

1. Record Nr.	UNINA9910850872303321
Titolo	Abendblatt der Illinois Staats-zeitung
Pubbl/distr/stampa	Chicago [Ill. : , : publisher not identified], , -1894
Descrizione fisica	1 online resource
Disciplina	071.3
Soggetti	German Americans - Illinois - Chicago German Americans Newspapers. Chicago (Ill.) Newspapers Illinois Chicago
Lingua di pubblicazione	Tedesco
Formato	Materiale a stampa
Livello bibliografico	Periodico
2. Record Nr.	UNINA9911020425003321
Autore	Polini Eleonora
Titolo	Broadband Quantum Noise Reduction in Advanced Virgo Plus : From Frequency-Dependent Squeezing Implementation to Detection Losses and Stray Light Mitigation / / by Eleonora Polini
Pubbl/distr/stampa	Cham : , : Springer Nature Switzerland : , : Imprint : Springer, , 2025
ISBN	3-031-95143-3
Edizione	[1st ed. 2025.]
Descrizione fisica	1 online resource (321 pages)
Collana	Springer Theses, Recognizing Outstanding Ph.D. Research, , 2190-5061
Disciplina	530.1
Soggetti	Gravitation Quantum optics Astrophysics Optoelectronic devices Gravitational Physics Quantum Optics Optoelectronic Devices
Lingua di pubblicazione	Inglese

Formato	Materiale a stampa
Livello bibliografico	Monografia
Nota di contenuto	Gravitational waves -- Ground based gravitational waves detectors -- Theory of quantum light in gravitational waves detectors -- Quantum noise reduction system overview in Advanced Virgo Plus -- Quantum noise reduction system commissioning -- Stray light in gravitational waves detectors -- Ghost beams study and mitigation -- Active control of scattered light on the FDS system -- Matching of the squeezing beam to the ITF -- New high finesse Output Mode Cleaner for Advanced Virgo Plus.
Sommario/riassunto	<p>This book presents the first implementation of frequency-dependent squeezing in the Virgo gravitational wave detector, a technique that reduces quantum noise across the entire detection band. By lowering noise, it enhances Virgo's ability to observe the universe. It provides a detailed account of the experimental optical system—spanning hundreds of meters—and the measurement campaign that led to the first observation of frequency-dependent squeezing, with ellipse rotation occurring at the target frequency of a few tens of Hz. Additionally, the book covers the characterization and commissioning of a new Output Mode Cleaner cavity in Virgo to minimize optical losses on squeezed states. Finally, it examines the impact of stray light noise at low frequencies and explores mitigation strategies to improve detector sensitivity.</p>
