

1. Record Nr.	UNINA9910865237203321
Autore	Majumdar Sushobhan
Titolo	Smart Cities : Innovations, Challenges and Future Perspectives
Pubbl/distr/stampa	Cham : , : Springer International Publishing AG, , 2024 ©2024
ISBN	3-031-59846-6
Edizione	[1st ed.]
Descrizione fisica	1 online resource (407 pages)
Collana	S. M. A. R. T. Environments Series
Altri autori (Persone)	KandpalVinay AnthopoulosLeonidas G
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Nota di contenuto	Intro -- Contents -- Part I: Defining the Smart City and Path to Smart Urbanization -- Chapter 1: Shaping the Next Generation Smart City Ecosystem: An Investigation on the Requirements, Applications, Architecture, Security and Privacy, and Open Research Questions -- 1.1 Introduction -- 1.2 Smart City Environment -- 1.2.1 Smart City Necessities -- 1.2.1.1 Technological Infrastructure -- 1.2.1.2 Data Management and Analytics -- 1.2.1.3 Connectivity -- 1.2.1.4 Sustainability -- 1.2.1.5 Citizen Engagement -- 1.2.1.6 Security and Privacy -- 1.2.1.7 Inclusivity and Accessibility -- 1.2.1.8 Infrastructure and Mobility -- 1.2.1.9 Resource Optimization -- 1.2.1.10 Resilience and Disaster Management -- 1.2.2 Smart City Requirements -- 1.2.2.1 Technological Infrastructure -- 1.2.2.2 Data Management and Analytics -- 1.2.2.3 Connectivity -- 1.2.2.4 Energy Efficiency -- 1.2.2.5 Sustainable Infrastructure -- 1.2.2.6 Citizen Engagement -- 1.2.2.7 Security, Privacy, and Accessibility -- 1.2.2.8 Efficient Mobility, Governance, and Regulation -- 1.2.2.9 Resilience and Disaster Management -- 1.2.3 Smart City Architecture -- 1.2.3.1 Application Layer -- 1.2.3.2 Data Management Layer -- 1.2.3.3 Transmission Layer -- 1.2.3.4 Sensing Layer -- 1.2.3.5 Relation and Interaction -- 1.3 Smart City Application -- 1.3.1 Transportation and Mobility -- 1.3.1.1 Intelligent Traffic Management -- 1.3.1.2 Public Transportation Enhancement -- 1.3.1.3 Smart Parking -- 1.3.2 Energy

and Utilities -- 1.3.2.1 Smart Grids -- 1.3.2.2 Energy Management -- 1.3.2.3 Renewable Energy Integration -- 1.3.3 Waste Management -- 1.3.3.1 Smart Bins -- 1.3.3.2 Recycling Initiatives -- 1.3.4 Environmental Monitoring -- 1.3.4.1 Air Quality Monitoring -- 1.3.4.2 Water Quality Management -- 1.3.5 Governance and Civic Engagement -- 1.3.5.1 Digital Services -- 1.3.5.2 Citizen Feedback. 1.3.6 Safety and Security -- 1.3.6.1 Surveillance and Monitoring -- 1.3.6.2 Emergency Response -- 1.3.7 Healthcare and Well-Being -- 1.3.7.1 Telemedicine -- 1.3.7.2 Health Monitoring -- 1.3.8 Education and Smart Learning -- 1.3.8.1 Digital Classrooms -- 1.3.8.2 Smart Campus -- 1.3.9 Tourism and Culture -- 1.3.9.1 Smart Tourism -- 1.3.9.2 Heritage Preservation -- 1.3.9.3 Economic Development -- 1.3.9.4 Innovation Hubs and Digital Marketplaces -- 1.4 Globally Selected Smart Cities -- 1.4.1 Singapore, Singapore -- 1.4.2 Seoul, South Korea -- 1.4.3 Barcelona, Spain -- 1.4.4 Copenhagen, Denmark -- 1.4.5 Dubai, United Arab Emirates -- 1.4.6 Tokyo, Japan -- 1.5 Smart Cities Attributes -- 1.5.1 Digital Infrastructure -- 1.5.2 Data Analytics and Insights -- 1.5.3 IoT Integration -- 1.5.4 Sustainability and Energy Efficiency -- 1.5.5 Urban Mobility -- 1.5.6 Integrated Public Services -- 1.5.7 Smart