

1. Record Nr.	UNINA9910865260103321
Autore	Auer Michael E
Titolo	Smart Technologies for a Sustainable Future : Proceedings of the 21st International Conference on Smart Technologies and Education. Volume 2
Pubbl/distr/stampa	Cham : , : Springer International Publishing AG, , 2024 ©2024
ISBN	9783031619052 9783031619045
Edizione	[1st ed.]
Descrizione fisica	1 online resource (450 pages)
Collana	Lecture Notes in Networks and Systems Series ; ; v.1028
Altri autori (Persone)	LangmannReinhard MayDominik RoosKim
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Nota di contenuto	Intro -- Preface -- Committees -- Contents -- Smart Technology and Education -- A Machine Learning Framework for Improving Resources, Process, and Energy Efficiency Towards a Sustainable Steel Industry -- 1 Introduction -- 2 Methodology -- 2.1 The Sustainability Challenge in the Steel Industry -- 2.2 Decision Support System Digital Platform -- 3 Experimental Results -- 3.1 RFR for the Optimization of the Use of Resources -- 3.2 RFR for Estimating the Content of Iron Oxide in the Steel Slag for Process Efficiency -- 3.3 LSTM-Based RNN for Energy Efficiency in the Cooling System -- 4 Conclusion -- References -- Overall Writing Effectiveness: Exploring Students' Use of LLMs, Pushing the Limits of Automated Text Generation -- 1 Introduction -- 2 The Academic Writing Process and the Overall Equipment Effectiveness Model -- 2.1 Potential Difficulties in the Academic Writing Process -- 2.2 From Overall Equipment Effectiveness to Overall Writing Effectiveness -- 2.3 Impact of Automation on a Writer's Technical Maximum Speed -- 3 Data Collection -- 4 Results -- 5 Conclusions -- References -- Evaluating Room Occupancy with CO2 Monitoring in Schools: A Student-

Participative Approach for Presence-Based Heating Control -- 1
Introduction -- 2 Background and Relation to Others -- 2.1 Energy Savings Through Presence-Based Climate Conditioning -- 2.2 Presence Detection and People Counting -- 2.3 CO2 Monitoring in Non-residential Buildings -- 3 Methodology -- 3.1 Determining Occupancy by Gradient Slope of CO2 Levels -- 3.2 Collaborative Data Collection in a School Building -- 3.3 Outcomes -- 4 Discussion and Outlook -- References -- Data-Driven Mobility and Transport Planning in Municipalities: Smart Solutions for Limited Resources -- 1
Introduction -- 2 Background and Theoretical Framework -- 3 Technical Realisation and Results -- 4 Discussion and Conclusions. References -- Investigating the Effect of Personal Emotional Score Display on Classroom Learning -- 1 Introduction -- 2 Background -- 3 Methodology -- 3.1 Research Design -- 3.2 Participants -- 3.3 Procedure -- 4 Results -- 4.1 Dissonance Between AI-Reported and Self-reported Emotions -- 4.2 Perceived Productivity -- 4.3 Actual Student Scores -- 5 Discussion -- 6 Limitations and Future Scope -- References -- Development of a Health Monitoring System for Students in Shelters as an Interdisciplinary Project During the Training of Masters in Automation at Ukrainian Universities -- 1 Introduction -- 2 Formulation of the Problem -- 3 Stages of the Project Implementation -- 3.1 Forming the Project Teams and Developing of an Organizational Framework for Working on a Case Study -- 3.2 Selecting the Means for Measuring Physiological Parameters -- 3.3 Creating a Personalized History of Health Indicators -- 3.4 Developing a Set of Rules and Algorithms for Decision-Making Regarding the Critical/normal Health Condition -- 4 Conclusion -- References -- Enhancing Municipal Fleet Management in Smart Cities Through 5G Integration -- 1 Introduction -- 2 Literature Review -- 3 Transformative Solutions for Optimizing Municipal Fleet Management -- 3.1 Key Functional Aspects in Focus -- 4 The Power of 5G in Municipal Fleet Management -- 4.1 Overview of 5G -- 4.2 Applications of 5G in Municipal Fleet Management -- 5 Data Logging and Analysis -- 5.1 Data Interpretation and Visualization -- 6 Conclusion and Future Work -- References -- Developing a GPT Chatbot Model for Students Programming Education -- 1 Introduction -- 2 Developing a GPT Web Programming Model -- 2.1 Customizing the GPT Model -- 2.2 Developing the Chatbot Web Application -- 3 Testing and Validating the GPT Model -- 4 Conclusions -- References.
Integrated Real-Time Web-Based System of Accidental Hoisting Detection Algorithms for Hoist Lift in Harbors -- 1 Introduction -- 2 Methodology -- 2.1 Distributed Web-Based Framework -- 2.2 Integrated Development Mechanism -- 3 Online Experiment -- 3.1 Experimental Configuration -- 3.2 Experiment Details -- 4 Conclusion -- References -- Work in Progress: Empowering Vocational Education with Automation Technology and PLC Integration -- 1 Introduction and Context -- 1.1 Introduction of Rui De International School -- 1.2 Introduction to Trustee Management -- 1.3 Xplore2023 Project Overview and Insights -- 2 Problem Analysis -- 3 Methodology -- 4 Design of the Training Device -- 4.1 Features of MPPWS -- 4.2 Component of MPPWS -- 5 Application of MPPWS -- 5.1 Training Plan for Vocational Teachers Using MPPWS -- 5.2 Student Training Recommendations for MPPWS -- 6 Expected Outcomes -- A Smart Electromagnetic Lens Antenna Design for Next-Generation Location-Based Wireless Communication -- 1 Introduction -- 2 Proposed Method -- 3 Results and Discussion -- 4 Conclusion -- References -- Contribution to Characterizing Time-Dependent Handgrip Strength Profiles -- 1 Introduction -- 2 Methodology -- 2.1 Participants -- 2.2

