

1. Record Nr.	UNINA9910865271903321
Autore	Vishnevskiy Vladimir M
Titolo	Distributed Computer and Communication Networks : 26th International Conference, DCCN 2023, Moscow, Russia, September 25-29, 2023, Revised Selected Papers
Pubbl/distr/stampa	Cham : , : Springer, , 2024 ©2024
ISBN	9783031618352 9783031618345
Edizione	[1st ed.]
Descrizione fisica	1 online resource (0 pages)
Collana	Communications in Computer and Information Science Series ; ; v.2129
Altri autori (Persone)	SamouylovKonstantin E KozyrevDmitry V
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Nota di contenuto	Intro -- Preface -- Organization -- Contents -- Modeling and Comparison of Different Management Approaches on the Intersections Network -- 1 Introduction -- 2 Task Description -- 2.1 Intellectual Driver Model -- 2.2 MARLIN for Traffic Light Network -- 2.3 Fuzzy Logic Controller for Traffic Light -- 3 Computational Experiments -- 3.1 VEHICLE DETECTOR Module -- 3.2 QLEARNING Module -- 3.3 FLCONTROL Module -- 3.4 Model Comparison -- 4 Conclusion -- References -- Examining the Performance of a Distributed System Through the Application of Queuing Theory -- 1 Introduction -- 2 System for Distributed Computing -- 3 Analytical Model -- 3.1 Composition of the System of Balance Equations for the Case $n=0, r=0, i \leq M$, All Tasks in the System are Executed -- 3.2 Composition of the System of Balance Equations for a Fragment of Markov Chain, in the Case When There are Partially Executed Customers in the System and There are No Customers in the Buffer $n=0, r > 0, m=M, M + 1 \leq i \leq M + K$ -- 3.3 Composition of the System of Balance Equations for the Case $n > 0$, When There are Customers in Buffer -- 3.4 Finding the Stationary State of the System -- 3.5 System Performance Characteristics -- 4 Numerical Results -- 4.1 Analysis of Performance Characteristics Through Analytical Methods -- 4.2 Comparison of

Analytical Results with a Real System -- 5 Conclusion -- References --
Selecting the Performance Metrics to Control the CPU Oversubscription
Ratio in a Cloud Server -- 1 Introduction -- 2 Selection of Applications
for the Synthetic Workload -- 3 The Set of Collected Performance
Metrics -- 4 Testbed Configuration and Usage -- 5 Experiments
Methodology and Results -- 5.1 Experiments Goal and Setup -- 5.2
Procedure for Metric Selection -- 5.3 Experiment Results and Analysis
-- 6 Conclusion -- References.

Transient Behavior of the Photonic Switch with Duplication of Switching
Elements in the All-Optical Network with Heterogeneous Traffic -- 1
Introduction -- 2 The Statement of the Problem -- 3 The Mathematical
Model of the Photonic Switch with Duplication of Switching Element --
4 The Mathematical Models of Performance Metrics -- 5 The Numerical
Results -- 6 Conclusion -- References -- FPGA Implementation of a
Decoder with Low-Density Parity Checks Based on the Minimum Sum
Algorithm for 5G Networks -- 1 Introduction -- 2 Mathematical
Apparatus for Performing Low-Density Parity-Check Encoding -- 2.1
Encoding Principle -- 2.2 Decoding Principle -- 2.3 Minimum Sum
Algorithm for LDPC Decoder -- 2.4 Calculation of the Minimum Sum
with Offset -- 2.5 Architecture of LDPC Decoder Using Min Sum
Algorithm -- 2.6 LDPC Decoder Simulation -- 2.7 Results of Synthesis
and Compilation of the Decoder Project -- 3 Conclusions -- References
-- Constructive Approach to Multi-position Passive Acoustic
Localization in Information-Measurement Systems -- 1 Introduction --
2 Problem Statement -- 3 Solution Method -- 4 Experiment -- 5
Structural Approach for Multi-position Passive Acoustic Localization --
6 Conclusions -- References -- Application of Queueing Theory to
Investigation of HaProxy Load Balancer Performance Characteristics --
1 Introduction -- 2 Description of Load Balancing Mechanisms.
HaProxy Load Balancer -- 2.1 HaProxy Load Balancer -- 2.2 Queues
and Priorities in HaProxy -- 3 A Prioritized Balancing Model.
Description of the Analytical Model MMAP/PH/M/N -- 3.1
MMAP/PH/M/N Queueing Model -- 4 Numerical Results -- 5 Conclusion
-- References -- Broadband Wireless Networks Based on Tethered
High-Altitude Unmanned Platforms -- 1 Introduction.
2 Calculation of the Telecommunications Coverage Area and
Characteristics of the Communication Channel of a Wireless Network
Based on a Tethered High-Altitude Unmanned Platform -- 3
Architecture of Wideband Wireless Network Based on Tethered Drone
-- 4 Performance Evaluation of Wireless Broadband Network Protocol
Based on Tethered Altitude Unmanned Platform Using Batch Service
Polling Model -- 5 Conclusion -- References -- Author Index.
