Sommario/riassunto

This book provides a comprehensive discussion on emerging technologies in the Halal industry including recent highlights on the cartel issue and market competition in the crises era. Readers are provided an understanding of both technology application from multi-perspective of technology pillars in the context of Halal industry and from different sub-halal sectors, such as Halal food, tourism, cosmetics, pharmaceutical, medical, logistics, retail, and many more. This enables readers to understand differences in technology applications, their strengths, and weaknesses through use cases and effectively plan subsequent technology applications in the management of a broad spectrum of Halal industries. The book serves as an important resource for the Halal industry players and Halal scholars.
