

1. Record Nr.	UNINA9910855364403321
Autore	Wigley Fredrick M
Titolo	Raynaud's Phenomenon : From Pathogenesis to Management
Pubbl/distr/stampa	Cham : , : Springer, , 2024 ©2024
ISBN	3-031-52581-7
Edizione	[2nd ed.]
Descrizione fisica	1 online resource (444 pages)
Altri autori (Persone)	HerrickAriane L FlavahanNicholas A
Disciplina	616.131
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Nota di contenuto	Intro -- Foreword by Antony Rosen -- Foreword by Dame Carol Black -- Preface -- Acknowledgments -- Contents -- List of Contributors -- 1: Historical Perspective of Raynaud's Phenomenon -- Milestones -- Pathogenetic Mechanisms -- Epidemiology -- Diagnosis -- Treatment -- Conclusion -- References -- 2: Definition, Nomenclature, and Diagnostic Criteria -- Definition -- Nomenclature -- Other Terms Used to Describer Digital Ischemia -- Criteria for Classification -- Diagnostic Criteria -- Summary -- References -- 3: Epidemiology of Raynaud's Phenomenon -- Primary RP -- Incidence and Prevalence of Primary RP -- Risk Factors for Primary RP -- Age -- Female Sex -- Low Body Weight -- Environmental Factors -- Genetic Factors for Primary and Secondary RP -- Secondary RP -- Incidence and Prevalence of Secondary RP -- Aetiology of Secondary RP -- Systemic Sclerosis -- Other Autoimmune Diseases -- Other Systemic Diseases -- Neurologic Diseases -- Drugs (Chap. 9) -- Occupational Exposure to Vibration (Chap. 9) -- Risk and Prognostic Factors for Progression to Systemic Disease -- RP as Risk Factor for Digital Ischemia, Gangrene, and Auto-Amputation -- RP as Risk Factor for Other Organ Manifestations -- Function, Morbidity, and Mortality -- Expert Opinion -- References -- 4: The Normal Structure and Function of the Cutaneous Vascular System -- General Aspects of Vascular Systems -- Specialization of the Cutaneous Circulation -- Cold-

Induced Cutaneous Constriction -- Responses to Cooling -- Mechanisms Responsible for Cooling-Induced Constriction -- Transient Receptor Potential Channels and Efferent Pathways Responsible for Cooling-Induced Constriction -- Cooling-Induced Cutaneous Vasodilatation -- Thermogenesis -- Gender-Dependent Changes in Cold-Induced Vasoconstriction -- Expert Opinion: Some Missing Links -- References.

5: A Mechanistic Approach to Understanding and Preventing the Vasculopathy of Raynaud's Phenomenon -- Mechanisms Underlying Increased Cold-Induced Vasoconstriction in RP -- Sympathetic Adrenergic Activity -- Endothelial Dilator Function -- Thermogenesis -- The Color Changes of PRP -- Mechanisms Responsible for the Functional and Structural Changes in the SSc Microvasculature -- Assessing Blood Flow in RP and SSc -- New Approaches to Treating the Vasculopathy of RP -- Countering RP Vasospasm -- Countering the SSc Vasculopathy -- References -- 6: Practical Approach to the Patient with Raynaud's Phenomenon: Primary Versus Secondary Raynaud's Phenomenon -- Introduction -- Case History -- Diagnosis of RP: Primary Versus Secondary RP -- History -- Examination -- Investigations -- Assessment of Severity of RP -- History -- Examination -- Investigations -- Management of RP -- Patient Education/General Measures -- Drug Treatment -- Surgical Treatment -- Transition from Primary to Secondary RP -- Expert Opinion -- References -- 7: Raynaud's Phenomenon in the Pediatric Age -- Introduction -- Epidemiology Including Secondary Causes -- Clinical Features -- History -- Examination -- Investigations -- Nailfold Capillaroscopy in Children -- Other Imaging Techniques -- Clinical Cases -- Case 1 -- Case 2 -- Predictors of Progression to CTD -- Differential Diagnosis -- Cervical Ribs -- Management -- General Measures -- Pharmacological Measures -- Expert Opinion -- References -- 8: Secondary Raynaud's Phenomenon: Focus on Rheumatic Diseases -- Introduction -- Individual Conditions Associated with Secondary RP -- Systemic Sclerosis (Scleroderma -- SSc) -- Systemic Lupus Erythematosus (SLE) -- Idiopathic Inflammatory Myopathy (IIM) -- Mixed Connective Tissue Disease (MCTD) -- Sjögren's Syndrome -- Rheumatoid Arthritis -- Undifferentiated Connective Tissue Disease (UCTD).

COVID-19 -- Other Causes of Secondary RP: Vasculitis, Behcet's Syndrome, Thromboangiitis Obliterans, Antiphospholipid Syndrome (See Also Chap. 10) -- Vasculitis -- Behcet's Syndrome -- Thromboangiitis Obliterans -- Antiphospholipid Syndrome -- Management Principles -- Supportive Measures -- Combination Vasodilator Therapy -- Role for Surgical Intervention (See Chap. 20) -- Management of Vascular Co-morbidity -- Expert Opinion -- References -- 9: Other Secondary Causes -- Introduction -- Carpal Tunnel -- Introduction -- The Association Between Idiopathic Carpal Tunnel Syndrome and Raynaud's Phenomenon -- Carpal Tunnel Syndrome Secondary to Systemic Sclerosis -- Expert Opinion -- Drug and Toxins -- Introduction -- Immunosuppressive Agents -- Cyclosporine A -- Interferons -- Chemotherapeutic Agents -- Bleomycin, Vinblastine, Cisplatin and Other Agents -- Drugs Used in the Treatment of Hypertension -- Beta-Blockers -- Clonidine -- Drugs Used in the Treatment of Anxiety and Headache Syndromes, and Amphetamines -- Ergots -- Methysergide -- Drugs Targeting Calcitonin Gene-Related Peptide -- CNS Stimulants Used to Treat ADHD -- Toxins (Including Occupational Exposure) -- Cocaine and Cannabis -- Vinyl Chloride -- Expert Opinion -- Metabolic -- Introduction --

