| Sommario/riassunto | Global mobility is one of the crucial phenomena of our time. Combining the theoretical frameworks of masculinity studies and age studies, the contributors to this volume examine the intersection of cultural exchange, gender and age, exploring ageing masculinities with reference to the key concepts of relationality, kinship and care. The essays analyze transcultural experiences of ageing men from Europe, relationships including the Indian diaspora in the US, Chinese father images in the US-American context and Black British queer kinship, drawing its examples also from Brazilian society and African European contexts. |
