| Nota di contenuto | Achievements and challenges of the "the Belt and Road" initiative -- Strategic significance and effect analysis of China-Europe express train construction -- Development history, achievements and operation mode of China-Europe express train -- Problems and countermeasures in the development of China-Europe express train -- Case studies of key regions. |
| Sommario/riassunto | This book presents an overview of the development of China-Europe express train in the broader context of BRI. It analyzes the benefits to the regions along the route from the safe, smooth and stable operation of the train in recent years, involving the strong impetus for building a new pattern of dual cycle development and driving the recovery of the economy in the post-pandemic era. Based on in-depth case studies of the operations in many regions, this book proposes measures in order to promote the high-quality development of China-Europe train: to improve infrastructure and enhance port capacity; to unify international standards and improve the efficiency of train customs clearance; to open up the European market and actively organize the return source of goods; to standardize government administrative intervention according to market orientation; to strengthen the construction of digital infrastructure with the focus on connectivity; to cultivate |

international logistics talents and build a high-quality China-Europe
express train talent team.
