

1. Record Nr.	UNINA9910130582903321
Titolo	Giornate europee della Facolta di economia [[electronic resource]] : atti del convegno Giornate europee della Facolta di economia per il 50. anniversario dei trattati di Roma ed il centenario di Altiero Spinelli, Roma, 24-25 maggio 2007 // a cura di Donatella Strangio
Pubbl/distr/stampa	Roma, : Universita La Sapienza, 2009
Descrizione fisica	133 p. : ill. (chiefly col.)
Collana	Convegni ; ; 11
Altri autori (Persone)	StrangioDonatella
Disciplina	327
Lingua di pubblicazione	Italiano
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Proceedings. A. Spinelli (1907-1986), politician.
Nota di bibliografia	Includes bibliographical references.
Nota di contenuto	(http://www.ilibri.casalini.it/toc/09744916.pdf)

2. Record Nr.	UNINA9910855380803321
Autore	Lacarbonara Walter
Titolo	Advances in Nonlinear Dynamics, Volume III : Proceedings of the Third International Nonlinear Dynamics Conference (NODYCON 2023) // edited by Walter Lacarbonara
Pubbl/distr/stampa	Cham : , : Springer Nature Switzerland : , : Imprint : Springer, , 2024
ISBN	9783031506352 3031506359
Edizione	[1st ed. 2024.]
Descrizione fisica	1 online resource (649 pages)
Collana	NODYCON Conference Proceedings Series, , 2730-7697
Disciplina	531
Soggetti	Plasma waves Multibody systems Vibration Mechanics, Applied Dynamics Nonlinear theories System theory Waves, instabilities and nonlinear plasma dynamics Multibody Systems and Mechanical Vibrations Applied Dynamical Systems Complex Systems Engineering Mechanics
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Nota di contenuto	Intro -- Preface -- Preface for Volume 3: New Trends in Nonlinear Dynamics -- Contents -- Part I MEMS/NEMS -- The intersection of Noise, Amplitude, and Nonlinearity in a High-Q Micromechanical Torsion Pendulum -- 1 Introduction -- 2 Sensitivity of a Torsion Pendulum to Gravity -- 2.1 Parametric Frequency-Gravity Coupling -- 2.2 Thermal Noise -- 2.3 Timing Uncertainty Due to Thermal Noise -- 3 Nonlinear Equation of Motion -- 3.1 Torques Arising from Bifilar Effect -- 3.2 Torques Arising from Midplane Stretching -- 3.3 Free Oscillations Without Damping -- 4 Analytical Approximation for