Thyroid Disorders -- Neuroendocrine Tumours: Carcinoid

and Pheochromocytoma -- POEMS Syndrome -- Expert Opinion -- Haematological -- Abnormal Cellular Components -- Polycythaemia and Thrombocythaemia -- Polycythaemia and Thrombocythaemia Due to Myeloproliferative Neoplasms -- Abnormal Blood Components -- Paraproteinaemia -- Cryoglobulins -- Cryofibrinogenaemia -- Cold Agglutinin Disease -- Coagulopathy -- Inherited Thrombophilias -- Expert Opinion -- Malignancy -- Solid Tumours -- Leukaemia, Lymphoma and Others -- Paraneoplastic Raynaud's Phenomenon and Digital Ischaemia.

Raynaud's Phenomenon Secondary to Localised Radiotherapy -- Expert Opinion -- Trauma -- Vibration Exposure -- Mechanical Percussive Injury, Palmar Trauma and the Hypothenar Hammer Syndrome -- Expert Opinion -- Conclusion -- References -- 10: Raynaud's Mimics -- Acrocyanosis -- Primary Pernio/Chilblains -- Chilblain Lupus -- Cold Hypersensitivity of the Hands and Feet -- Cold Injuries: Frostbite and Nonfreezing Cold Injury -- Thromboangiitis Obliterans (Buerger Disease) -- Livedo Reticularis and Racemosa -- Description -- Erythromelalgia -- Description -- Thoracic Outlet Syndrome -- Etiology -- Arterial or Venous TOS -- Management -- Neurogenic TOS -- Venous TOS -- Arterial TOS -- Complex Regional Pain Syndrome (CRPS) -- Description -- Etiology -- Evidence That CRPS Presents at Raynaud's -- Diagnosis -- Management -- References -- 11: Systemic Vasospasm -- Introduction -- Systemic Vasospasm in Systemic Sclerosis -- Coronary Perfusion -- Renal Vascular Bed and Scleroderma Renal Crisis -- Pulmonary Artery Vasospasm as a Contributor to Pulmonary Hypertension -- Vasospasm in Other Vascular Beds -- Scleroderma and Pregnancy -- Coexistence of Disorders of Abnormal Vascular Reactivity -- Migraine and Raynaud -- Migraines as a Disorder of Vasoreactivity? -- Vasospastic and Microvascular Angina -- Expert Opinion -- References -- 12: Nailfold Capillaroscopy -- Introduction -- Capillaroscopy: From the Beginning Up to Now -- Nailfold Capillaroscopy: Methods -- What Is Nailfold Capillary Microscopy (Capillaroscopy)? -- How to Perform Capillaroscopy -- Techniques: Devices for Daily Clinical Practice and Research Setting -- Number of Fingers to be Studied -- Interpretation -- EULAR and SCTC Consensus-Based Description and Interpretation of Capillaroscopy -- Qualitative Assessment -- (Semi)-Quantitative Assessment. Investigation of a Patient with RP: Role of Capillaroscopy -- Early Distinction Between a Primary and Secondary RP Due to SSc -- What Is Normal in Primary RP? -- What Are Pathognomonic Abnormalities in Patients with RP Due to SSc? -- The Fast Track Algorithm: A Fast Simple and Reliable Algorithm to Distinguish a "Scleroderma-Pattern" from a "Non-scleroderma" Pattern -- What Capillaroscopic Images Do We Find in Patients with RP and CTD Other Than SSc and Scleroderma Spectrum Diseases? -- "Early" Diagnosis of SSc -- How Often Should Capillaroscopy Be Performed in a Patient with RP? -- Relationship Between Altered Peripheral Blood Flow and Altered Capillaroscopy in Secondary RP -- Expert Opinion -- Conclusion -- References -- 13: Autoantibodies in Raynaud's Phenomenon -- Introduction -- Methods of Autoantibody Detection -- Indirect Immunofluorescence -- Enzyme Linked Immunosorbent Assay -- Immunoblotting -- Immunoprecipitation -- Autoantibodies and Raynaud's Phenomenon Associated with Autoimmune Rheumatic Disease -- Systemic Sclerosis -- Mixed Connective Tissue Disease -- Myositis -- Systemic Lupus Erythematosus -- Primary Sjogren's Syndrome -- Vasculitis -- Antiphospholipid Syndrome -- Interstitial Pneumonia with Autoimmune Features -- Autoantibodies in the Pathogenesis of Raynaud's -- Evidence of Direct Pathogenicity -- Other Autoantibodies with Potential

Pathogenic Function -- Conclusion -- Expert Opinion -- References --
14: Angiography -- Dynamic Versus Static Arterial Lesion -- Evaluating
the Raynaud's Phenomenon Patient -- Patients with RP Secondary
to a Connective Tissue Disease -- Angiography -- Digital Subtraction
Angiography -- Complications of DSA -- Magnetic Resonance
Angiography (MRA) -- Computerized Tomography Angiography (CTA)
-- Expert Opinion -- References -- 15: Laboratory Assessment
of Raynaud's Phenomenon -- Introduction.
Considerations When Undertaking Vascular Imaging Studies.
