

1. Record Nr.	UNINA9910855398603321
Autore	Maharjan Niroj
Titolo	Proceedings of the 3rd International Conference on Advanced Surface Enhancement (INCASE) 2023 : Surface Engineering for Sustainability
Pubbl/distr/stampa	Singapore : , : Springer, , 2024 ©2024
ISBN	981-9986-43-5
Edizione	[1st ed.]
Descrizione fisica	1 online resource (418 pages)
Collana	Lecture Notes in Mechanical Engineering Series
Altri autori (Persone)	HeWei
Disciplina	620.44
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Nota di contenuto	Intro -- Contents -- Advanced Techniques for Surface Engineering Towards Enhanced Performance -- Rotating Bending High Cycle Fatigue Property of Handheld Laser Peened A7075BE-T6511 Alloy -- 1 Introduction -- 2 Experimental Methods -- 2.1 Material -- 2.2 Specimen and Fatigue Test -- 3 Experimental Results and Discussion -- 3.1 Fatigue Results -- 3.2 Peening Effect and Fracture Mechanism -- 4 Conclusion -- References -- Developing Domeless, Circular Vibratory Finishing for Aerospace Applications -- 1 Introduction -- 2 Theoretical Analysis Methodology -- 2.1 Comparison to Dome, Circular Vibratory Finishing -- 3 Theoretical Comparison Results -- 4 Discussion -- 5 Conclusion -- References -- Improvement of Fatigue Strength of 3D-Metal by Combined Process of Blasting and Cavitation Peening -- 1 Introduction -- 2 Experimental Apparatus and Procedures -- 3 Results -- 4 Conclusions -- References -- Laser Shock Peening at Oblique Angles -- 1 Introduction -- 2 Methodology -- 2.1 Material Used -- 2.2 Laser Shock Peening -- 2.3 Post Characterization -- 3 Results -- 3.1 Single Spot Study -- 3.2 Area Peening -- 4 Discussion -- 5 Conclusions -- References -- Surface Enhancements from Peening Effect on Inconel 718 Fabricated by Direct Energy Deposition -- 1 Introduction -- 2 Methods -- 2.1 Laser with Hammer Peening -- 2.2 Materials Characterisation -- 3 Results and Discussion -- 4 Conclusion -- References -- Picosecond Laser Surface Texturing of Al2024-T3 Substrate for Super-Hydrophobicity -- 1 Introduction -- 2

Experimental -- 3 Results and Discussion -- 4 Conclusion --
References -- Hybrid Ultrasonic Cavitation Abrasive Peening
and Electrochemical Polishing on Additively Manufactured AlSi10Mg
Components -- 1 Introduction -- 2 Methods -- 2.1 Work Material --
2.2 Hybrid UCAP-ECP Setup -- 2.3 Material Characterisation -- 3
Results -- 3.1 Surface Quality.
4 Discussion -- 5 Conclusion -- References -- New Electronic Peening
Intensity Sensor: Effect of Impingement Angle -- 1 Introduction -- 2
Theoretical Equations for Impingement Angle -- 3 Experiment Setup
and Results -- 4 Media Collisions at Different Angles and Media Flow
Rates -- 5 Conclusion -- References -- Hydrophobic Surface of HVOF
Sprayed Tungsten Carbide Based Coating -- 1 Introduction -- 2
Methods -- 2.1 Powder Material -- 2.2 HVOF Spray Process -- 2.3
Coating Characterisation -- 3 Results and Discussion -- 3.1 Powder
Analysis -- 3.2 As-Sprayed Coating Analysis -- 3.3 Water Contact
Angle Analysis -- 4 Conclusion -- References -- Effect of Laser
Peening on Surface Morphology and Deformation Level of Additively
Manufactured 316L Stainless Steel -- 1 Introduction -- 2 Materials
and Methods -- 3 Results and Discussion -- 3.1 Surface Morphology
-- 3.2 Microstructure -- 4 Conclusion -- References --
Complementary Effect of Metal Shot Peening Over Deep Cold Rolled Ti-
6Al-4 V Surface as a Two-Step Mechanical Surface Treatment -- 1
Introduction -- 2 Methodology -- 3 Results and Discussion -- 3.1
Surface Hardness -- 3.2 Surface Roughness -- 3.3 Compressive
Residual Stress -- 4 Conclusion -- References -- Femtosecond Laser
Interference Micro-patterning on Mold Surface to Improve
Hydrophobicity for Microfluid Applications -- 1 Introduction -- 2
Experimental Setup -- 3 Results and Discussion -- 4 Conclusions --
References -- Investigation of Shot Peening on Residual Stress
Distribution in Common Aerospace Materials -- 1 Introduction -- 2
Methodology -- 2.1 Material Preparation -- 2.2 Shot Peening -- 2.3
Material Characterisation -- 3 Results and Discussion -- 3.1 Surface
Hardness and Surface Roughness -- 3.2 Cross-Sectional Hardness --
3.3 Residual Stress -- 4 Conclusion -- References.
Construction of a Controllable Hydrophobic and Hydrophilic Shot
Blasting Technique for Aluminum -- 1 Introduction -- 2 Experimental
Procedure -- 3 Result and Discussion -- 3.1 Wettability of Shot-Blasted
Specimens -- 3.2 Surface Roughness Measurement Results -- 4
Conclusions -- References -- Recent Development of Low Damage
Laser Microprocessing on Surface and Subsurface Treatment of Silicon
for Industrial Applications -- 1 Introduction -- 2 Laser Microprocessing
of Silicon Materials -- 3 Subsurface Repairing -- 4 Surface Property
Enhancement -- 5 Conclusion and Outlook -- References --
Electrochemical Polishing of Ti-6Al-4V 3D Printed Internal Channels
with Customized Functionalized Cathode Using HF and Perchlorate Free
Electrolyte -- 1 Introduction -- 1.1 Background and Problem Statement
-- 1.2 State of the Art for Internal Surface Finishing -- 1.3 Application
of Electrochemical Polishing for Ti-6Al-4 V -- 2 Methodology -- 2.1
AM Workpiece -- 2.2 Electrochemical Experimental Setup -- 3 Results
and Discussion -- 3.1 Polarisation Curve (I-V) Through Linear Sweep
Voltammetry -- 3.2 Selective Region Polishing -- 4 Conclusion --
References -- Effect of Laser Shock Peening on Fatigue Performance
of Fracturing Pump -- 1 Introduction -- 2 Material and Methods -- 2.1
Material and Sample -- 2.2 LSP Experiments -- 2.3 Residual Stress
Characterization -- 2.4 Fatigue Test and Fracture Morphology
Observation -- 2.5 Finite Element Modeling -- 3 Results
and Discussion -- 3.1 Residual Stress and Fatigue Performance
of Specimen -- 3.2 LSP Region Identification of Pump -- 3.3 Fatigue

