Autore	Cobourne Martyn T
Titolo	Orthodontic Management of Class II Malocclusion : An Evidence-Based Guide // edited by Martyn T. Cobourne
Pubbl/distr/stampa	Cham : , : Springer International Publishing : , : Imprint : Springer, , 2024
ISBN	9783031575303 9783031575297
Edizione	[1st ed. 2024.]
Descrizione fisica	1 online resource (182 pages)
Collana	Medicine Series
Disciplina	617.643
Soggetti	Dentistry
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Nota di contenuto	Epidemiological and Clinical Features of Class II Malocclusion -- Treatment Timing for Class II Malocclusion -- An Evidence Base of Treatment Outcome for Class II Malocclusion -- Removable Functional Appliances in the Management of Class II Malocclusion -- Fixed Functional Appliances in the Management of Class II Malocclusion -- Molar Distalisation Techniques in the Management of Class II Malocclusion -- Fixed Appliance Treatment in the Management of Class II Malocclusion -- Class II Division 2 Malocclusion -- Lingual Appliances in the Management of Class II Malocclusion -- Aligner-Based Class II Treatment -- Orthodontic-Surgical Management of Class II Malocclusion -- Retention.
Sommario/riassunto	This multi-author clinical guide provides an evidence-based account of the orthodontic management of class II malocclusion. It begins with an overview of class II malocclusion including clinical examples and epidemiological data. This is followed by a chapter discussing timing of treatment, both early and late, and pre- and post-pubertal interventions. Information is given on the evidence base underlying outcomes of treatment, and on clinical management of class II malocclusion, beginning with techniques aimed at growth modification including removable functional appliances, fixed functional appliances and molar distalisation. The book includes a stand-alone chapter on class II division 2 malocclusion and explains conventional camouflage-

based orthodontic treatment, treatment of class II malocclusion with lingual appliances and orthodontic-surgical management of class II cases. The last chapters are dedicated to management of class II cases with aligners and retention. In this book, there is an emphasis on evidence-based management of these developing problems and each chapter is richly illustrated with clinical examples. The chapters have been written by an international field of expert clinicians and academics, and will appeal to a wide range of clinicians, including undergraduate dental students, orthodontic specialist trainees and established specialist orthodontists.
