

1. Record Nr.	UNINA9910862000403321
Autore	IAEA
Titolo	Exploring Semantic Technologies and Their Application to Nuclear Knowledge Management
Pubbl/distr/stampa	Vienna : , : IAEA, , 2021 ©2021
ISBN	92-0-114520-9
Descrizione fisica	1 online resource (76 pages)
Collana	IAEA Nuclear Energy Series
Soggetti	Knowledge management Nuclear energy
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Sommario/riassunto	This book explores the application of semantic technologies to nuclear knowledge management. It aims to enhance access to information and processing by moving from syntactic to semantic levels. The book is part of the IAEA Nuclear Energy Series, which focuses on the peaceful uses of nuclear energy, including technology advancements, good practices, and practical examples in nuclear reactors, fuel cycles, and radioactive waste management. It is intended for professionals and stakeholders in the nuclear energy sector, providing high-level guidance, methodologies, and detailed technical reports to support sustainable development and innovation in nuclear science and technology.
