

1. Record Nr.	UNINA9910865256003321
Autore	Nechyporuk Mykola
Titolo	Integrated Computer Technologies in Mechanical Engineering - 2023 : Synergetic Engineering, Volume 1
Pubbl/distr/stampa	Cham : , : Springer International Publishing AG, , 2024 ©2024
ISBN	3-031-61415-1
Edizione	[1st ed.]
Descrizione fisica	1 online resource (641 pages)
Collana	Lecture Notes in Networks and Systems Series ; ; v.1008
Altri autori (Persone)	PavlikovVolodymir KrytskyiDmytro
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Nota di contenuto	Intro -- Preface -- ICTM-2023 Committees -- Contents -- Aerospace Engineering -- Statistical Analysis of Airplane Pressure Altitude Datasets -- 1 Introduction -- 2 On-Board Equipment -- 3 Statistical Analysis -- 4 Software -- 5 Numerical Demonstration -- 6 Conclusions -- References -- Forced Nonlinear Bending Vibrations of Beams with Two Breathing Cracks -- 1 Introduction -- 2 Equations of the Structure Oscillations -- 3 Numerical Analysis of Nonlinear Oscillations -- 4 Conclusions -- References -- Algorithm for Selecting the Optimal Technology for Rapid Manufacturing and/or Repair of Parts -- 1 Introduction -- 2 Literature Review and State-of-the-Art -- 3 The Goal and Tasks of the Study -- 4 Calculation of the Labor Intensity of the Selected Production Technology -- 5 Experimental Research -- 5.1 Manufacturing a Part by 3D Printing -- 5.2 Production of a Part by Stamping -- 5.3 Comparative Analysis of the Labor Intensity of the Work of Manufacturing a Part by 3D Printing and Stamping -- 6 Algorithm for Selecting the Optimal Technology for Rapid Manufacturing and/or Repair of Parts -- 7 Conclusions -- References -- The Eco-Ergonomics Issues of the Digital Workplace -- 1 Introduction -- 2 Literature Review -- 3 Materials and Results -- 4 Discussion -- 5 Conclusions -- References -- Analysis of Particle Parameters of Multi-channel Mixed Cross-Section Right-Angle Cold Spray Nozzle Structure -- 1 Introduction -- 2 Simulation Method

and Material Model and Hybrid Cross-Section Right-Angle Cold Spray Nozzle Model -- 2.1 Simulation Methods and Material Models -- 2.2 Hybrid Cross-Section Right-Angle Cold Spray Nozzle -- 3 Analysis of Single-Channel and Multi-channel Mixed Cross-Section Right-Angle Cold Spray Nozzles -- 4 The Single-Channel Nozzle -- 5 The Multi-channel Nozzle -- 6 Velocity and Temperature Analysis of Particles in the Three-Channel Nozzle.

7 Conclusions -- References -- Analysis of the Urban Air Mobility for the Unmanned Aerial Vehicle -- 1 Introduction -- 2 The Human Factor in the UAV -- 3 Mathematical Methods and Models that Can Be Applied to UAV -- 4 Conclusions -- References -- Mathematical Modeling of the Thermal State of the Brush-Holders Device in a Three-Dimensional Setting -- 1 Introduction -- 2 Design and Purpose of the Brush-Holders Device -- 3 Factors Affecting the Calculation of the Brush-Holders Device -- 4 Example of Calculating the Thermal State of the Brush-Holders Device -- 5 Discussion -- References -- Process-Induced Stresses and Deformations of Hobe Block During Shrinkage and Cooling -- 1 Introduction -- 2 Literature Review -- 3 Research Methodology -- 4 Results and Discussion -- 5 Conclusions -- References -- Temperature and Velocity Changes of ZrO<sub>2</sub> Particles in the Process of HVOF Spraying by Twin-Combustion-Chamber Burner -- 1 Introduction -- 2 Literature Review -- 3 Methodology -- 3.1 Model of Gas Flow at the Ejector Outlet -- 3.2 Model of Particle Acceleration and Heating by Gas Flow -- 4 Results and Discussion -- 4.1 Results of Calculation of Gas Velocity and Temperature -- 4.2 Results of Calculation of Particle Velocity and Temperature -- 5 Conclusions -- References -- Robust Parametrical Optimization of Discrete System for Stabilization of Apparatus of Land Moving Vehicles -- 1 Introduction -- 2 Mathematical Description of Discrete Stabilization System -- 3 Discretization of Model -- 4 Features of Synthesis of Discrete Stabilization System -- 5 Robust Parametrical Optimization of Discrete Stabilization System -- 6 Modelling Results -- 7 Conclusions -- References -- Modeling Hole Edge and Burr Formation During Drilling Using LS-DYNA -- 1 Introduction -- 2 The State-of-The-Art and the Study Purpose -- 3 Literature Review -- 4 Experimental Procedures.

