                        Health Care
                        Nursing
                        Health & Biological Sciences

   Lingua di pubblicazione   Inglese

   Formato   Materiale a stampa

   Livello bibliografico   Monografia

   Note generali   Description based upon print version of record.

   Nota di contenuto   Contents; Foreword; Note from the Editors; 1. Introduction; 2. Information and Nursing Practice; 3. The Nursing Process; 4. Standards, Terminologies, and Nursing Information Systems; 5. Classification Systems in Nursing; 6. Nursing Informatics; 7. Education and Research in Nursing Informatics; 8. References; Appendices

   Sommario/riassunto   This book is directed to practicing and student nurses, health care

professionals invloved in putting information systems in place, and information technology profesionals working in the health sector. Its objective is to provide these health workers with a basic source of facts on the use and implementation of standards in clinical and administrative documentation. A compelling case is made about the importance of appropriately documenting nursing care, in order to facilitate analyses of nursing activities, the provision of quality and evidence-based direct patient care, and promotion of co
