

1. Record Nr.	UNINA9910855399403321
Autore	Janmanee Pichai
Titolo	Advanced in Creative Technology- Added Value Innovations in Engineering, Materials and Manufacturing : Proceedings of the 11th International Conference on Creative Technology ICCT 2023
Pubbl/distr/stampa	Cham : , : Springer International Publishing AG, , 2024 ©2024
ISBN	3-031-59164-X
Edizione	[1st ed.]
Descrizione fisica	1 online resource (435 pages)
Collana	Lecture Notes in Networks and Systems Series ; ; v.979
Altri autori (Persone)	ChujarjeenSaichol ButdeeSuthep SrikhumsukPhatchani BatakoAndre D. L BurdukAnna XaviorM. Anthony
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Nota di contenuto	Intro -- Preface -- Organization -- Contents -- Advances in Materials and Manufacturing -- Preparation and Creation of Interlocking Concrete Block Bricks by Using Tempered Glass Leftovers -- 1 Introduction -- 2 Materials and Methods -- 3 Results and Discussions -- 4 Conclusions -- References -- Optimum Blade Geometry C-9015A to Reduce Blade Erosion -- 1 Introduction -- 2 Energy Analysis Equations -- 3 Conclusion -- References -- The Study to Optimum Parameters for Surface Roughness (Ra) Using Ballnose Cutting Tools in SKT4 Steel Forging -- 1 Introduction -- 2 Experimental -- 2.1 Machine and Materials -- 2.2 Procedure -- 3 Results and Discussion -- 4 Conclusions -- References -- Numerical Investigation of Thermal Performance for Pulsating Flow in a Microchannel Heat Sink Filled with MXene Fluid -- 1 Introduction -- 2 Methodology -- 3 Results and Discussion -- 3.1 Velocity Analysis -- 3.2 Pressure Contour Analysis -- 3.3 Temperature Contour Analysis -- 3.4 Nusselt Number Analysis -- 3.5 Pressure at Inlet Analysis -- 3.6 Maximum Temperature