Performance of Pump -- 4 Conclusions -- References -- Effect of Plasma Electrolytic Polishing Technology on Stainless Steel Surface Composition and Cr/Fe -- 1 Introduction -- 2 Methods -- 3 Results and Discussion -- 4 Conclusion -- References.

Characteristics of Residual Stress Profiles in Spring Steel Induced by Stress Rolling -- 1 Introduction -- 2 Basics -- 2.1 Deep Rolling -- 2.2 Stress Peening -- 2.3 Stress Rolling -- 3 Experimental Setup -- 3.1 Specimen -- 3.2 Rolling -- 3.3 X-Ray Determination -- 4 Results -- 4.1 Baseline-Normal Rolling -- 4.2 Stress Rolling -- 4.3 Analysis -- 5 Conclusions -- References -- Control of Residual Stress by Cutting Condition on the Surface of Aluminum and Steel -- 1 Introduction -- 2 Specimen -- 3 Equipment -- 4 Processing Conditions -- 5 Results and Discussion -- 6 Summary -- References -- Microstructure and Magnetic Properties of Non-oriented Electromagnetic Steel Sheets by Burnishing Method -- 1 Introduction -- 2 Experimental Method and Evaluation Method -- 3 Result -- 4 Conclusion -- History of Laser Peening Without Coating (LPwC): From Invention to Future Developments -- 1 Introduction -- 2 Development of Mobile LPwC System -- 3 Handheld Laser Development -- 4 Conclusions -- References -- Surface and Sub-surface Characterisation (In-Situ and Ex-Situ) -- Corrosion Surface Morphology of 13Cr Steel in the Boiler Water Containing Chloride Ions and Formic Acid -- 1 Introduction -- 2 Methods -- 3 Results and Discussion -- 4 Conclusion -- References -- Elucidation of Fatigue Fracture Mechanism on Glass-Fiber-Reinforced-Plastics -- 1 Introduction -- 2 Experimental Procedures -- 2.1 Type-A Specimen (Multiple Layer: Skin-core-Skin Layer) -- 2.2 Type-B Specimen (Single Layer) -- 2.3 Fatigue Tests -- 3 Experimental Results -- 3.1 Fatigue Tests Results for Type-A Specimen -- 3.2 Tracking Fatigue Initiation and Propagation -- 3.3 Discussion Based on Shear-Lag Model -- 4 Conclusions -- References -- On Porosity and Its Mitigation and Closure in Additively Manufactured Alloys -- 1 Introduction -- 2 Origin and Effect of Porous Structures in AM Alloy.

3 Porosity Mitigation and Closure in AM Alloy -- 4 Conclusion and Outlook -- References -- Effect of Plasma Electrolytic Oxidation on the Fatigue Strength of Al Alloys: Mechanistic Understanding from Surface and Sub-Surface Characterizations -- 1 Introduction -- 2 Methods -- 3 Results and Discussion -- 4 Conclusion -- References -- Effect of Heat Treatment on the Residual Stress and Mechanical Properties of an Additively Manufactured High Strength Aluminum Alloy -- 1 Introduction -- 2 Methodology -- 3 Results and Discussion -- 4 Summary -- References -- Blanked Surface Characteristics of Amorphous Alloys with Local Microstructure Modification by Ultrashort Pulsed Laser -- 1 Introduction -- 2 Methods -- 3 Results and Discussion -- 4 Conclusions -- References -- Exploring the Effects of Prolonged Vibratory Polishing on Shot Peened Ti-64 -- 1 Introduction -- 2 Experimental and Research Methodology -- 3 Results and Discussions -- 3.1 Residual Stress and Cold Work -- 4 Conclusions and Outlook -- References -- Simulation and Modelling of Surface Integrity -- Advancing Plating Efficiency with Simulation Technology -- 1 Introduction -- 1.1 Plating Efficiency as Key Element for Increased Sustainability in Electroplating -- 1.2 Simulation Technology for Electroplating -- 2 Using Simulation Technology for Improving Plating Efficiency -- 2.1 Starting Points and Requirements -- 2.2 Typical Workflow -- 3 Case Study-Effect of Current Thief in Hard Chromium Plating -- 3.1 Introducing the Part and Its Plating -- 3.2 Starting Point-Initial Situation -- 3.3 Optimization of the Current Density Distribution -- 3.4 Final Result -- 4 Summary -- References --

Numerical Simulation of Particle Transport from Dispenser to Target
in Micro-Shot Peening Applications -- 1 Introduction -- 2 Numerical
Model -- 3 Results and Discussion -- 4 Conclusion -- References.
Numerical Study of Stream Finishing of a Fairway Golf Club.
