Disciplina	300/.723
Soggetti	Social sciences - Fieldwork
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Sommario/riassunto	<p>This book offers students in the social sciences simply stated, direct guidance in defining problems for research and in organizing and conducting a research program. Confronting philosophical and practical problems, it will serve both graduate and undergraduate students well, providing the former with assistance in preparing their theses and informing the latter on how to develop research papers. Dr. Feldman addresses basic questions about topic selection, interviewing, surveys, documentation, and other research methods. While his emphasis is on comparative research, any student pursuing field research in political science, sociology, anthropology, geography, social psychology, and other branches of the social sciences will find the book helpful. The concentration on data collection, rather than analysis, will make it particularly useful for those undertaking a research project for the first time.</p>
