1. Record Nr. UNINA9910865261203321

Autore	Duffy Vincent G
Titolo	Digital Human Modeling and Applications in Health, Safety, Ergonomics and Risk Management : 15th International Conference, DHM 2024, Held As Part of the 26th HCI International Conference, HCII 2024, Washington, DC, USA, June 29-July 4, 2024, Proceedings, Part I
Pubbl/distr/stampa	Cham : , : Springer International Publishing AG, , 2024 ©2024
ISBN	9783031610608 9783031610592
Edizione	[1st ed.]
Descrizione fisica	1 online resource (448 pages)
Collana	Lecture Notes in Computer Science Series ; ; v.14709
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Nota di contenuto	Intro -- Foreword -- HCI International 2024 Thematic Areas and Affiliated Conferences -- List of Conference Proceedings Volumes Appearing Before the Conference -- Preface -- 15th International Conference on Digital Human Modeling and Applications in Health, Safety, Ergonomics and Risk Management (DHM 2024) -- HCI International 2025 Conference -- Contents - Part I -- Contents - Part II -- Contents - Part III -- Digital Human Modeling for Design and Evaluation -- Bibliometrics-Based Analysis of Trends in Affective Design Evaluation Research -- 1 Introduction -- 2 Research Design -- 2.1 Research Methodology -- 2.2 Sources of Research Data -- 3 Emotional Design Evaluation Bibliometric Results and Analysis -- 3.1 Essential Characteristics of Evaluative Research on Emotional Design -- 3.2 Distribution of Literature by Country and Research Institution -- 3.3 Most Influential Journals and Authors -- 3.4 Analysis of Research Hotspots -- 3.5 Theoretical Foundation -- 4 Conclusion -- References -- A Study on the Force Comfort of Over-Ear Headphones Based on 3D Anthropometric Data -- 1 Introduction -- 2 Methods -- 2.1 Experimental Headphone -- 2.2 Selection of Landmarks and Ear Dimensions -- 2.3 Experiment for Evaluating Wearing Comfort -- 2.4 Evaluation of Clamping Force -- 2.5 Data Analysis -- 3 Results -- 3.1

Influences of Ear Dimensions on Force Comfort -- 3.2 Influences of Ear Dimensions on Overall Comfort -- 3.3 Differences in Comfort Scores and Clamping Force Between Experimental Headphones -- 4 Discussion and Conclusion -- References -- Manufacturing and Analysis of a Knee Ankle Foot Orthosis for Acquired Anisomelia by Using a Finite Elements Strategy -- 1 Introduction -- 2 Related Works -- 3 Materials and Methods -- 3.1 Design and Manufacturing of KAFO -- 3.2 3D Modeling of KAFO and Numerical Analysis -- 4 Results -- 4.1 Experimental Setup.
4.2 Finite Elements Analysis -- 4.3 Gait Analysis -- 5 Conclusions -- References -- Standardizing and Early Warning of Sewing Beginners' Posture Based on CNN Visual Recognition Technology -- 1 Introduction -- 2 Research Organization -- 2.1 Scene and Requirement Analysis -- 2.2 Collection and Classification of Postures -- 2.3 Technical Organization -- 2.4 Experimental Operation -- 3 Computer Vision Technology -- 4 Experimental Research -- 4.1 Scene Requirement Analysis -- 4.2 Collection and Classification of Postures -- 4.3 System Design -- 4.4 Construct the Convolutional Neural Network -- 4.5 Experimental Application -- 5 Conclusion -- References -- The Use of Digital Human Modeling to Assess Vision Obstruction in Airport Taxi Operations -- 1 Introduction -- 2 Background -- 2.1 Vision Obstruction in Airport Ground Support Vehicles -- 2.2 Analyzing Driver Vision with Digital Human Modeling -- 3 Methodology -- 4 Case Studies -- 4.1 Case Study 1 - Pushback Accident -- 4.2 Case Study 2 - Fuel Truck Accident -- 5 Results -- 5.1 Vision Obstruction Analysis of the Pushback Tractor Driver -- 5.2 Vision Obstruction Analysis of the Fuel Truck Driver -- 6 Discussion -- 7 Conclusion and Future Work -- References -- Improving Welding Robotization via Operator Skill Identification, Modeling, and Human-Machine Collaboration: Experimental Protocol Implementation -- 1 How to Analyze Skills with Psychology -- 2 Welding Variables -- 3 Measuring Instruments -- 4 Analysis of Measurement Tools -- 4.1 Electrical Parameters: Process Control -- 4.2 Filler Metal: A Critical Process Difference -- 4.3 Sound: A Characteristic Emission -- 4.4 Temperature: Anticipating Cooling -- 5 Weld Pool Dimensions: A Visible Factor for the Welder -- 5.1 Laser Measurements -- 5.2 Ultrasonic Measurements -- 5.3 Camera Measurements -- 6 Operator Motion Capture -- 6.1 Optical Motion Capture.
