Sommario/riassunto

The 2018 archaeological survey at Tawi Said, located on the edge of the Sharqiyah desert in the Sultanate of Oman, yielded close to 8,600 artifacts, the majority being pottery sherds. Two significant phases are attested by the survey's finds: the Wadi Suq period (2000-1600 BCE) and the Late Islamic period (1650-1970 CE).
