

1. Record Nr.	UNINA9910861045103321
Autore	Oks Eugene
Titolo	Analytical Advances in Quantum and Celestial Mechanics : Separating Rapid and Slow Subsystems
Pubbl/distr/stampa	Bristol : , : Institute of Physics Publishing, , 2019 ©2020
ISBN	0-7503-4214-5
Edizione	[1st ed.]
Descrizione fisica	1 online resource (145 pages)
Collana	IOP Ebooks Series
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Sommario/riassunto	This book is primarily devoted to recent advances in applying the approximate analytical method of the separation of rapid and slow subsystems to other quantum realms. These results are practically important in the quest for achieving controlled nuclear fusion on Earth, as well as expanding practical applications of lasers and other related fields.
