Nota di contenuto	Frontmatter -- Contents -- Preface -- Acknowledgments -- VISUAL GUIDE TO NATURAL RESOURCES -- CALIFORNIA INDIAN USES OF NATURAL RESOURCES -- Notes -- General References -- Resource References by Region and Type -- Art Credits -- Index -- More Advance Praise
Sommario/riassunto	Capturing the vitality of California's unique indigenous cultures, this major new introduction incorporates the extensive research of the past thirty years into an illuminating, comprehensive synthesis for a wide audience. Based in part on new archaeological findings, it tells how the California Indians lived in vibrant polities, each boasting a rich village life including chiefs, religious specialists, master craftspeople, dances, feasts, and ceremonies. Throughout, the book emphasizes how these

diverse communities interacted with the state's varied landscape, enhancing its already bountiful natural resources through various practices centered around prescribed burning. A handy reference section, illustrated with more than one hundred color photographs, describes the plants, animals, and minerals the California Indians used for food, basketry and cordage, medicine, and more. At a time when we are grappling with the problems of maintaining habitat diversity and sustainable economies, we find that these native peoples and their traditions have much to teach us about the future, as well as the past, of California.

Nota di contenuto	Chapter 1: The Chinese healthcare and pharmaceutical market: Ignore at your own peril -- Chapter 2: China regulatory and legal reforms: Gateway to innovation and global integration -- Chapter 3: The golden

age of the Chinese biopharma: Explosive growth in a thriving ecosystem -- Chapter 4: Innovation in the Chinese biopharma: From me-too to First-in-class -- Chapter 5: The art of the biopharma deal: The China angle -- Chapter 6: End of the first cycle. A drastic rest, future challenges and opportunities.

Sommario/riassunto

This book provides an insider's overview of the emerging Chinese biopharma sector, its dynamics and trends, first bust and boom cycle, long-term perspectives, and how as a foreign company or investor to tap into this. China has gone from a country with no innovation in drug discovery, to a country which starts to out-license its biopharma technology to the rest of the world. The Chinese biopharma sector is only a decade old, but it already has become a new driver of growth and value. The book takes a closer look at what drives Chinese innovation in the biopharma sector, how to deal with this innovation, and what opportunities and challenges this provides for foreign companies. The book also takes a deep dive into its first biopharma boom and bust cycle, and what it means for the sector. It also explains what deals Chinese biopharma companies and investors are looking for, what works and what doesn't, and how as a foreign company can tap into the world's second largest healthcare market. Ben Wu has close to 30 years of experience in the pharmaceutical industry, holding senior executive positions in the Asia Pacific region for multinationals like J&J and Sanofi. He was active in several China originated biopharma companies, and is the founding CEO of Citrine Medicine, a venture capital backed biopharma. Originally from Belgium, Sven Agten has been living and working in China since 2004. He is a seasoned business executive working for SMEs and multinationals, with in-depth experience about business in China. He has published several books about China, all related to China business challenges, trends and opportunities.
