Challenges Still Pending -- -Stories of Old Age: Between Continuity and Change -- -About the Debate Around New Technologies and Old People -- -From Family Structure to Families in Disconcert.
Sommario/riassunto	This book contributes to discussion on the ageing society by addressing the new psycho-social structures of the ageing society, the problematics around family bonds and ties, and the structures of care and protection. Besides that the book sheds light on the new roles of grandparents and new grandparents, and the empowerment and resilience initiatives, thereby providing a broad discussion of what the ageing society implies in psychosocial terms. These issues will be addressed in an interdisciplinary way, but also in an approach that is

also rare, comparing different realities between Europe and Latin America. The [basis of the] English translation of this book from its Spanish original manuscript was done with the help of artificial intelligence. A subsequent human revision of the content was done by the author.
