

1.	Record Nr.	UNINA990002740040403321
	Autore	Lair, Louis
	Titolo	Organisation des services comptables : cours professé a l'Ecole nationale d'organisation économiques et sociale / Louis Lair
	Pubbl/distr/stampa	Paris, : Presses Universitaires de France, 1946
	Descrizione fisica	290 p. ; 24 cm
	Locazione	ECA
	Collocazione	8-2-7
	Lingua di pubblicazione	Francese
	Formato	Materiale a stampa
	Livello bibliografico	Monografia
2.	Record Nr.	UNINA9910863185903321
	Titolo	The Spectrum of Neuroendocrine Neoplasia : A Practical Approach to Diagnosis, Classification and Therapy // edited by Sylvia L. Asa, Stefano La Rosa, Ozgur Mete
	Pubbl/distr/stampa	Cham : , : Springer International Publishing : , : Imprint : Springer, , 2021
	ISBN	3-030-54391-9
	Edizione	[1st ed. 2021.]
	Descrizione fisica	1 online resource (XI, 478 p.)
	Disciplina	016.6151
	Soggetti	Pathology Oncology Endocrinology Surgery Radiology General Surgery
	Lingua di pubblicazione	Inglese
	Formato	Materiale a stampa
	Livello bibliografico	Monografia
	Note generali	Includes index.

Nota di contenuto

Historical Background and Terminologies -- Clinical, Radiological and Biochemical Diagnosis of NENs -- Pituitary NENs -- NENs of the upper respiratory tract -- Thyroid NENs -- Parathyroid NENs -- Thoracic NENs (Lung/thymus) -- NENs of the tubular gut -- Pancreatic NENs -- Paragangliomas and tumors of the Adrenal Medulla -- Breast NENs -- Genitourinary NENs -- Skin NENs -- Metastatic NENs of unknown primary -- Cytology of NENs: Bongiovanni, Schmitt (Bern) -- Inherited NEN syndromes -- Management of the NEN patient.

Sommario/riassunto

Neuroendocrine neoplasms comprise a large family of proliferative lesions that involve almost every part of the body. Our understanding of their cells of origin as well as the pathology, pathophysiology and genetics of these neoplasms has made tremendous advances in the last few decades. While they are often discussed as separate entities in textbooks of gastroenteropancreatic pathology and pulmonary pathology, their scope is much broader. The book conveys the similarities and differences of these fascinating tumors that may be found from the hypothalamus and pituitary to the rectum, and in soft tissue as well as in many organs. Written by experts in the field, the authors emphasize their structural, functional, predictive and prognostic features and attempt to provide the clinical context that allows improved diagnosis and therapy while building on the genetics that clarifies patterns of inheritance and predisposition to tumor development through precursor lesions. The Spectrum of Neuroendocrine Neoplasia provides a broad overview of neuroendocrine neoplasms using a practical approach to diagnosis, histological classification and therapy, and presents the most important and significant developments of the technologies used to diagnose, classify and treat them.