6.2 Inertial Measurement Units (IMUs) -- 6.3 RBG Video -- 6.4 Depth Camera -- 6.5 Measurement by Force Sensors/Pressure Plate -- 6.6 Summary of Motion Capture Measurements -- 7 Physiological Measurements: The Body's Response -- 7.1 Measurements of Physiological Electrical Signals -- 7.2 Gaze Tracking -- 8 Summary and Conclusion of the Measurement Tools -- 9 Survey and Interview: A Subjective Measure of the Rationale of the Operator -- 10 Proposed Experimental Protocol -- 11 Conclusions and Future Work -- References -- Measuring Fatigue Dynamics of Augmented Reality in the Digital Learning Era Using Motion Capture Data -- 1 Introduction -- 2 Methodology -- 2.1 Experimental Design -- 2.2 Data Collection -- 3 Data Analysis -- 3.1 Postural Dynamics Analysis -- 3.2 Slouching Scores Analysis -- 4 Results -- 4.1 Slouching Scores -- 4.2 Regression Model -- 5 Discussion -- 5.1 Regression Model -- 5.2 Relationship Between Slouching Score and NASA TLX PD -- 5.3 Explain the Correlation of Both Predicted and Actual NASA TLX PD -- 6 Conclusion -- References -- Human Ergonomic Analysis for Car Seating Safety Using RAMSIS Software -- 1 Introduction and Background -- 1.1 RAMSIS Software Introduction -- 1.2 RAMSIS Software Background -- 1.3 RAMSIS and How It is Used -- 1.4 Review

of Human Modeling Ergonomics Methods -- 1.5 Making Use of RAMSIS for Automotive Seat Ergonomic Analysis -- 2 Review of Conducted Studies -- 2.1 Problem Statement -- 2.2 Literature Review -- 2.3 Citation Trends: Trend Analysis for Vehicle Safety Using RAMSIS -- 3 Procedure -- 4 Analysis and Discussion -- 5 Future Work -- 5.1 Integrating IOT Sensor Data with RAMSIS for Accurate Analysis -- 5.2 Investigating Various Types of Crash Scenarios Using RAMSIS -- 5.3 Predicting Occupant Behavior Using Machine Learning in RAMSIS -- References.
