommario/riassunto

This book seeks to identify the manifold ways in which the multiple European crises, debt, financial, sociopolitical, refugee (re)construct political polarizations in Greece on the basis of the country's divided past. This is the first book in the context of Discourse Studies and Political Communication which addresses specifically the Greek political particularities and their importance in both the construction and the expression of different notions of political identity in discourse. The book, written by two linguists, provides a critical interactional approach that combines critical discourse analysis, sociolinguistics, argumentation, political sociology, and social theory. Its interdisciplinary character enriches its theoretical platform and makes it distinctive. While the book centers on the Greek political landscape, it offers valuable insights for the broader study of Western politics and societies, which, like Greece, have in recent years been marked by overlapping crises, polarization, and political instability. We anticipate that readers will identify parallels between the Greek case and their own political realities. Coupled with an innovative methodological approach, this study aims to open new pathways in the analysis of political discourses.