Governance -- 1.6 Security and Privacy for Smart Cities -- 1.6.1 Security -- 1.6.1.1 Cybersecurity Frameworks -- 1.6.1.2 Secure Data Transmission -- 1.6.1.3 Network Segmentation -- 1.6.1.4 Regular Audits and Penetration Testing -- 1.6.1.5 Secure Device Management -- 1.6.1.6 Firmware and Software Updates -- 1.6.1.7 Secure Boot and Chain of Trust -- 1.6.2 Privacy -- 1.6.2.1 Data Classification -- 1.6.2.2 Explicit Consent -- 1.6.2.3 Privacy Impact Assessments (PIA) -- 1.6.2.4 User Access Controls -- 1.6.2.5 Data Portability -- 1.6.2.6 Data Lifecycle Management -- 1.6.2.7 Transparent Data Usage -- 1.6.2.8 Cross-Border Data Transfer -- 1.6.2.9 Privacy Training and Regular Audits -- 1.7 Future Research Directions -- 1.7.1 Privacy-Preserving Technologies -- 1.7.2 Resilience and Disaster Management -- 1.7.3 AI 5G and Beyond Energy Harvesting and Storage -- 1.7.4 Circular Economy, Waste Management, Ethics, and Governance. 1.7.5 Urban Mobility Solutions, Health, and Well-being -- 1.7.6 Social Inclusion and Equity Augmented Reality and Virtual Reality -- 1.7.7 Blockchain and Distributed Ledgers and Socio-economic Impact Assessment -- 1.8 Open Research Questions for Smart Cities -- 1.8.1 Secure and Private Data Sharing, Resilient IoT Networks -- 1.8.2 Human-Centered AI and Integration of Emerging Technologies -- 1.8.3 Interoperability and Standards and Equitable Access -- 1.8.4 Digital Inclusion and Climate Resilience -- 1.8.5 Citizen Engagement Platforms, Economic, and Social Impact -- 1.8.6 Ethical Use of AI, Privacy-Preserving Analytics, Smart Rural Areas -- 1.8.7 Urban Mobility Integration, Legal and Regulatory Frameworks -- 1.9 Lessons Learned from the Chapter -- 1.9.1 Holistic Integration is Essential -- 1.9.2 Citizen-Centric Design Drives Adoption -- 1.9.3 Data-Driven Decision-Making Is Transformative -- 1.9.4 Privacy and Security Are Paramount -- 1.9.5 Adaptability and Flexibility Drive Resilience -- 1.10 Conclusion -- References -- Chapter 2: Smart City for Kids: Creating a Decent City for Children in Indonesia -- 2.1 Introduction -- 2.2 The Rationale of the Study -- 2.2.1 Understanding Smart Cities -- 2.2.2 Child-Friendly City Design -- 2.2.3 Indicators of Child-Friendly Cities in Indonesia -- 2.3 Materials and Methods -- 2.4 Results and Discussion -- 2.4.1 Child-Friendly Smart City Institutions and Policies in Indonesia -- 2.4.2 Civil Rights and Freedoms -- 2.4.3 Family Environment and Alternative Parenting -- 2.4.4 Basic Health and Well-being -- 2.4.5 Education, Use of Free Time, and Cultural

Activities -- 2.5 Limitations of the Study -- 2.6 Recommendations -- 2.7 Conclusions -- References -- Chapter 3: Visualizing Smart Cities: Unveiling Insights Through Graphical Analysis and Algorithmic Precision -- 3.1 Introduction -- 3.2 Literature Review. 