5 Numerical Modeling of Drilling -- 5.1 Explicit Formulation of the Model -- 5.2 Drill Bit Geometry -- 5.3 Materials of the Drill Bit and Workpiece -- 5.4 Boundary Conditions and Loads -- 5.5 Discussion of Numerical Modeling Results -- 6 Conclusions -- References -- Aerodynamic Interaction of Minivan Vehicles During an Overtaking Maneuver -- 1 Introduction -- 2 Calculation Model -- 3 Study of the Aerodynamic Characteristics of Vehicles During Approaching on the Same Traffic Lane -- 4 Study of the Aerodynamic Characteristics of Vehicles During Shifting to a Parallel Traffic Lane -- 5 Study of the Aerodynamic Characteristics of Vehicles During Overtaking -- 6 Analysis of Numerical Simulation of Overtaking Three Stages -- 7 Conclusions -- References -- Experimental Research of Electrofinishing Processing of High Precision Parts as a Composition of Convergence Technology -- 1 Introduction -- 2 Purpose and Objectives of the Study -- 3 Literature Review and State-of-the-Art of Known Surface Finishing Methods -- 4 Experimental Study of Electrosuperfinishing Processing on the Example of Processing the Roller -- 5 Conclusion -- References -- ML-Approach for Modeling Viscoelastic and Physically Nonlinear Materials Based on Symbolic Regression -- 1 Introduction -- 2 Symbolic Regression -- 2.1 Genetic Programming -- 2.2 Technical Stack -- 3 Application of Symbolic Regression to the Approximation of Nonlinear Hyperelasticity -- 4 Application of Symbolic Regression

to the Approximation of Viscoelastic Behavior -- 5 Summary --  
References -- Touches to the Portrait of the Aviation Designer  
and Military Pilot Kostyantyn Kalinin -- 1 The Problem Statement -- 2  
Presentation of the Main Material -- 3 Conclusions -- References --  
Control Systems and Engineering -- Efficiency of Protective Textile  
Smart Systems Using Electronic Tags.  
1 Formulation of the Problem in General Terms -- 2 Research  
on the State of the Issue -- 3 Basic Requirements for Protective  
Materials and Products Used in High-Temperature Environments -- 4  
Development of a System of Registration of Operating Conditions  
of Special Textile Products -- 5 The Ability of Protective Textile Smart  
Systems to Function in Real-World Conditions -- 6 Constructive  
Schemes Location of Electronic Systems in Textile Products -- 7  
Conclusions -- References -- Modeling of Complex Spatial Structures  
Through the Example of the "Slavyanka UAS 7" Reaper -- 1 Introduction  
-- 2 Setting a Task -- 3 Description of the Reaper Structure -- 4  
Defining the Load -- 5 Selecting Parameters for Casings Substituting  
the Real Rotors -- 6 Experimental Checkup of the Reaper Model -- 7  
Calculations for the Reaper Under the Maximum Load -- 8 Conclusions  
-- References -- Development of an Automated System for Analyzing  
the Stress-Strain State of the Elevator Structure, Taking into Account  
Operational Conditions -- 1 Introduction -- 2 Problem Formulation --  
3 Calculation of the Physical and Mechanical Properties of Reinforced  
Concrete -- 4 Automated Silo Loading System -- 5 Grain Storage  
Building Modeling -- 6 Study of the Stress-Strain State of a Separate  
Silo -- 7 Analysis of Results Under Different Scenarios of Grain  
Allocation in the Silos Building -- 8 Conclusions -- References --  
Information Modeling -- Understanding the Relationship Between  
the Russian War in Ukraine and COVID-19 Spread in Canada Using  
Machine Learning Techniques -- 1 Introduction -- 2 Current Research  
Analysis -- 3 Materials and Methods -- 4 Results -- 4.1 Model  
Verification -- 4.2 Experimental Results -- 5 Conclusions --  
References -- Regression Analysis of Geometric Parameters of "Screw  
Implant - Maxillary Segment" Biomechanical System -- 1 Introduction  
-- 2 Literature Review.  
3 Research Methodology -- 4 Results -- 5 Conclusions -- References  
-- Parameters and Characteristics of Parachute Systems for Physical  
Modelling Precision Airborne Cargo Landing -- 1 Introduction -- 2  
Literature Review on the Features of the Device and Flight Tests  
of Parachute Systems of CPACLS, as Well as Similar Researches on FDSM  
-- 3 Conditions and Scales of Similarity Used in the Creation of FDSM  
and Flight Researches of the Gliding Parachute System of CPACLS -- 4  
Conditions of Similarity and Technical Feasibility of FDSM in the Task  
of Creating Model Parachute Systems -- 5 Conclusions -- References  
-- Crestal Versus Subcrestal Short Plateau Implant Placement -- 1  
Introduction -- 2 Literature Review -- 3 Research Methodology -- 4  
Results -- 5 Conclusion -- References -- Smoothed Piecewise Linear  
Lyapunov Function for the First Order Dynamical Systems -- 1  
Introduction -- 2 Definition of Piecewise Lyapunov Function -- 2.1  
Definition of Piecewise Linear Lyapunov Functions -- 2.2 Polynomial  
Smoothing of Piecewise Linear Lyapunov Functions -- 2.3 Definition  
of Lyapunov Function for Control System with Multilevel Sliding Mode  
Controller -- 3 Conclusion -- References -- Hybrid Algorithm  
of Adhesive Joint Shape Optimization -- 1 Introduction -- 2  
Methodology of Research -- 3 Problem Formulation -- 3.1  
Mathematical Model -- 3.2 Numerical Solution of the Direct Problem --  
4 Optimization -- 4.1 Optimization Genetic Algorithm -- 4.2  
Algorithm, Particle Swarm Optimization -- 5 Results and Discussion --

6 Conclusions -- References -- Intelligent Recommendation System  
for Assessing Hand Hygiene of Healthcare Workers -- 1 Introduction --  
2 Materials and Methods -- 3 Results -- 4 Conclusions -- References  
-- Information Technology in the Creation of Rocket Space Systems --  
Preliminary Design Approach for Lattice Composite Keel Beam -- 1  
Introduction.  
2 Design Approach and Methodology.