A Bibliometric Analysis of Cognitive Load Sensing Methodologies and Its Applications -- 1 Introduction -- 1.1 Relevance to Applied Ergonomics at Large -- 2 Methodology -- 2.1 Bibliometric Analysis -- 2.2 Visualization and Trend Analysis -- 3 Results -- 3.1 Leading Tables -- 3.2 Trend Analysis -- 3.3 Visualization -- 4 Discussion -- 4.1 Use of Electroencephalogram (EEG) for Quantifying Cognitive Workload -- 4.2 Application of Cognitive Workload Sensing in Healthcare -- 4.3 Effect of Stressors on the Measurement of Cognitive Load -- 4.4 Impact of Cognitive Load on Language and Stimuli Processing -- 5 Future Work -- References -- Analysis and Validation on Multi-dimensional Assessment for Comfort of In-Ear Headphones -- 1 Introduction -- 2 In-Ear Headphone Comfort Assessment Questionnaire -- 2.1 Multidimensional Structure of the Questionnaire -- 2.2 Questionnaire Design -- 3 Method -- 3.1 Experiment Design and Procedure -- 3.2 Questionnaire Examination -- 4 Questionnaire Analysis and Revision -- 4.1 Initial Questionnaire Confirmatory Factor Analysis -- 4.2 Questionnaire Revision -- 4.3 Confirmatory Factor Analysis of the Revised Questionnaire -- 4.4 Convergent Validity and Discriminant Validity -- 4.5 Internal Consistency Reliability -- 5 Discussion and Conclusion -- References -- User Experience and Assistive Technologies -- StairMate: Design and Evaluation of a Walking Assistive Device Along the Handrail for Older Adults -- 1 Introduction -- 2 Related Work -- 3 Prototype of StairMate -- 4 Evaluation -- 4.1 Participants and Experiment Setup -- 4.2 Procedure and Experimental Design -- 4.3 Data Analysis Method -- 5 Results and Discussion -- 5.1 Results of Main Experiment -- 5.2 Discussion -- 6 Limitations and Prospects -- 7 Conclusion -- References -- Effects of Passive Arm Support Exoskeleton on Static Postural Balance -- 1 Introduction -- 2 Methods.
2.1 Participants -- 2.2 Exoskeleton -- 2.3 Experimental Design -- 2.4 Experimental Setup and Procedures -- 2.5 Data Collection and Processing -- 2.6 Statistical Analysis -- 3 Results and Discussion -- 3.1 Intervention -- 3.2 Intervention Weight Condition -- 3.3 Intervention Load Location -- 3.4 Limitations and Future Work -- 4 Conclusions -- References -- Usability Evaluation and Age-Appropriate Design of Wearable Fall Protection Devices -- 1 Introduction -- 2 Methodology -- 2.1 Usability -- 2.2 Analytic Hierarchy Process -- 2.3 Usability Evaluation -- 3 Result -- 3.1 Task Performance -- 3.2 The Interaction Characteristics Between the Elderly and WFPD -- 4 Redesign -- 4.1 Pain Points and Redesign -- 4.2 Design Instructions -- 5 Discussion and Conclusion -- References -- Acquiring Emotional Needs for Power Wheelchair Styling Oriented to Elderly Users -- 1 Introduction -- 2 Emotional Needs Elicitation of Electric Wheelchairs -- 2.1 Instinctual Level Needs Elicitation -- 2.2 Behavioral Level Needs Elicitation -- 2.3 Reflective Level Needs Elicitation -- 2.4 Establishing a Comprehensive Emotional Needs List -- 3 Determining Importance of Elderly Users' Emotional Needs for Electric Wheelchairs -- 3.1 Factor Analysis -- 3.2 Ranking Emotional Needs Importance -- 4 Conclusion -- References -- Sensor-Based Assistive Technology as a Support

to Reduce Intra-hospital Infection and Mortality Due to Epidemic Respiratory Diseases: A Proposal -- 1 Introduction -- 2 Literature Review -- 3 Proposed Methodology -- 4 Results -- 4.1 Characterization of Seasonal Respiratory Diseases (SRDs) -- 4.2 Definition of Clinical Indicators for Remote Monitoring -- 4.3 Design of Healthcare Protocols Responding to Health Deviations -- 4.4 Target Population Characterization -- 4.5 Design of the Remote Sensor-Based Assistive Technology -- 5 Conclusions -- References.
Investigation of the Impact of a Passive Shoulder Exoskeleton on the Shoulder Range of Motion: A Preliminary Study.
