Livello bibliografico	Monografia
Sommario/riassunto	Late Prehistoric Fortifications in Europe: Defensive, Symbolic and Territorial Aspects from the Chalcolithic to the Iron Agepresents the contributions to the International Colloquium 'FortMetalAges' (10th-12th November 2017, Guimaraes, Portugal), The Colloquium was organised by the Scientific Commission 'Metal Ages in Europe' of the International Union of Prehistoric and Protohistoric Sciences (UISPP/ IUSPP) and by the Martin Sarmiento Society of Guimaraes. Nineteen papers discuss different interpretive ideas for defensive structures whose construction had necessitated large investment, present new case studies, and conduct comparative analysis between different regions and chronological periods from the Chalcolithic to the Iron Age.
