Sommario/riassunto

This book systematizes the latest findings on the clinical, psychological, and pedagogical features of today's children with special educational needs (SEN) and expands the scientific understanding that characterizes such children. The book develops a system of education and assistance for children with SEN, including children with locomotor disabilities, intellectual disabilities, autism spectrum disorders, and hearing and visual impairments. The book is intended for heads of educational authorities, parents, specialists working with children with special educational needs, psychologists, teachers, methodologists, specialists in the field of inclusive education, and students and teachers in special education of pedagogical and psychological departments of higher education institutions.
