

1. Record Nr.	UNINA9910865237603321
Autore	Mukherjee Anwesha
Titolo	Resource Management in Distributed Systems
Pubbl/distr/stampa	Singapore : , : Springer Singapore Pte. Limited, , 2024 ©2024
ISBN	9789819726448 9789819726431
Edizione	[1st ed.]
Descrizione fisica	1 online resource (319 pages)
Collana	Studies in Big Data Series ; ; v.151
Altri autori (Persone)	DeDebashis BuyyaRajkumar
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Nota di contenuto	Intro -- Preface -- Contents -- About the Editors -- Resource Management in Distributed Computing -- 1 Introduction -- 2 Resource Management in Cloud Computing -- 3 Resource Allocation in Edge Computing -- 4 Resource Allocation in Fog Computing -- 5 Load Balancing in Resource Utilization -- 6 Resource Allocation and Scheduling Algorithms -- 7 Summary -- References -- Cloud Computing Resource Management -- 1 Introduction -- 2 Categories of Cloud Resources -- 2.1 Fast Computation Utility -- 2.2 Storage Utility -- 2.3 Communication Utility -- 2.4 Energy/Power Utility -- 2.5 Security Utility -- 3 Classification of Cloud Resource Management Methods -- 3.1 Energy-Aware Resource Management -- 3.2 SLA-Aware Resource Management -- 3.3 Market-Based Resource Management -- 3.4 Load-Balanced Resource Management -- 3.5 Network Load-Aware Resource Management -- 3.6 Hybrid Cloud Resource Management -- 3.7 MCC Resource Management -- 4 Mathematical Model of Performance Evaluation Parameters -- 4.1 Throughput -- 4.2 Network Overhead -- 4.3 VM Migration Time -- 4.4 Number of VM Migrations -- 4.5 Resource Utilization -- 4.6 Energy Consumption -- 4.7 Revenue and Profit -- 4.8 SLA Violation -- 5 Resource Management for Edge and Fog Computing -- 5.1 Resource Management in Edge Computing -- 5.2 Resource Management Issues of Fog Computing -- 6

Resource Management Systems and Simulation Tools -- 6.1 Resource Management Systems in Practice -- 6.2 Simulators for Resource Management -- 7 Research Challenges -- 7.1 Consumer-Based Service Management -- 7.2 Autonomic Resource Management -- 7.3 Resource Information Management -- 7.4 Heterogeneous Resources -- 7.5 Sharing of Network Resources -- 7.6 Security -- 7.7 Large-Scale Cloud Management -- 7.8 Computational Risk Analysis and Management -- 7.9 Multi-parametric Performance Evaluation -- 7.10 Service Benchmarking.

7.11 Robustness -- 8 Summary -- References -- Resource Allocation and Placement in Multi-access Edge Computing -- 1 Introduction -- 2 MEC Scenarios and Optimization Objectives -- 3 Resource Allocation -- 3.1 Computing -- 3.2 Communication -- 3.3 Storage -- 3.4 Multi-resource Allocation -- 3.5 Network Slicing -- 4 Placement Issues -- 4.1 Server Placement -- 4.2 Service Placement -- 4.3 NFV Placement -- 5 Challenges and Future Research Directions -- 6 Conclusions -- References -- Resource Scheduling in Integrated IoT and Fog Computing Environments: A Taxonomy, Survey and Future Directions -- 1 Introduction -- 2 Challenges in Cloud Computing -- 3 Fog Computing Architecture -- 3.1 IoT Layer -- 3.2 Fog Layer -- 3.3 Cloud Layer -- 4 Taxonomy of Recent Resource Scheduling Techniques -- 4.1 Static Scheduling -- 4.2 Dynamic Scheduling -- 4.3 Artificial Intelligence -- 5 Federated Learning for QoS Optimisation -- 6 Open Issues and Future Research Directions -- 7 Conclusions -- References -- Trusted Task Offloading and Resource Allocation Strategy in MEC Environment -- 1 Introduction -- 2 Mobile Edge Computing -- 2.1 Cloud Computing -- 2.2 Mobile Edge Cloud Computing -- 3 Trust Evaluation Mechanism -- 3.1 Trusted Identity -- 3.2 Trusted Behavior -- 3.3 Trusted Capability -- 4 Resource Allocation Strategy -- 4.1 Markov Decision Process -- 4.2 Deep Reinforcement Learning -- 4.3 Federated Learning -- 5 Balanced Multi-objective Approach -- 5.1 Entropy -- 5.2 Principal Component Analysis -- 5.3 Kernel Principal Component Analysis -- 6 Experiment -- 6.1 Experiment Setup -- 6.2 Target Weight Coefficient -- 6.3 Task Scaling -- 6.4 Compute Node Expansion -- 7 Conclusion -- References -- Resource Management in Edge Clouds: Latency-Aware Approaches for Big Data Analysis -- 1 Introduction -- 2 Fog, Edge, and Dew Computing.