BodyGrip and the Typical HGS(t) Time Profile -- 2.3 Exploring Alternative Approaches -- 3 Results -- 4 Discussion and Prospects -- References -- Virtual and Remote Laboratories -- Wireless Remote Control Systems of Marine Diesel Engine -- 1 Introduction -- 2 Analysis of Literary Data and Statement of the Problem -- 3 Research Goals and Objectives -- 4 Materials and Methods of Research of Ship's Diesel Generator Wireless Remote Control Systems -- 4.1 Equipment that Was Researched in the Experiment to Determine the Possibilities of Functional Expansion of Its Work.

4.2 Methodology for the Composition of Modular Devices of the Wireless System for Transmitting the Information Flow of an Emergency Diesel Generator -- 4.3 The Result of the Wireless Control and Control System Device Layout According to the Parameters of the Emergency Diesel Generator -- 5 Resulting Technical Capabilities of the Developed Wireless System of Diesel Generator Parameters Control and Monitoring -- 6 Discussion of the Research Results Regarding the Technical Capabilities of the Emergency Diesel Generator Parameters Wireless Control and Monitoring System -- 7 Conclusions -- References -- Altitude's Impact on Photovoltaic Efficiency: An IoT-Enabled Geographically Distributed Remote Laboratory -- 1 Introduction -- 2 Measuring the Solar Resource at Different Altitudes -- 3 Energy Efficiency of Photovoltaic Panels -- 3.1 I-V Curves in Photovoltaic Panels -- 3.2 Measurement of the Energy Efficiency of a Photovoltaic Panel -- 4 Overview of the PV Solar Remote Lab -- 5 Implementation and Deployment of the Remote Lab -- 5.1 Assembly of the PV Solar Remote Lab Kits -- 5.2 The Web Platform -- 5.3 The PCB Development -- 6 Results and Discussion -- 7 Conclusions -- References -- RHLab Interoperable Software-Defined Radio (SDR) Remote Laboratory -- 1 Introduction -- 2 Background -- 3 System Design -- 4 Results -- 4.1 Functionality Test of Four Channels with Custom Image -- 4.2 Interoperability Between Two Red Pitayas -- 5 Conclusion and Future Work -- References -- RHL-RADAR Remote Laboratory -- 1 Introduction -- 2 Background -- 3 System Design -- 3.1 Continuous Wave Radar -- 3.2 Modeling of the Rotating Structure -- 3.3 Antenna -- 3.4 Digital Receiver -- 4 Results -- 5 Conclusions and Future Work -- References -- Preliminary Evaluation of RHL-RELIA Post-development -- 1 Introduction -- 2 Background -- 3 RHL-RELIA Remote Laboratory.

4 Assessment Methodology -- 5 Results -- 6 Conclusions and Future Work -- References -- RHLab: Towards Implementing a Partial Reconfigurable SDR Remote Lab -- 1 Introduction -- 2 Background -- 3 System Design -- 3.1 RHL-RELIA System -- 3.2 Integrating Partial Reconfiguration into the Architecture -- 4 Results -- 4.1 Testing Partial Reconfiguration: Evaluating Blackboard for UI-Based Architecture -- 4.2 SDR Selection -- 4.3 Analysis: SDR PR via Vivado vs. Command-Line Approach -- 5 Conclusion and Future Work -- References -- A First Critical Analysis of a Hybrid Teaching Approach Using Remote Laboratories -- 1 Introduction -- 2 Contribution -- 3 Hybridization of a Course -- 3.1 Description of the Remote Lab -- 3.2 Description of the Computer Programming, Instrumentation Course -- 3.3 Example of a Hybrid Pedagogical Sequence -- 4 Evaluation -- 4.1 Participants -- 4.2 Data Collection and Analysis -- 4.3 Results and Discussion -- 5 Conclusions Perspectives -- References -- Lego-Based Remote Robotics Lab: Enhancing Didactic Engagement and Learning -- 1 Introduction -- 2 Lego Mindstorm EV3 -- 3 Web Server Interface -- 4 Front End Interface -- 5 Conclusion -- References -- Enhancing Accessibility for Real-Time Remote Laboratories: A Web-Based Solution with Automated Validation and Access Control -- 1 Introduction -- 2

Related Work on Remote Display to Access Labs -- 3 A BridgeServer for Real-time Remote Labs -- 3.1 Architecture of the BridgeServer -- 3.2 BridgeServer Implementation -- 4 BridgeServer Use Case with an External Control Service -- 5 Results and Discussion -- 6 Conclusions -- References -- It's a Marathon, Not a Sprint: Challenges Yet to Overcome for Digital Laboratories in Education -- 1 What Are Digital Labs? -- 2 Challenges Found in Literature -- 2.1 Organisational Challenges -- 2.2 Technical Challenges -- 2.3 Pedagogical Challenges. 3 Experiences from the CrossLab Project.