3.3 Methodology -- 3.3.1 Datasets Involved -- 3.4 Conclusion -- References -- Chapter 4: Mapping the Landscape of Smart City Research: A Bibliometric Analysis -- 4.1 Introduction -- 4.2 Literature Review -- 4.3 Research Methodology -- 4.4 Results and Discussion -- 4.4.1 Co-authorship Based on Authors -- 4.4.2 Co-authorships Based on Organizations -- 4.4.3 Co-authorship Based on Countries -- 4.4.4 Citations Based on Authors -- 4.4.5 Citations Based on Organizations -- 4.4.6 Citations Based on Sources -- 4.4.7 Title and Abstract -- 4.4.8 Network Centrality Analysis -- 4.4.9 Supervised Learning -- 4.4.10 Keyword Extraction -- 4.4.11 Topic Modeling -- 4.4.12 Principal Component Analysis -- 4.4.13 Scree Plot -- 4.4.14 Biplot -- 4.5 Conclusion -- References -- Part II: Digital Transformations: Harnessing Technology for Smarter Cities -- Chapter 5: An Overview of IIoT Related to the Modern Panorama of the Industrial Field -- 5.1 Introduction -- 5.2 Artificial Intelligence and IoT -- 5.3 IIoT Benefits -- 5.4 The Essential Technologies of IIoT in Industry -- 5.5 Discussion -- 5.6 Trends -- 5.7 Conclusions -- References -- Chapter 6: Exploring Smart City Implementation and Hegemony: A Focus on Indonesia -- 6.1 Background -- 6.2 Literature Review -- 6.2.1 Smart City -- 6.3 Smart City Hegemony -- 6.4 Methods -- 6.5 Semantic Role Analysis -- 6.6 Power Relation Analysis -- 6.7 Frequent Word Analysis -- 6.8 Results and Discussion -- 6.8.1 Theme 1: Technological Hegemony in Smart City Discourse -- 6.8.2 Theme 2: Hegemony and Counter-Hegemony in the Relationship Between Government and Community in Smart City Management -- 6.8.3 Theme 3: Dynamics of Hegemony in the Role of the Private Sector and Nongovernmental Institutions in Smart City Development and Management. 6.8.4 Theme 4: Hegemony and Counter-Hegemony in Smart City Implementation as an Effort to Increase Efficiency and Sustainability -- 6.9 Conclusion -- References -- Chapter 7: Artificial Intelligence-Based Metaverse as a Virtual Model of Smart Urbanism: Unveiling the Challenges for Cybersecurity -- 7.1 Introduction and Context -- 7.2 Literature Review and Theoretical Basis -- 7.3 Research Model Development and Hypothesis Formulation -- 7.4 Materials and Methods -- 7.4.1 Quantitative Stage -- 7.4.2 Qualitative Stage -- 7.5 Inferential Statistics -- 7.5.1 Quantitative Stage -- 7.5.2 Qualitative Stage -- 7.6 Final Deliberations -- 7.6.1 Policy Implications -- 7.6.2 Limitations and Future Scopes -- References -- Chapter 8: Digital Twin: A Transformative Tool for Smart Cities -- 8.1 Introduction -- 8.2 History of Digital Twin -- 8.3 Developing the DT Concept -- 8.4 Applications Involved in DT Technology -- 8.5 Overview of Digital Twin in Smart Cities -- 8.6 Applications of DT in Smart Cities -- 8.6.1 Managing the Flow of Traffic -- 8.6.2 Construction -- 8.6.3 Systemic Health Monitoring -- 8.6.4 Healthcare -- 8.6.5 Efficient Drainage Systems -- 8.6.6 Power Grid -- 8.6.7 Environmental Monitoring -- 8.7 Digital Twin and India's Urban Transformation -- 8.7.1 India's Smart Cities: An Overview of Urban Change -- 8.7.1.1 Successful Stories of Smart Cities in India -- 8.8 Challenges Ahead in Smart Cities -- 8.9 Innovative Cloud-Based Methodology for Improving People's Life Quality in Smart Cities -- 8.10 Conclusion and Further Scope of Study -- References -- Part III: Sustainable Urban Ecosystems: Integrating Circular Economy and Planning in Smart Cities -- Chapter 9: Smart Sustainable City Initiatives and the Circular Economy: Exploring Upcycling Organizations in Cape Town -- 9.1 Introduction.

9.2 Circular Economy's Role in Enhancing Sustainable Development in Smart Cities.