3 Why Latency is Important in Emerging Cloud-Based Services? -- 4 Resource Management in Fog/Edge-Cloud Architecture -- 5 Resource Management Approaches -- 5.1 Application Placement -- 5.2 Load Balancing -- 5.3 Resource Scheduling -- 5.4 Offloading and Caching -- 5.5 Virtual Machine (VM) Migration and Service Function Chaining (SFC) -- 6 Role of SDN in Latency-Aware Resource Management -- 7 AI-Powered Latency-Aware Resource Management -- 8 Conclusion and Future Works -- References -- FSRmSTS-An Optimize Task Scheduling with a Hybrid Approach: Integrating FCFS, SJF, and RR with Median Standard Time Slice -- 1 Introduction -- 2 Literature Survey -- 3 Proposed Work -- 3.1 Analyzing Median -- 4 Experimental Results and Analysis -- 4.1 Illustrative Example 1 -- 4.2 Ready Queue Using FCFS -- 4.3 Ready Queue Using SJF -- 4.4 Ready Queue Using RR -- 4.5 Illustrative Example 2 -- 5 Performance Analysis -- 5.1 Comparison-Performance Metric: Turn Around Time -- 6 Conclusion -- References -- Container Orchestration in Heterogeneous Edge Computing Environments -- 1 Introduction -- 2 Background and Related Works -- 2.1 Kubernetes -- 2.2 Autoscaling -- 2.3 Related Works -- 3 System Design -- 3.1 Replica Placement -- 3.2 Autoscaling Replicas -- 4 Evaluation Environment and Experimental Setup -- 4.1 Testbed Configuration -- 4.2 Benchmark Applications and Workloads