Analysis -- 4 Conclusion -- References -- Optimization
of a Sustainable Wheel for Enhanced Vehicle Maneuverability and Power
Generation -- 1 Introduction -- 2 Methodology -- 2.1 Conceiving
the Model -- 2.2 Selection of Materials -- 3 Free Body Diagram -- 4
Finite Element Analysis -- 5 Topology Optimization -- 6 Results
and Discussion -- 6.1 Meshing -- 6.2 Stress Analysis -- 6.3 Modified
Rim Structure -- 7 Conclusions -- References -- Comparative Study
of Mechanical Properties for Steel S50C by Induction Heating
Application -- 1 Introduction -- 1.1 The Heat Treatment is as Follows
-- 2 Experimental Results -- 3 Conclusion -- References -- Semi-
automatic Charcoal Mixer and Compression -- 1 Introduction -- 2
Experiment -- 2.1 Materials -- 2.2 Semi-automatic Charcoal Briquette
Mixing and Compression Machine.
3 Experimental Method -- 3.1 Properties of Charcoal Powder -- 3.2
Moisture Content -- 3.3 Mixer Performance -- 3.4 Mixer Performance
-- 3.5 Compression -- 3.6 Specific Energy Consumption Compression
-- 3.7 Properties of Charcoal Briquettes -- 4 Results and Discussion --
4.1 Density -- 4.2 Moisture Content -- 4.3 Mixer Performance -- 4.4
Specific Energy Consumption Mixing -- 4.5 Compression -- 4.6
Specific Energy Consumption Compression -- 4.7 Properties
of Charcoal Briquettes -- 5 Conclusions -- References -- The Effect
of Pore Size on Thermal Stress Distribution in Metal Porous Structures
-- 1 Introduction -- 2 Finite Element Analysis -- 2.1 FEM Model -- 2.2
Materials Properties -- 2.3 Boundary Conditions -- 3 Result
and Discussion -- 4 Conclusions -- References -- A Study on Surface
Modification of $\text{LM6Al}_2\text{O}_3$ Metal Matrix Composites -- 1 Introduction
-- 2 Materials -- 2.1 Reasons for Choosing LM6 -- 2.2 Reasons
for Choosing Al_2O_3 -- 3 Experimental Procedure -- 3.1 Ball Milling --
3.2 Compaction -- 3.3 Sintering -- 3.4 Nitriding -- 3.5 After Nitriding
of the Sintered Material, the Samples were Tested Using Various Tests.
Tensile Test -- 3.6 Compressive Test -- 3.7 Shear Test -- 3.8 Wear
Test -- 4 Results and Discussions -- 4.1 Density Evaluation -- 4.2
Hardness Evaluation -- 4.3 Effect of Surface Modification Time -- 4.4
Compressive Strength Evaluation -- 4.5 Tensile Strength Evaluation --
4.6 Shear Strength Evaluation -- 4.7 Wear Analysis -- 4.8 Powder
Morphology -- 5 Conclusions -- References -- Vibration Analysis
for Real-Time Tool Wear Detection in Turning Processes -- 1
Introduction -- 2 Experiment Implementation -- 2.1 Instrumentation
and Equipment -- 2.2 G Code Programming -- 2.3 Design Running
Path (Cutting Tool Path Design) -- 2.4 Signal Processing for Tool Wear
Analysis -- 3 Results -- 4 Conclusion -- References.
Mechanical Characterization of HDPE Raw Material to Improve
the Quality of Edible Oil Container Cans -- 1 Introduction -- 2
Materials and Method -- 2.1 Characterization Equipments -- 2.2
Method -- 3 Results and Discussion -- 4 Conclusion -- References --
An Investigation into Hohenheim Solar Tunnel for Drying Maize in Sub-
Saharan Climate -- 1 Introduction -- 2 Geographical and Climatic
Conditions -- 3 Design, Construction and Set up of the Hohenheim
Solar Tunnel Dyer -- 4 Experimental Approach -- 4.1 Initial Calibration
-- 4.2 Measurement of Temperature and Humidity Inside and Outside
De Tunnel Dryer -- 4.3 Determination of Moisture Content of Dried
Maize -- 5 Results and Discussions -- 5.1 System and Process
Characteristics -- 6 Conclusion -- References -- Vibratory Processing
of Hard-to-Cut Aerospace Material -- 1 Introduction -- 2 Experimental
Procedures -- 2.1 Methodology -- 2.2 Experiment Set Up -- 3 Results
and Discussion -- 4 Conclusion -- References -- Nature Materials
Packing Design for Food Container Using the Leaf Sheaf Banana Tree --
1 Introduction -- 2 Literature Reviews -- 3 Result Discussions -- 4

Implementation and Data Analysis -- 5 Results and Discussion -- 6 Conclusions -- References -- Simulation, Automation, Optimization of Production Processes -- Batik Modification of Radiator Cover by Using Reverse Engineering Technique -- 1 Introduction -- 2 Methodology -- 2.1 Scanning Process -- 2.2 Re-drawing Process -- 2.3 Modification Process -- 2.4 Prototyping Process -- 3 Scanning Process -- 4 Re-drawing Process -- 5 Modification Process -- 6 Prototyping Process -- 7 Conclusion -- References -- Customer's Intention to Continue Using Online Food Delivery After Covid19: The Sustainable Trend in Thailand -- 1 Introduction -- 2 Research Gap and Research Objective -- 3 Literature Review and Theoretical Conceptual Framework.