Frequency-Amplitude Coupling -- 4.1 Parametric Frequency Noise -- 5
Comparison of Analytical Results and Simulations -- 6 Conclusions --
References -- A Comparative Study of Two Types of Bifurcation-Based
MEMS Sensors -- 1 Introduction -- 2 Sensor -- 2.1 Design -- 2.2
Modal Analysis -- 2.3 Functionalization -- 2.4 Bifurcations -- 3
Experiment -- 4 Results and Discussion -- 5 Conclusions --
References -- How to Excite Anti-symmetric Modes in a Symmetric
MEMS? -- 1 Introduction -- 2 MEMS Resonator and Experimental Set-
Up -- 3 MEMS Characterization -- 4 Symmetric-Anti-symmetric Modal
Interaction -- 5 Conclusions -- References -- Control of an
Electrostatically Actuated Micro Portal Frame with 2:1 Internal
Resonance Subjected to Damping Disturbances -- 1 Introduction -- 2
The Micro Portal Frame Resonator -- 2.1 Design and Fabrication -- 2.2
Equations of Motion -- 2.3 Experimental Setup and Characterization --
2.4 The Linear Quadratic Regulator (LQR) Control -- 3 Results and
Discussion -- 3.1 Characterization and Experimental Data -- 3.2 Air-
Damping Conditions Versus Saturation Phenomenon -- 4 Conclusions
-- References -- Vibration Mitigation by Two Parametric Anti-
resonances in High-Q Resonators: A Preliminary Case Study -- 1
Introduction -- 2 Problem Description.
3 Parametric Anti-resonance Analysis -- 4 Pulsed Parametric Excitation
-- 5 Conclusions -- References -- Part II Chaotic Systems and
Uncertainty -- Self-supervised Contrastive Learning for Chaotic Time-
Series Classification -- 1 Introduction -- 2 TS-TCC Framework,
Dynamical System, and Decomposition Algorithm -- 2.1 Machine
Learning Methods Applied and the TS-TCC Framework -- 2.2
Dynamical System and Time-Series Data -- 2.3 Training Data -- 2.4
Decomposition Algorithm -- 2.5 Training Setup -- 3 The Results -- 4
Conclusions -- References -- Comprehensive Study of Electrical Power
Grid Stability Issues Using Bifurcation and Chaos Theory -- 1
Introduction -- 2 Mathematical Models and Results Discussion -- 2.1
Voltage Collapse Phenomenon (VC) -- 2.2 Subsynchronous Resonance
Phenomenon (SSR) -- 3 Conclusions -- References -- Multi-
dimensional Nonlinearity Time Series Forecasting Based on Multi-
reservoir Echo State Network -- 1 Introduction -- 2 Echo State Network
-- 3 Methods -- 4 Experiment and Analysis -- 4.1 One-Dimensional
Nonlinear System Prediction -- 4.2 Multidimensional Nonlinear System
Prediction -- 5 Conclusion -- References -- Time-Periodic Perturbation
Leading to Chaos in a Planar Memristor Oscillator Having a Bogdanov-
Takens Bifurcation -- 1 Introduction -- 2 Linear Analysis and
Bifurcations of System (1) -- 3 Time-Periodic Perturbation of System (1)
-- 4 Multistability in System (3) -- References -- Structural Reliability
Analysis Based on the Dynamic Integrity of an Attractor: Part I -- 1
Introduction -- 1.1 Determination of the Buckling Strength of a
Structure: A Historical Perspective -- 1.2 Integrity Measures and
Erosion Profiles -- 2 Statistical Properties and Probability Density
Functions of Input and Output -- 2.1 A Simplified Procedure to Evaluate
the Dynamic Integrity Statistical Properties.
2.2 A Formal Procedure to Evaluate the Dynamic Integrity Statistical
Properties -- 3 Application to an Archetypal Model -- 4 Concluding
Remarks -- References -- Untitled -- Chaotic Dynamic Induced by PI
Control in Offshore Oil Production Plants -- 1 Introduction -- 2
Mathematical Modelling -- 2.1 PI Controller -- 3 Results -- 3.1 Open-
Loop Responses in a Gas-Lift Well -- 3.2 PI Control Dynamics in a Gas-
Lift Well -- 3.3 Induced Chaotic Behavior -- 4 Conclusions --
References -- The Jerk Dynamics of Lorenz Model -- 1 Introduction --
2 Preliminaries -- 3 Lorenz Model -- 4 Lorenz Jerk System -- 5
Discussion -- References -- Spiral Bevel Gears Nonlinear Dynamics:

Chaotic Response Existence in Multi Degree of Freedom Systems -- List of Symbols -- 1 Introduction -- 2 Dynamic model -- 3 Numerical results -- 4 Conclusion -- References -- Coexistence of Hidden Attractor and Self-Excited Attractors on the Plane -- 1 Introduction -- 2 PWL System in R3 -- 3 Planar System -- 4 Multistability -- 5 Conclusion -- References -- Compact Multiplier-less CORDIC-Based FPGA Implementation of Sine and Modified Sine Chaotic Maps -- 1 Introduction -- 2 Chaotic Maps with Trigonometric Nonlinearities -- 2.1 Sine Map -- 2.2 Modified Sine Map -- 3 Hardware Implementation -- 3.1 CORDIC Algorithm -- 3.2 Hardware Architecture -- 4 Hardware Results -- 5 Conclusion -- References -- Fixed-Time Adaptive Neural Tracking Control for a Helicopter-Like Twin Rotor MIMO System -- 1 Introduction -- 2 Modeling of Twin Rotor MIMO System -- 3 Fixed-Time Adaptive Neural Tracking Control -- 4 Simulation Results -- 5 Conclusion -- References -- A New Key Generator Based on an Auto-Switched Hybrid Chaotic System and Its FPGA Implementation -- 1 Introduction -- 2 Methods -- 2.1 Modeling -- 3 Results and Discussion -- 3.1 Simulation Results -- 3.2 Real-Time FPGA Implementation. 3.3 Visualization of Implantation Results -- 3.4 Statistical Tests -- 4 Conclusion -- References -- Critical Dynamics of Kuramoto Model on Erdős-Rényi Random Graphs -- 1 Introduction -- 2 Analysis -- 3 Numerical Simulation -- 4 Conclusions -- References -- Part III Energy Harvesting -- Numerical Simulations of Energy Harvesting in a Portal Frame Coupled with a Nonlinear Energy Sink -- 1 Introduction -- 2 Mathematical Model -- 2.1 The 0-1 Test Method -- 3 Numerical Simulations -- 3.1 Numerical Analysis of the Influence of the Parameter μ -- 3.2 Numerical Analysis of the Influence of the Parameter e -- 4 Conclusions -- References -- Leveraging 2:1 Parametric Resonance in a Notional Wave Energy Harvester -- 1 Introduction -- 2 Mathematical Model -- 3 Results -- 4 Conclusions -- References -- Experimental Testing of a Bi-stable Point Wave Energy Absorber Under Harmonic Waves -- 1 Introduction -- 2 Experimental Setup -- 3 Results -- 3.1 Description of the B-PWA Motion -- 3.2 Effective Bandwidth -- 4 Conclusion -- References -- Optimization of Energy Harvesting from a Nonlinear Energy Sink -- 1 Introduction -- 2 Tuned Mass Damper-Energy Harvester Model -- 3 Bi-objective Optimization: Pareto Front Generation -- 4 Noisy Nonlinear Energy Sink-Energy Harvester -- 5 Concluding Remarks -- References -- Enhancing Aeroelastic Wind Energy Harvesting Using Quasi-Zero Stiffness -- 1 Introduction -- 2 Design of 2DOF Quasi-Zero Stiffness Galloping Energy Harvester -- 2.1 Conceptual Schematic -- 2.2 Configuration of the Prototype -- 2.3 Modeling -- 3 Results and Discussions -- 4 Conclusions -- References -- Part IV Constitutive and Phenomenological Models -- Stochastic Delay Modeling of Landslide Dynamics -- 1 Introduction -- 2 Applied Methodology -- 3 Results -- 4 Conclusions -- References. A New Methodology for Nonlinear Analysis of Magneto-Rheological Elastomers Behavior Under Large Amplitude Oscillatory Axial (LAOA) Loadings -- 1 Introduction -- 2 Material and Method -- 2.1 Sample -- 2.2 Dynamic Axial Test Bench -- 3 Methodology -- 3.1 Stress-Strain Hysteresis Response -- 3.2 Quantification of Nonlinear Response -- 4 Conclusion -- References -- Magneto-Dynamic Characterization of a Silicone Filament Embedded with Magnetic Composite Microspheres -- 1 Introduction -- 2 Fabrication and Test Setup -- 3 Results and Discussion -- 4 Conclusion -- References -- Modeling Asymmetric Hysteresis: Continuous Development Using Experimental Data -- 1 Introduction -- 2 Experimental Setup -- 3 Extended Masing Model for Symmetric Hysteresis -- 4 Generalizing Extended Masing Model for Asymmetric Hysteresis -- 5 Concluding Remarks -- References --

Preliminary Results on the Simulation of Pressurized Sand Dampers by Using the Vaiana-Rosati Model -- 1 Introduction -- 2 Pressurized Sand Damper -- 2.1 Properties of the Tested Device -- 2.2 Experimental Hysteretic Behavior -- 3 Vaiana-Rosati Model -- 3.1 Rate-Independent Hysteretic Force -- 3.2 Rate-Independent Hysteretic Work -- 3.3 Rate-Independent Hysteretic Work Associated with a Single Loop -- 3.4 Parameter Sensitivity Analysis -- 4 Simulation of Experimental Hysteresis Loops -- 5 Conclusions -- References -- Modified Bouc-Wen Model with Damage and Flexibility Increase for the Dynamic Analysis of Masonry Walls -- 1 Introduction -- 2 Bouc-Wen Hysteresis with Damage and Flexibility Increase -- 3 Macroelement Dynamic Formulation -- 4 Results and Discussion -- 5 Conclusions -- References -- Constrained Green's Function for a Beam with Arbitrary Spring and Nonlinear Spring Foundation -- 1 Introduction -- 2 Solution of Green Function with Arbitrary Spring -- 2.1 Control Equation with Spring Beam.

2.2 Green's Functions for Steady-State Dynamic Problems.

Sommario/riassunto

This volume presents the state-of-the-art insights into emerging research streams across various multidisciplinary domains, including Chaos and applications: resonance phenomena, chaos in circuits, circuits with memristors, cryptography Smart materials, metamaterials, composite and nanocomposite materials. Nonlinear system identification Uncertainty and stochasticity Nonlinear materials and systems: wire ropes, magneto-rheological elastomers, hysteresis Micro-electromechanical systems Energy harvesting Nonlinear wave propagation in discrete and continuous media Biological and ecosystem dynamic models, prediction and control Fractional order systems.
