Sommario/riassunto	Die transdisziplinäre Zusammenarbeit stellt die Fächer Literaturwissenschaft und Informatik vor die Herausforderung, ihre Theoriebildungen und Modelle neu zu perspektivieren. Die Beiträger*innen dokumentieren exemplarisch die spannungsreiche Verschränkung von digitalen und klassischen Methoden, fachlichen Standards sowie unterschiedlichen Forschungsgegenständen der beiden höchst differenten Wissenschaftskulturen. Aus der Sicht beider Disziplinen eruieren sie die epistemologischen Mehrwerte digitaler

Modellierung oder evaluieren Tools für die Analyse literarischer Texte -
und stoßen so durch die wechselseitigen methodologischen
Perspektiven eine Revision facheigener Fragestellungen an.