4 Hypothesis and Conceptual Framework -- 5 Research Methodology -- 6 Results -- 7 Hypothesis Results -- 8 Conclusions -- 9 Limitations and Future Research -- References -- Predicting the Various Responses in EDM of Ti6Al4V Using Deep Neural Network -- 1 Introduction -- 2 Materials and Methods -- 2.1 Design of Experiment Based on Taguchi Method -- 2.2 Discussion of Experiment Results -- 3 Deep Neural Network (DNN) -- 3.1 Data Sets -- 3.2 Performance Evaluation -- 3.3 Parameters Selection for System Training -- 3.4 Results and Discussion -- 4 Conclusions -- References -- Optimization Modeling Parameters for Industrial AMR Slippage Using ANFIS System in Dynamic Environment -- 1 Introduction -- 2 Literature Reviews -- 3 Methodology -- 4 Simulation, Results and Discussion -- 5 Conclusions -- References -- Modeling and Experimental Thermal Analysis of Ice Spherical Capsules Thermal Energy Storage -- 1 First Section -- 2 Experiment -- 2.1 Theoretical Analysis -- 2.2 Charging Processes -- 2.3 Determination of the Convective Heat Transfer Coefficient -- 2.4 Discharging Processes -- 3 Experimental Method -- 3.1 Description of the Tank and the Spherical Capsules -- 3.2 Numerical Procedure -- 4 Results and Discussion -- 5 Conclusions -- References -- Developing Molds to Increase the Production Process of Automotive Parts in the Hot Forging Process Using the Finite Element Method -- 1 Introduction -- 2 Material and Method -- 2.1 Hot Forging in Close Die Process -- 2.2 Initial Workpiece Size -- 2.3 Finite Volume Methodology -- 3 Result and Discussion -- 4 Conclusion -- References -- Prediction Temperature for Al 6061 Turning using Neuro Fuzzy System and Experimental Study -- 1 Introduction -- 2 Related Works -- 3 Methodology and Simulation -- 3.1 Define a Variable -- 3.2 Design of Experiment -- 3.3 Neuro-Fuzzy System -- 4 Testing and Verification -- 5 Conclusion.

References -- Production Management, Maintenance, Simulation -- The Comparison of Membership Function in the Fuzzy Analytic Network Process for Prioritization of Factors in Risk Assessment -- 1 Introduction -- 2 Methodology -- 2.1 Analysis to Choose the Best Alternative with ANP Theory -- 2.2 The (Same) Data from the Case Study Were Analyzed with FANP -- 3 Research Process -- 3.1 Collect Information -- 3.2 Comparison Criteria -- 3.3 The Weighted Analysis of Each Element in the ANP Process Uses a Supermatrix -- 3.4 The FANP Method -- 4 Result -- 5 Conclusion -- References -- Task-Based DSM Model for Aircraft Heavy Maintenance Planning -- 1 Introduction -- 2 Research Methodology -- 2.1 Understanding the Current AHM Process -- 2.2 Identifying Relationships Using the Task-Based DSM -- 2.3 Sequencing AHM Tasks -- 2.4 Solving Coupled Blocks -- 2.5 Scheduling AHM Plan -- 3 Task-Based DSM Model and Case Study -- 3.1 Task-Based DSM Model -- 3.2 Case Study -- 4 Conclusion -- References -- Computational Fluid Dynamics Simulation on Blended Wing Body Aircraft Model for Aerodynamics Characteristics -- 1

Introduction -- 2 Methodology -- 3 Result and Discussion -- 3.1 Lift and Drag Analysis -- 3.2 Pressure Distribution Analysis -- 4 Conclusion -- References -- Case-Based Reasoning with Fuzzy Logic Knowledge Acquisition for Adaptive Fastener Die Design on Bi-material Forming -- 1 Introduction -- 2 Previous Works -- 2.1 Case-Based Reasoning and Adaptable Process -- 2.2 Lightweight Design and Bi-material Forming -- 2.3 Cold Heading Process and Deform Simulation -- 3 Methodology -- 3.1 Case-Based Reasoning (CBR) -- 3.2 Fuzzy Logic Model -- 3.3 Bi-material and Lightweight Design -- 3.4 DEFORM Simulation -- 4 Result Discussions -- 5 Conclusion -- References.

Pre-conceptual Study of Advanced Air Mobility in Indonesia Using Model-Based Systems Engineering Development Framework.
