Titolo	The Social Impacts of Climate Change in China over the Past 2000 Years // by Xiuqi Fang, Yun Su, Jingyun Zheng, Lingbo Xiao, Zhudeng Wei, Jun Yin
Pubbl/distr/stampa	Singapore : , : Springer Nature Singapore : , : Imprint : Springer, , 2024
ISBN	9789819702022 981970202X
Edizione	[1st ed. 2024.]
Descrizione fisica	1 online resource (377 pages)
Altri autori (Persone)	SuYun ZhengJingyun XiaoLingbo WeiZhudeng YinJun
Disciplina	333.7
Soggetti	Ecology Human geography Physical geography Environmental Sciences Human Geography Physical Geography
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Nota di contenuto	Chapter 1. Mechanism and patterns of the impacts of historical climate change -- Chapter 2. The climate change in China over the past 2000 years -- Chapter 3. Conceptual model and indicators on the impact of historical climate change in China -- Chapter 4. The relationship between China's grain harvest and climate change over the past 2000 years -- Chapter 5. The relationship between China's economic fluctuation and climate change over the past 2000 years -- Chapter 6. The relationship between China's famine, peasant uprising and climate change over the past 2000 years -- Chapter 7. The relationship between the interaction of farming and nomadic groups and climate change in northern China over the past 2000 years -- Chapter 8. The

relationship between China's social status and climate change over the past 2000 years -- Chapter 9. The coordination of historical climate and China's social and economic changes -- Chapter 10. The transmission process of the impacts of historical climate change in historical China -- Chapter 11. The Adaptation of climate change in historical China -- Chapter 12. Conclusion and Prospect. .

Sommario/riassunto

This book aims to illustrate how climate change had impacted the socio-economic development in the history of China, under the framework of food security. The 10 years resolution sequences indexing the status of social and economic subsystems in China over the past 2000 years are reconstructed. Statistical methods are used to reveal the major characters and main process of the impact of historical climate change on China's social economy. This book serves as a reference both for researchers, graduates, and undergraduates majoring in geography, climatology, history, and other related fields.
