

1. Record Nr.	UNINA9910861039503321
Autore	Kurchania Rajnish
Titolo	Aurivillius Phase Materials : Exploring Lead-Free Ferroelectrics
Pubbl/distr/stampa	Bristol : , : Institute of Physics Publishing, , 2022 ©2021
ISBN	0-7503-4480-6
Edizione	[1st ed.]
Descrizione fisica	1 online resource (162 pages)
Collana	IOP Series in Emerging Technologies in Optics and Photonics Series
Altri autori (Persone)	SubohiOroosa
Disciplina	548.85
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Nota di contenuto	Intro -- Preface -- Foreword -- Acknowledgement -- Author biographies -- Rajnish Kurchania -- Oroosa Subohi -- Chapter 1 Introduction -- 1.1 General introduction -- 1.2 Materials classification on the basis of symmetry -- 1.3 The basics of ferroelectricity and related phenomenon -- 1.3.1 Dielectric materials -- 1.3.2 Impedance spectroscopy -- 1.3.3 Piezoelectricity -- 1.3.4 Pyroelectricity -- 1.3.5 Ferroelectricity -- 1.4 Classification of ferroelectrics -- 1.4.1 Classification of ferroelectrics based on crystal structure -- 1.4.2 The classification of ferroelectrics based on properties -- 1.5 Aurivillius oxides -- References -- Chapter 2 Odd number layered Aurivillius oxides -- 2.1 Single-layered oxides (m = 1) Bi ₂ MoO ₆ and Bi ₂ WO ₆ -- 2.1.1 Structure -- 2.1.2 Synthesis of Bi ₂ MO ₆ ceramics and thin films (M = W, Mo) -- 2.2 Three-layered oxides (m = 3) Bi ₄ Ti ₃ O ₁₂ -- 2.2.1 Structure -- 2.2.2 Synthesis methods -- 2.2.3 The effect of A-site and B-site doping in Bi ₄ Ti ₃ O ₁₂ -- 2.3 Five-layered oxides (m = 5) -- 2.3.1 Structure -- 2.3.2 The synthesis of five-layered ceramics and thin films and their properties -- 2.3.3 The effect of ion substitution in five-layered Aurivillius oxides -- References -- Chapter 3 Even number layered Aurivillius oxides -- 3.1 Two-layered oxide (m = 2) structure -- 3.1.1 Synthesis of BaBi ₂ Nb ₂ O ₉ and Bi ₃ TiNbO ₉ ceramics and thin films -- 3.1.2 The effect of ion substitution in BaBi ₂ Nb ₂ O ₉ and Bi ₃ TiNbO ₉ -- 3.2 Four-layered oxides (m = 4) -- 3.2.1 Multiferroic Aurivillius oxide Bi ₅ Ti ₃ FeO ₁₅ -- 3.2.2 The four-layered titanates -- References -- Chapter 4 Mixed layered Aurivillius phases -- 4.1

Structure of intergrowths -- 4.2 Ordering and disordering in intergrowths -- 4.3 Non-successive layer intergrowths -- 4.4 Multiferroic intergrowths -- 4.5 Ferroelectric intergrowth ceramics -- 4.6 Ferroelectric intergrowth thin films. 4.7 The effect of doping in intergrowths -- 4.8 Summary -- References -- Chapter 5 Applications and future perspectives of Aurivillius oxides -- 5.1 Ferroelectric random-access memory (FeRAM) -- 5.2 Resistive random-access memory (RRAM) -- 5.3 Acoustic piezoelectric sensor -- 5.4 Biosensors -- 5.5 Pressure sensors -- 5.6 Piezoelectric nanogenerator -- 5.7 Ultrasonic transducer -- 5.8 Multifunctional applications -- 5.9 Photocatalysts -- 5.10 Future scope of Aurivillius phase oxides -- References.

Sommario/riassunto

This book provides an overview of Aurivillius phase layer structured ferroelectrics, with a focus on in-depth classification of layer structured materials and their role in developing environmentally sustainable compounds. It is an essential reference for professionals and academics working in the field of electroceramics, electronic component manufacture, materials science and engineering.