-- 4.3 Metrics -- 5 Results and Analysis -- 5.1 Web Service Results --
5.2 Object Detection Service Results -- 6 Discussions and Limitations
-- 7 Conclusions and Future Work -- References -- Resource Targeted
Cybersecurity Attacks in Cloud Computing Environments -- 1
Introduction -- 2 Cloud Targeted Attacks -- 2.1 Economic Denial of
Sustainability (EDoS) Attack -- 2.2 Side Channel Attacks -- 2.3 Session
Hijacking Using Cookie Poisoning -- 2.4 Malware Injection Attacks --
2.5 Gray Cloud Attacks.
2.6 Memory Inspection Attacks -- 2.7 Botcloud and Out-Cloud Attacks
-- 2.8 Miscellaneous Attacks -- 3 Summary and Guidelines -- 4
Conclusions -- References -- Load Balancing Using Swarm Intelligence
in Cloud Environment -- 1 Introduction -- 1.1 Cloud Computing -- 1.2
Cloud Computing Services -- 1.3 Virtualization -- 2 Load Balancing --
2.1 Static and Dynamic Load Balancing -- 3 Swarm Intelligence Based
Techniques for Load Balancing -- 3.1 Ant Colony Optimization -- 3.2
Particle Swarm Optimization -- 3.3 Genetic Algorithm -- 3.4 BAT
Algorithm -- 3.5 Grey Wolf Optimization (GWO) -- 3.6 Artificial Bee
Colony (ABC) -- 3.7 Whale Optimization Algorithm (WOA) -- 3.8 Social
Spider Optimization -- 3.9 Dragonfly Algorithm -- 3.10 Raven
Roosting Optimization (RRO) -- 4 Hybrid Algorithm -- 4.1 Performance
Matrices for Load Balancing -- 5 Conclusion -- References --
Interoperability and Portability in Big Data Analysis Based Cloud-Fog-
Edge-Dew Computing -- 1 Introduction -- 2 Dew, Edge, Fog and Cloud
Computing -- 3 Interoperability in Cloud Computing for Big Data
Analysis -- 3.1 Interoperability in Fog/Edge/Dew Computing -- 3.2
Strategies, Architecture, and Technologies -- 4 Portability in Cloud
Computing -- 4.1 Cloud Portability at IaaS Level -- 4.2 Cloud
Portability at PaaS and SaaS Level -- 4.3 Data Portability -- 5
Management and Orchestration for Interoperability and Portability -- 6
Working Groups and Standardization Bodies in Interoperability
and Portability -- 6.1 Cloud Standards Coordination (CSC) -- 6.2
National Institute of Standards and Technology (NIST) -- 6.3 The Open
Grid Forum (OGF) -- 6.4 Open Cloud Computing Interface (OCCI) -- 6.5
IEEE SA -- 6.6 Cloud Application Management for Platforms (CAMP) --
6.7 Topology and Orchestration Specification for Cloud Applications
(TOSCA) -- 6.8 Cloud Data Management Interface (CDMI).
6.9 The Distributed Management Task Force (DMTF) -- 6.10 IEEE Std
2301™ -- 7 Challenges and Future Direction -- References -- Cyber
Attack Victim Separation: New Dimensions to Minimize Attack Effects
by Resource Management -- 1 Introduction -- 2 Victim Separation
Methods: Classification -- 2.1 Moving Target Defense (MTD) -- 2.2
Resource Isolation -- 2.3 Solutions to Co-residency Attack -- 2.4
Victim Service Migration -- 2.5 Demilitarized Zone (DMZ) -- 3
Discussion and Future Directions -- 4 Conclusions -- References --
eBPF and XDP Technologies as Enablers for Ultra-Fast and
Programmable Next-Gen Network Infrastructures -- 1 Introduction --
2 Background: eeBPF and XDP Technical Description -- 2.1 Main
Characteristics -- 2.2 eBPF Programs in the XDP: Advantages and
Limitations -- 3 Related Work: eeBPF-Based Networking Applications --
4 Use Case -- 4.1 Functionality Overview -- 4.2 Technical Details --
4.3 Testbench -- 4.4 Results -- 5 Conclusion -- References -- Deep
Reinforcement Learning (DRL)-Based Methods for Serverless Stream
Processing Engines: A Vision, Architectural Elements, and Future
Directions -- 1 Introduction -- 2 Significance and Innovation of Our
Vision -- 3 Architectural Framework -- 4 Research Issues
and Envisioned Approaches/Future Directions -- 4.1 DRL-Based
Resource Management Agents -- 4.2 Exploration Aids -- 4.3 Policies
for Management of Rewards, States, and Enactment -- 4.4 Automated

Techniques for Metrics and Configuration Management -- 5 A Case Study-Use Case Scenario: Multi-source Stream Video Analytics System -- 5.1 Use Case Overview -- 5.2 Use Case Implementation -- 5.3 DRL-SSPE Implementation for Video Grayscale -- 5.4 Results Discussion -- 6 Conclusions and Final Remarks -- References.
