Coordinated Cultural Development in the Greater Beijing-Tianjin-Hebei Region in 2018: Characteristics, Problems and Suggestions -- 11. Industrial Restructuring and Pollution Abatement in a World-class City Cluster: A Study of the Greater Beijing-Tianjin-Hebei Region.
Sommario/riassunto	This book provides an overview of the rapid development Beijing has seen in a wide range of areas in 2018, both in itself and as an integral

part of a larger region, as China's economic development continues to improve in overall quality and regional coordination. General reports on progress Beijing made and problems it faced in 2018 in improving its economy, public services, and municipal and community governance, urban planning, and funding for innovations are followed by case studies that look at best practices and how they can be applied towards promoting coordinated development of the Beijing-Tianjin-Hebei region. The strategy features prominently in the outlook contributors present for the greater metropolitan area of Beijing for 2019. This book is a valuable source of reference for anyone trying to gain a better understanding the what, how, and why in relation to one of the world's fastest growing mega-cities. The Beijing Academy ofSocial Sciences is a government-affiliated think tank, compiling economic, population and other statistics for the public interest.
