Sommario/riassunto	"Statehood examines the extending lines of development of nation-state systems in Eastern Europe, in particular considering why certain tendencies in state development found a different expression in this region compared to other parts of the continent. It discusses the differences between the social developments, political decisions, and historical experience that have influenced processes of state-building, with a focus on structural problems and the different paths taken to overcome them. The second in a four-volume set on Central and Eastern Europe in the twentieth century, it is the go-to resource on statehood and state-building in this complex region"--
